Where it stands

Its grades against its category, and whether to keep it or make your own

1/60

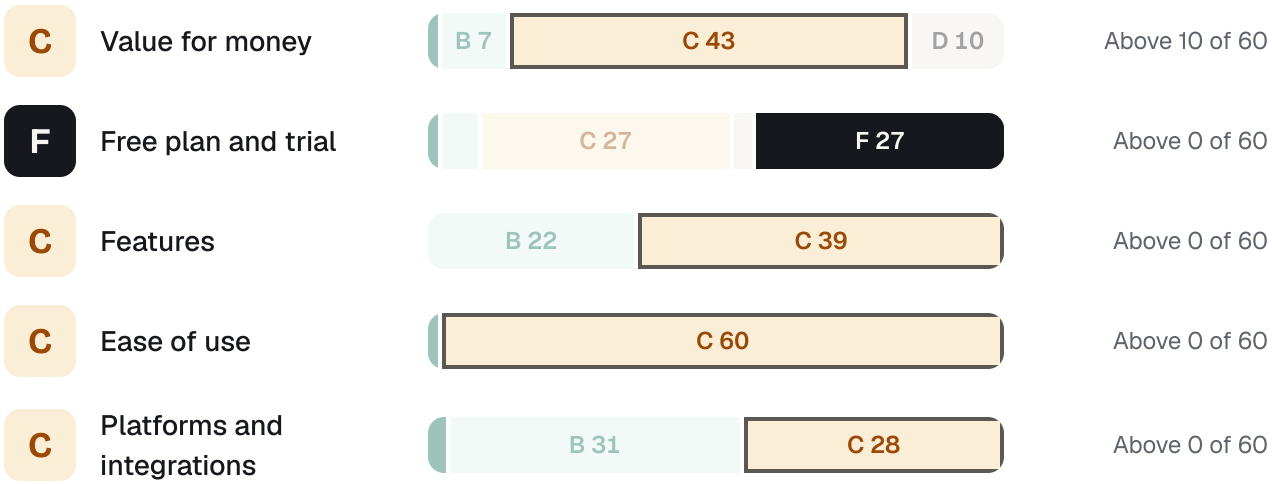

Other therapy and clinic software it is graded above

Greenway's GPA of 1.6 is higher than 1 of the 60 other therapy and clinic software we grade, and level with 13.

It stands best on value for money (C, above 10 of 60) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 61 therapy and clinic software we grade, cut by the letter each got. Greenway's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Greenway you would be making video sessions that meet health privacy rules. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 46 of the 60 other therapy and clinic software grade higher.

What you could make

- Reports: an app builder makes this well.

What you could not

- Video sessions that meet health privacy rules.
- Insurance claims sent to payers through a clearinghouse.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. Greenway's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
