Who Giddh is for

- ✓ Fits if you keep Indian GST books and have several people entering data
- ✓ Works for accountants managing a few client companies

Who it is not for

- ✗ Tight if you're staying free, because it stops at 1,000 invoices and 1,000 bills
- ✗ Watch out: every extra voucher over your plan's count costs INR 1
- ✗ Pricey if you need many companies, since Vine is INR 10,000 for up to 10
- ✗ Watch out: prices are rupees excluding GST, and the monthly toggle prices weren't read
- ✗ Not for you if you're outside India, because UK and UAE pages price in other currencies

Good to know

Good for

- ✓ Small Indian businesses that want GST-aware books at a flat yearly fee
- ✓ Chartered accountants who manage several client companies
- ✓ Teams with many users: every plan has unlimited users

Worth knowing

- ⓘ Prices shown are the India set, in rupees and excluding GST; the UK and UAE pages use other currencies.
- ⓘ The pricing page counts invoices and bills per plan; extra vouchers cost INR 1 each.
- ⓘ The Month and Year toggle on the pricing page shows yearly prices by default; monthly prices were not read.
- ⓘ The site says students and teachers can use it free of charge.

Where it stands

Its grades against its category, and whether to keep it or make your own

121/127

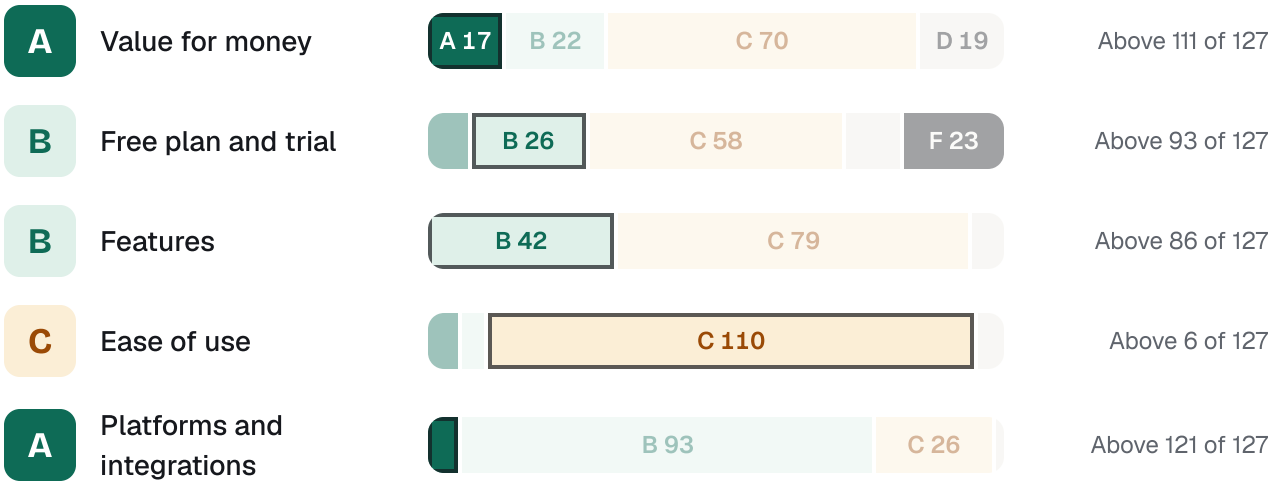

Other accounting and invoicing tools it is graded above

Giddh's GPA of 3.2 is higher than 121 of the 127 other accounting and invoicing tools we grade, and level with 4.

It stands best on platforms and integrations (A, above 121 of 127) and worst on ease of use (C, above 6).

Each grade against the category

Every bar is all 128 accounting and invoicing tools we grade, cut by the letter each got. Giddh's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Giddh you would be making live feeds from your bank, which take an agreement with each bank or a service that has them. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 3.2 is higher than 121 of the 127 other accounting and invoicing tools we grade.

What you could make

- Invoicing and inventory: an app builder makes these well.

What you could not

- Live feeds from your bank, which take an agreement with each bank or a service that has them.
- Apps for macOS, Windows, iOS and Android that stay in step with each other.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Giddh's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

Where this guide comes from

The prices, plans, platforms and features were read from Giddh's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Giddh's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews. One line of marketing text on the pricing page still says INR 800 a year, but the plan table itself shows Oak at INR 4,000, which matches the listing.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Walkover Technologies. Prices change, so check giddh.com before you buy.
