# Welcome

What it is, who it suits, its grades and the ten things to know first

**2.2**

GPA, above 2 of the 35 other remote desktop apps we grade

GoToMyPC lets one person reach the files, applications and network of a home or office computer from another PC, Mac, phone, tablet or Chromebook. A host program on the computer being reached stays available, and connections start from a web portal or app. It is sold per computer in Personal, Pro and Corporate editions.

> "
>
> **You set up the host program on each computer first and invite users.**
>
> From our grade for ease of use

To get you started, here are **9 things to know about GoToMyPC**, taken from its own pages and our grades.

**1** **Best for reaching your own office computers from anywhere**

The pricing page doesn't say whether the figures are billed monthly or yearly.

**2** **Paid plans start at $28 a month**

As its pricing page puts it: $28 per computer / month (Corporate); Personal $35.

**3** **You can try it first**

7-day free trial, no credit card required

**4** **It runs on 6 platforms**

Web, Windows, macOS, iOS, Android and Linux.

**5** **Access from many devices**

Connect to a host computer from a PC, Mac, iOS, Android, Linux or Chromebook device, including through a browser with no download.

**6** **File transfer, printing and clipboard**

Drag-and-drop file transfer, remote printing and clipboard sync are listed on all three editions.

**7** **Security controls**

The pricing page lists end-to-end encryption, multi-factor authentication, screen blanking, keyboard and mouse lock and a remote session history log.

**8** **A 2.2 GPA, above 2 of 35**

That is against the other remote desktop apps we grade, on value, the free plan, features, ease of use and platforms.

**9** **Keep it**

To replace GoToMyPC you would be making a fast, secure link to another computer through any network. That is not a weekend's work, with an AI app builder or without one.

## The report card

### Best for reaching your own office computers from anywhere

GoToMyPC lets you reach your own computers from another device, with file transfer, remote printing, wake on LAN and a free first session on a new computer. It's priced per computer, at $35 a month on Personal, so every added machine adds a full charge. The pricing page doesn't say whether the figures are billed monthly or yearly.

TOOLGPA REPORT CARD — **GoToMyPC** — Graded Nov 12, 2026

| SUBJECT | GRADE | COMMENT |
|---|---|---|
| **Value for money** | D | Personal is $35 a computer a month, Pro $33 and Corporate $28, against a $10.00 middle for remote access tools. Every extra computer adds a full monthly charge. |
| **Free plan and trial** | C | A 7-day free trial with no credit card, and no free plan after it. |
| **Features** | B | Unlimited remote access, file transfer and sync, printing, clipboard, guest invites, wake on LAN and security controls. Nothing in the listing is missing for reaching your own machine. |
| **Ease of use** | C | No rating on record. You set up the host program on each computer first and invite users. |
| **Platforms and integrations** | B | Web, Windows, Mac, iOS, Android and Linux as devices to connect from, but no API or integrations are listed. |

**Grade point average** — Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

## Who GoToMyPC is for

- ✓ Fits if you work from home and need to reach one or two office computers
- ✓ Works for small teams that want shared access to a handful of machines

## Who it is not for

- ✕ Pricey if you reach several computers, as pricing is per computer reached
- ✕ Watch out: Personal and Pro show a crossed-out higher price with no end date, and the billing period isn't stated
- ✕ Skip it if you want to host from Linux, iOS or Android, which are named only as devices to connect from
- ✕ Tight if you're one person with over 20 computers, as Personal stops at 20 and Corporate starts at 5

# Good to know

## Good for

- ✓ Reaching your own office or home computer from anywhere
- ✓ Small teams that each need a few always-available desktops
- ✓ Businesses that need single sign-on and group settings on remote access

## Worth knowing

- ⓘ Pricing is per computer reached, so each added computer adds a full monthly charge.
- ⓘ The pricing page shows Personal and Pro as discounted from a higher crossed-out price with no end date, and does not say whether the figures are billed monthly or yearly.
- ⓘ The comparison table lists a desktop client for Windows and a shortcut for Mac as the host side; Linux, iOS, Android and Chromebook are named only as devices to connect from.
- ⓘ Personal is limited to one user, up to 20 computers; Pro covers 2 to 50 computers; Corporate starts at 5.

# Where it stands

Its grades against its category, and whether to keep it or make your own

**2**/35

Other remote desktop apps it is graded above

GoToMyPC's GPA of 2.2 is higher than 2 of the 35 other remote desktop apps we grade, and level with 8.

