Who GoodBarber is for

- ✓ Fits if you want a native app for a business without hiring developers
- ✓ Works for agencies, as there is a reseller plan

Who it is not for

- ✕ Skip it if you want native apps on the cheapest plan, as Standard makes a web app only
- ✕ Pricey if you grow: Premium is €55, Pro €105 and Agency €215 a month on yearly billing
- ✕ Tight if you need space or push: extra storage is €2 per 10 GB and extra push €10 per 100K
- ✕ Watch out: no free plan, only a 30-day trial, and prices appear in the visitor's currency
- ✕ Watch out: Black Friday 50% off the first invoice needs a code and is not counted here

Good to know

- ✓ Publishers, course creators and event organizers who want their own app

Where it stands

Its grades against its category, and whether to keep it or make your own

23/89

Other AI app builders it is graded above

GoodBarber's GPA of 2.2 is higher than 23 of the 89 other AI app builders we grade, and level with 27.

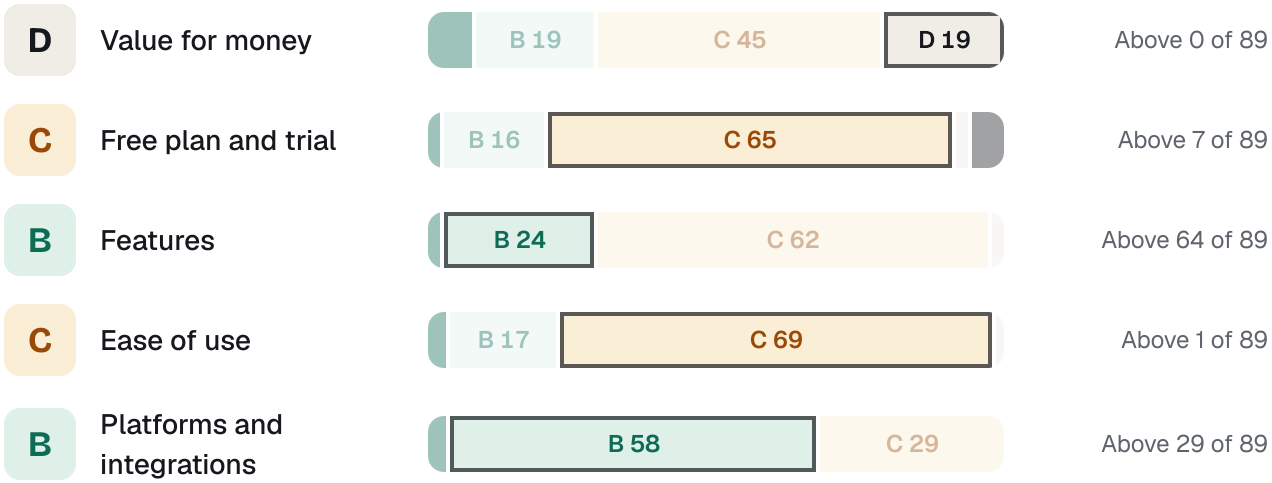

It stands best on features (B, above 64 of 89) and worst on value for money (D, above 0).

Its paid plans start at about $33.52 a month, against a middle price of $20 for the category: 74 of the 82 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. 12 tools score higher and cost less.

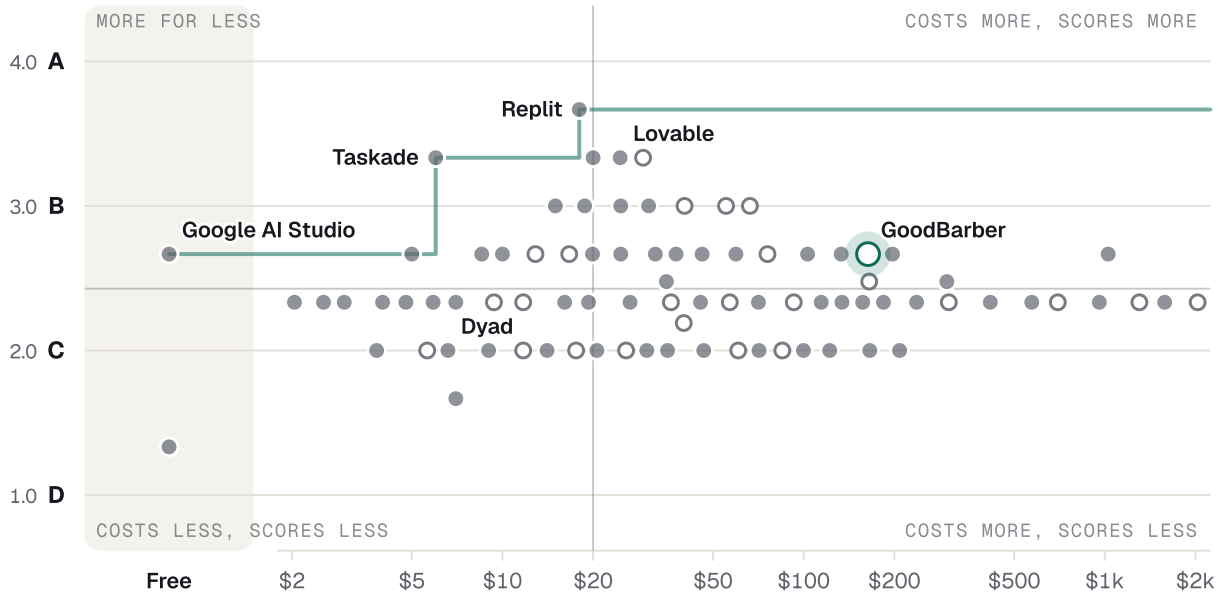

Each grade against the category

Every bar is all 90 AI app builders we grade, cut by the letter each got. GoodBarber's own letter is outlined.

Price against what you get

Each dot is one of 85 AI app builders. Further left costs less; higher up scores better on features, ease of use and platforms. GoodBarber is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace GoodBarber you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 39 of the 89 other AI app builders grade higher. It costs $402.19 a year.

What you could not

- ✕ A tool that builds and hosts other apps.
- ✕ A builder that other people can use without writing code.

- ✕ Checkout, card payments and sales tax handled for you.
- ✕ It plugs into other products, Zapier, Make and WordPress among them, and has an API.
- ✕ AI features, unless you pay a model provider for each request yourself.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. GoodBarber's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
