Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 35 of the 186 other desktop utilities we grade

Gyazo captures a screenshot, short video or GIF, uploads it and copies a shareable link in one step. Captures can be grouped into collections, tagged and searched, and Pro adds text search inside images and editing. Apps cover Windows, Mac, iOS and Android, plus browser extensions, and a separate Teams product serves groups.

Best for capturing and sharing a screenshot by link

Gyazo captures a screenshot, video or GIF and copies a share link in one step. But the free plan shows only your 10 latest images and cuts video at 7 seconds, Pro is $6.99 a month, and the site carries a notice about a data breach.

TOOLGPA REPORT CARD **Gyazo** Graded Nov 13, 2026

Free plan and trial	C	Unlimited capturing and uploading are free, but only the 10 latest images are reachable and video stops at 7 seconds.
Features	B	Capture, share by link, collections, tags, OCR search and editing on Pro. Nothing in the listing is missing from the job, though several parts need Pro.
Ease of use	B	Press a hotkey and get a link, with nothing to set up. No store rating is on record.
Platforms and integrations	B	Windows, Mac, iPhone, Android and browser extensions, with a small integrations list (Obsidian and n8n).

Grade point average Fair, out of 4.0 **2.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

35/186

Other desktop utilities it is graded above

Gyazo's GPA of 2.4 is higher than 35 of the 186 other desktop utilities we grade, and level with 33.

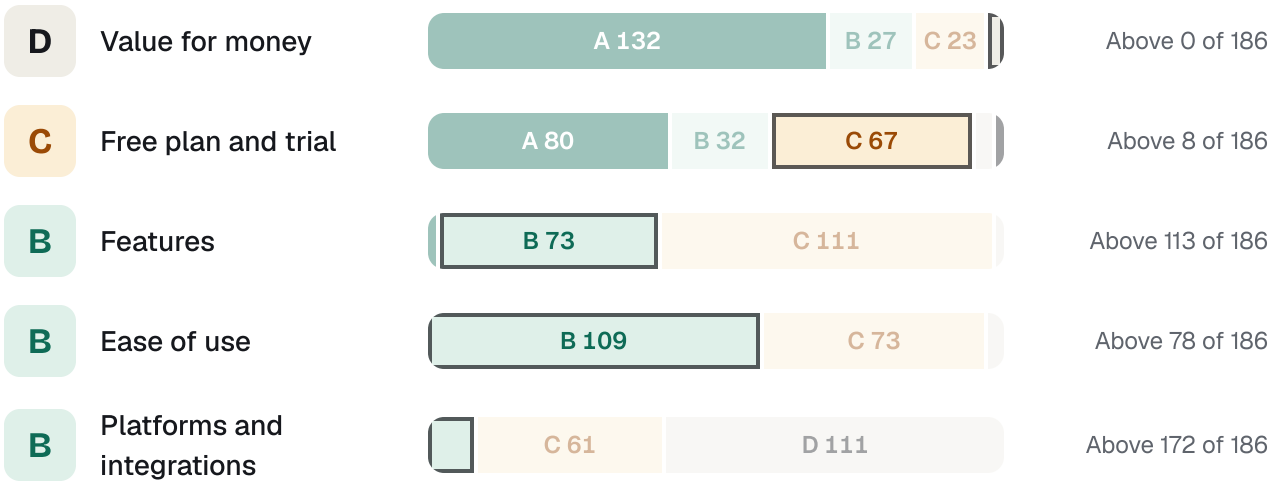

It stands best on platforms and integrations (B, above 172 of 186) and worst on value for money (D, above 0).

Its paid plans start at $6.99 a month, against a middle price of $2.99 for the category: 31 of the 36 others that charge start lower.

On features, ease of use and platforms it scores 3.0 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

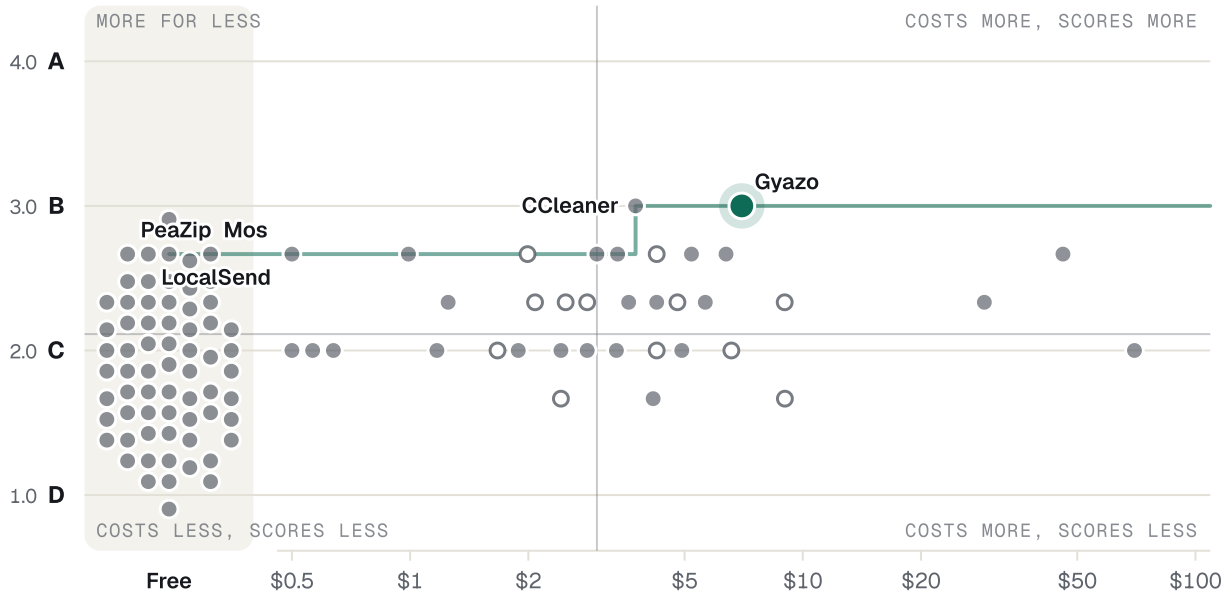

Each grade against the category

Every bar is all 187 desktop utilities we grade, cut by the letter each got. Gyazo's own letter is outlined.

Price against what you get

Each dot is one of 103 desktop utilities. Further left costs less; higher up scores better on features, ease of use and platforms. Gyazo is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Gyazo you could make: web clipper. What surrounds it you could not. The 5 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 118 of the 186 other desktop utilities grade higher. It costs $83.88 a year.

What you could make

- Web clipper: an app builder makes this well.

What you could not

- Capture tools hooked into the operating system.

- Recording the screen with its sound, and somewhere to keep the video.
- Storing and serving files for other people.
- Apps for macOS, Windows, iOS and Android that stay in step with each other.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Gyazo's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
