Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 31 of the 168 other AI image and video generators we grade

Veo is Google DeepMind's video generation model; the current version, Veo 3.1, produces clips with sound. It is not sold on its own: consumers reach it through the Gemini app and Google Flow on paid Google AI plans, and developers can build with it. Usage limits rise with each plan tier.

To get you started, here are **8 things to know about Google Veo**, taken from its own pages and our grades.

> **It sits inside a Gemini account you may already have, with nothing to install or set up.**
>
> From our grade for ease of use

1 **Best for video clips with sound, if you already pay for Google AI**

Limits are given as multiples of the free plan rather than a number of clips, and the free Gemini plan doesn't list video at all.

2 **Paid plans start at $4.99 a month**

As its pricing page puts it: $4.99 per month (Google AI Plus).

3 **It runs on Web**

Web.

4 **Video with native audio**

Veo 3.1 generates video together with sound, from a written prompt, according to Google DeepMind's model page.

5 **Try it in the Gemini app**

Video generation is part of the Gemini app on paid Google AI plans, with usage limits that grow by tier.

6 **Google Flow**

Google's creative studio for building scenes and stories; each plan includes a monthly allowance of Flow credits.

7 **A 2.0 GPA, above 31 of 168**

That is against the other AI image and video generators we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

To replace Google Veo you would be making a video model, which you can rent by the second but not make. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for video clips with sound, if you already pay for Google AI

Veo is Google's video model, and it comes only inside Google AI plans, with video generation listed from AI Plus at $4.99 a month upward. Limits are

given as multiples of the free plan rather than a number of clips, and the free Gemini plan doesn't list video at all.

TOOLGPA REPORT CARD	Google Veo	Graded Nov 12, 2026
SUBJECT	GRADE	COMMENT
Value for money	C	Video starts on AI Plus at $4.99 a month, but the plan is a bundle and the limits only double the free ones. Pro at $19.99 gives 4x, so real use sits near the middle-to-dear end of the category's $10 to $15 range.
Free plan and trial	F	The free Gemini plan doesn't list video generation. The page names it from AI Plus upward, and Pro carries only a limited Veo 3.1 Lite trial.
Features	C	Text to video with sound through the Gemini app and Google Flow, plus a developer route. The usage limits are never given as a count of videos, so you can't tell what a plan buys.
Ease of use	B	It sits inside a Gemini account you may already have, with nothing to install or set up.
Platforms and integrations	B	Gemini app, Google Flow and Google AI Studio, with a route for developers. Web-first and no desktop program.
Grade point average		Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Google Veo is for

- ✓ Fits if you already pay for a Google AI plan and want video thrown in
- ✓ Works for developers who want to call a video model from their own apps

Who it is not for

- ✗ Skip it if you want a video tool on its own, as Veo is sold only inside Google AI plans
- ✗ Tight if you stay on the free Gemini plan, because video isn't listed there
- ✗ Watch out: limits are given as multiples of the free plan, never a number of clips
- ✗ Watch out: developer pricing for the Veo API sits on a page we could not read

Good to know

Good for

- ✓ People who already pay for a Google AI plan and want video included
- ✓ Filmmakers and storytellers who want clips with generated sound
- ✓ Developers who want to call a video model from their own apps

Worth knowing

- ⓘ Veo is not sold separately; it is part of Google AI Plus, Pro and Ultra, so the price covers the whole bundle.
- ⓘ The free Gemini plan does not list video generation; the page names it from AI Plus upward.
- ⓘ The page gives usage limits as multiples of the Free plan, not as a number of videos.
- ⓘ Developer pricing for the Veo API sits on a separate page we could not read.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Google DeepMind's text-to-video model with native audio. Here is what it does, as its own site describes it, and what it covers: AI features, video generation.

> **Text to video with sound through the Gemini app and Google Flow, plus a developer route.**
>
> From our grade for features

Video with native audio

Veo 3.1 generates video together with sound, from a written prompt, according to Google DeepMind's model page.

Try it in the Gemini app

Video generation is part of the Gemini app on paid Google AI plans, with usage limits that grow by tier.

Google Flow

Google's creative studio for building scenes and stories; each plan includes a monthly allowance of Flow credits.

Build with Veo

The model page links developers to a route for building with Veo in their own products.

Speed-focused variant

Google's subscription page mentions Veo 3.1 Lite, a version it says prioritizes speed and efficiency.

Where it stands

Its grades against its category, and whether to keep it or make your own

31/168

Other AI image and video generators it is graded above

Google Veo's GPA of 2.0 is higher than 31 of the 168 other AI image and video generators we grade, and level with 31.