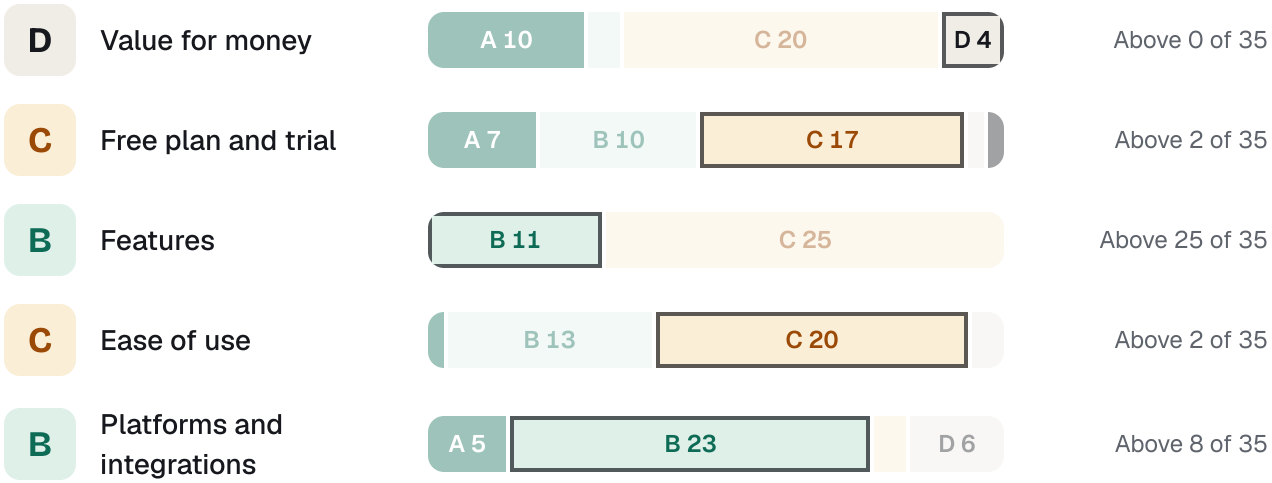

It stands best on features (B, above 25 of 35) and worst on value for money (D, above 0).

Its paid plans start at $28 a month, against a middle price of $8.33 for the category: 16 of the 20 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. 3 tools score higher and cost less.

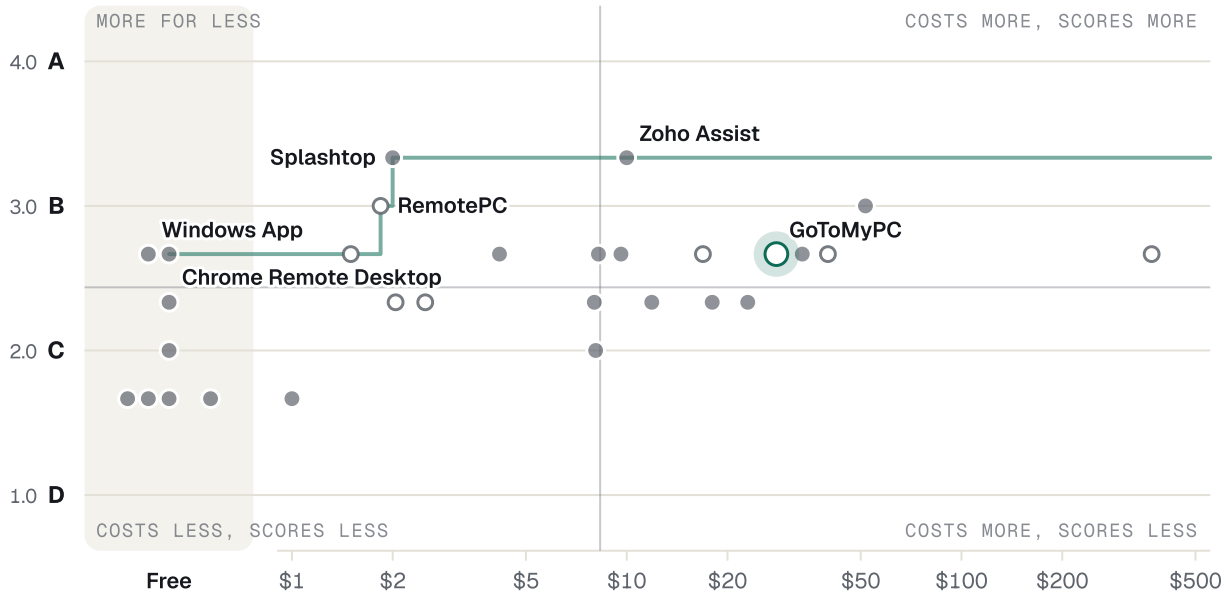

## Each grade against the category

Every bar is all 36 remote desktop apps we grade, cut by the letter each got. GoToMyPC's own letter is outlined.

## Price against what you get

Each dot is one of 29 remote desktop apps. Further left costs less; higher up scores better on features, ease of use and platforms. GoToMyPC is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

## Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

### Keep it

To replace GoToMyPC you would be making a fast, secure link to another computer through any network. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 25 of the 35 other remote desktop apps grade higher. It costs $336 a year.

**What you could not**

- ✕ A fast, secure link to another computer through any network.
- ✕ Storing and serving files for other people.

- ✕ Apps for macOS, Windows, Linux, iOS and Android that stay in step with each other.
- ✕ End-to-end encryption done properly.
- ✕ What a company asks for before it lets staff use something: single sign-on.
- ✕ The depth: we grade its features B, which means it covers the whole job.

**What this rests on.** GoToMyPC's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
