Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 8 of the 63 other spreadsheet and database tools we grade

GPTExcel is a web app where you upload an Excel or CSV file, or a photo of a table, and ask for results in plain English. It returns formulas, native pivot tables, charts, summaries and slide decks, and it also writes scripts, SQL and regular expressions. Usage is metered in credits that refresh weekly on paid plans and monthly on the free plan.

To get you started, here are **9 things to know about GPTExcel**, taken from its own pages and our grades.

> "
>
> **A web app with files to upload and results to paste back; no store rating on record.**
>
> From our grade for ease of use

1 **Best for AI help with Excel formulas and pivot tables**

GPTExcel is a web app where you upload a spreadsheet and chat with it for formulas, pivot tables and scripts.

2 **Paid plans start at $9 a month**

As its pricing page puts it: $9 per month (Pro).

3 **There is a free plan**

Free: 50 credits a month on the fast model, 5 free tool runs a day, files up to 5 MB and 10 per chat.

4 **It runs on Web**

Web.

5 **Chat with spreadsheets**

Upload Excel or CSV files and ask questions; answers come with charts and summaries.

6 **Formula generation**

Writes and explains formulas for Excel, Google Sheets, LibreOffice Calc and Airtable.

7 **Pivot Builder**

Builds native Excel pivot tables, slicers and pivot charts from a plain-English request.

8 **A 2.0 GPA, above 8 of 63**

That is against the other spreadsheet and database tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace GPTExcel you would be making a spreadsheet engine with its formulas. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for AI help with Excel formulas and pivot tables

GPTExcel is a web app where you upload a spreadsheet and chat with it for formulas, pivot tables and scripts. The free plan gives 50 credits a month, it is

not an add-in inside Excel, and credits don't roll over.

TOOLGPA REPORT CARD	GPTExcel	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	C	Pro is $9 a month and Pro Plus $18, both mid-range for the category.
Free plan and trial	C	Free forever, but 50 credits a month and 5 MB files is a cap you'll hit.
Features	C	Chat with files, formulas, a pivot builder, a slide builder, scripts, SQL and regex. You upload and copy results back, as it is not inside Excel.
Ease of use	C	A web app with files to upload and results to paste back; no store rating on record.
Platforms and integrations	C	Web only, with no add-in, desktop app or phone app.
Grade point average		Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who GPTExcel is for

- ✓ Fits if you want help writing a formula you can't get right
- ✓ Works for people who'd rather upload a file than install an add-in

Who it is not for

- ✗ Skip it if you want it inside Excel or Sheets, since it is a separate web app
- ✗ Tight if you stay free: 50 credits a month and files up to 5 MB
- ✗ Watch out: credits don't roll over and bursts are paced over 5-hour windows
- ✗ Pricey if you want the expert model, which costs 10 credits a message and needs Pro Plus at $18

Good to know

Good for

- ✓ Excel users who want formulas and pivot tables without learning the syntax
- ✓ Analysts who want a first pass over a sales or finance export
- ✓ Occasional users who can stay within the free monthly credits

Worth knowing

- ⓘ It is a separate web app, not an add-in inside Excel or Sheets; you upload files and download or paste results.
- ⓘ Credits do not roll over, and the page says heavy bursts are paced over 5-hour windows.
- ⓘ The expert model, at 10 credits a message, is only on Pro Plus.
- ⓘ Paid plans refresh credits weekly, so a month's total cannot be used in one go.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