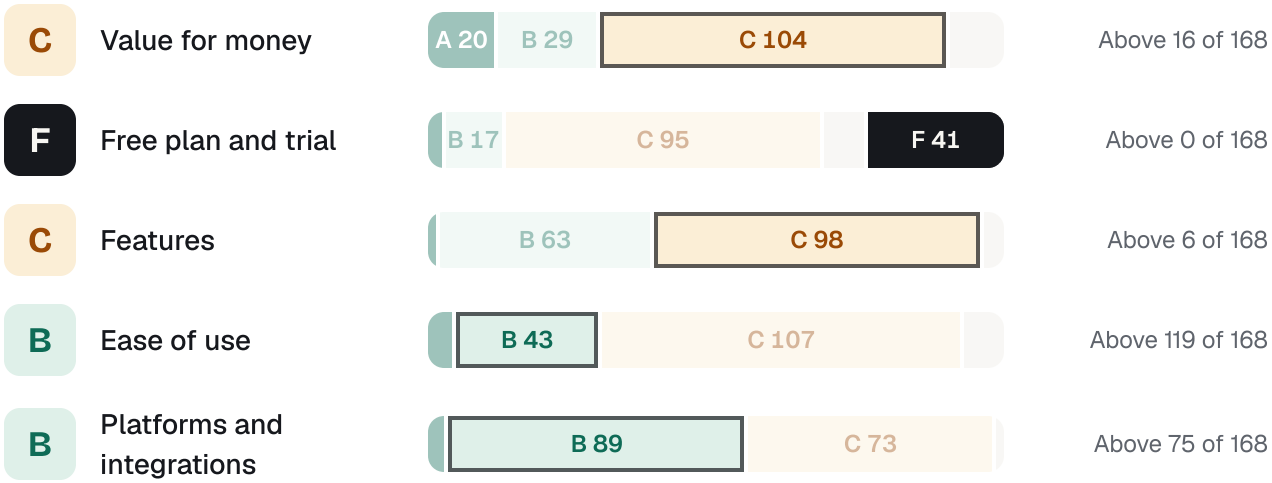

It stands best on ease of use (B, above 119 of 168) and worst on free plan and trial (F, above 0).

Its paid plans start at $4.99 a month, against a middle price of $11.88 for the category: 5 of the 120 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. 2 tools score higher and cost less.

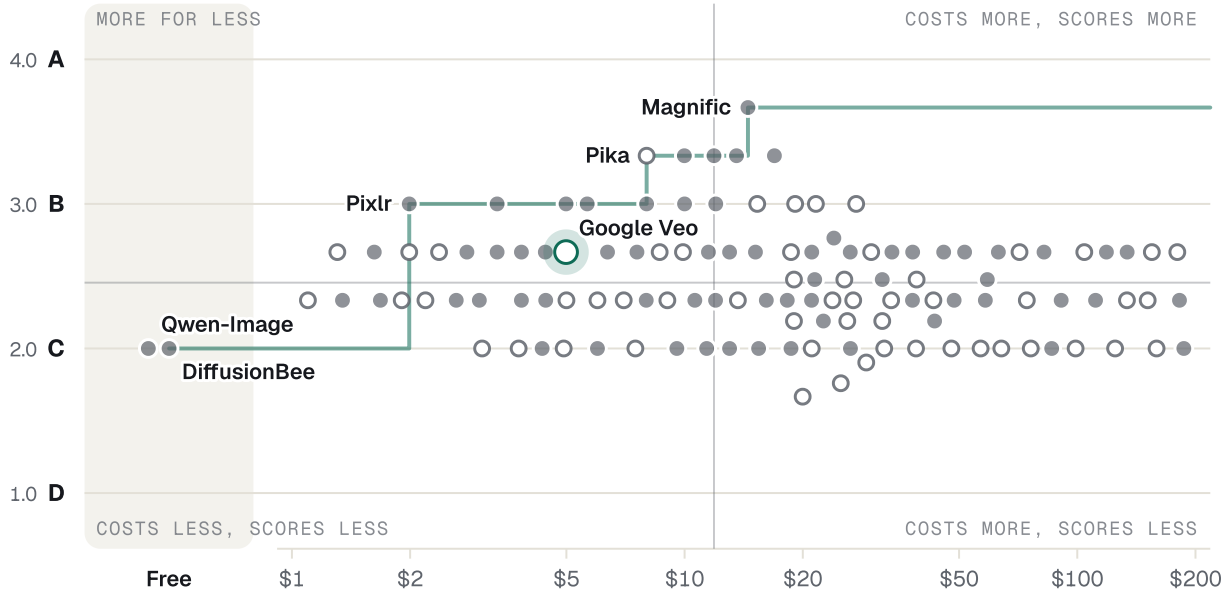

Each grade against the category

Every bar is all 169 AI image and video generators we grade, cut by the letter each got. Google Veo's own letter is outlined.

Price against what you get

Each dot is one of 123 AI image and video generators. Further left costs less; higher up scores better on features, ease of use and platforms. Google Veo is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Google Veo you would be making a video model, which you can rent by the second but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 106 of the 168 other AI image and video generators grade higher. It costs $59.88 a year.

What you could not

- ✕ A video model, which you can rent by the second but not make.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Google Veo's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
