It stands best on features (B, above 42 of 85) and worst on free plan and trial (F, above 0).

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace GymMaster you would be making email sent in volume that still reaches the inbox. That is not a weekend's work, with an AI app builder or without one.

It costs $1,068 a year.

What you could make

- Class booking, appointment booking, inventory and reports: an app builder makes these well.

What you could not

- Email sent in volume that still reaches the inbox.

- A real app for iOS and Android. Something home-made would be a web page.
- It plugs into other products, Zapier, Zoom and Mailchimp among them, and has an API.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. GymMaster's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