8/63

Other spreadsheet and database tools it is graded above

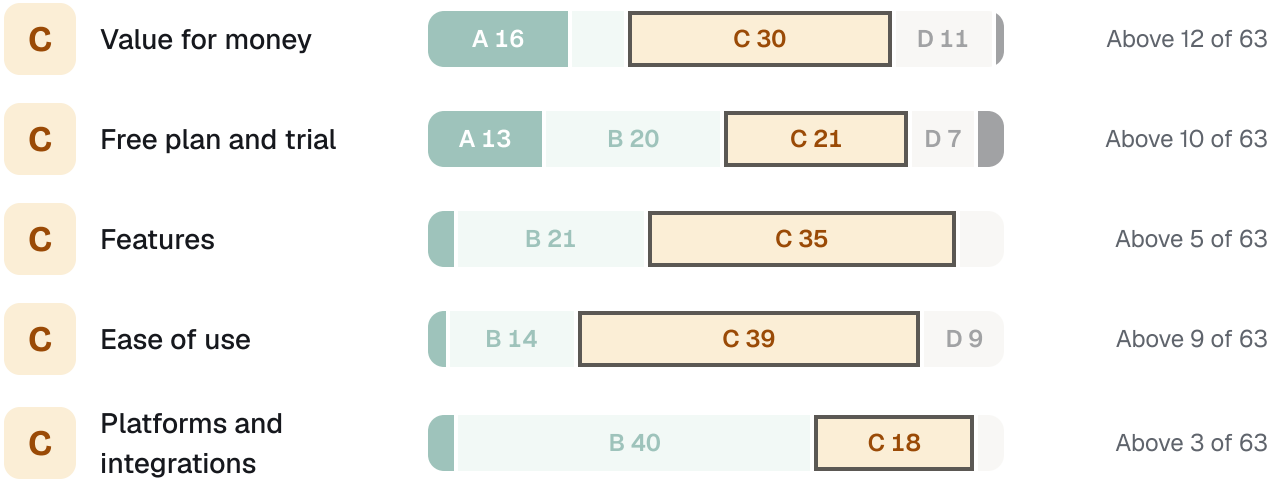

GPTExcel's GPA of 2.0 is higher than 8 of the 63 other spreadsheet and database tools we grade, and level with 8.

Its paid plans start at $9 a month, against a middle price of $12 for the category: 16 of the 47 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 17 tools score higher and cost less.

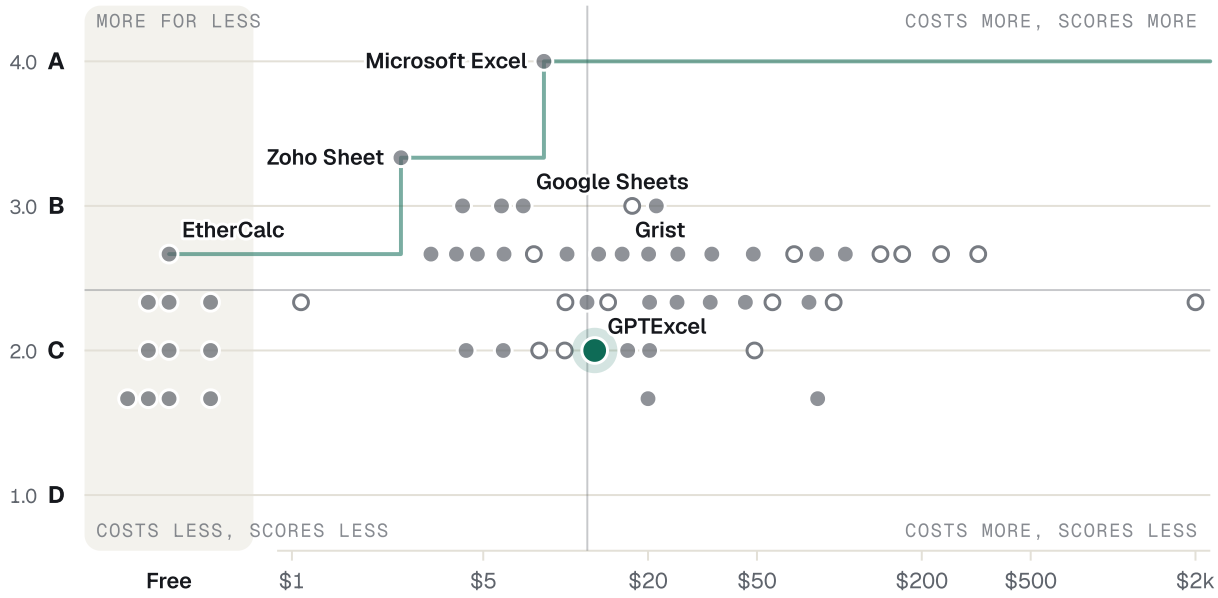

Each grade against the category

Every bar is all 64 spreadsheet and database tools we grade, cut by the letter each got. GPTExcel's own letter is outlined.

Price against what you get

Each dot is one of 59 spreadsheet and database tools. Further left costs less; higher up scores better on features, ease of use and platforms. GPTExcel is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace GPTExcel you would be making a spreadsheet engine with its formulas. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 47 of the 63 other spreadsheet and database tools grade higher. It costs $108 a year.

What you could make

- Reports: an app builder makes this well.

What you could not

- A spreadsheet engine with its formulas.

- ✕ An AI model, which you can rent by the request but not make.
- ✕ A slide editor.
- ✕ It plugs into other products, Microsoft Excel, Google Sheets and LibreOffice Calc among them.

What this rests on. GPTExcel's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
