Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 81 of the 178 other AI agents we grade

H Company is an AI research lab and agent platform whose agents operate browsers and desktops by clicking and typing, with no integration required. It sells an Agents API on monthly session plans, a Models API for its Holo models, and enterprise deployments with forward deployed engineers.

To get you started, here are **9 things to know about H Company**, taken from its own pages and our grades.

> **It is built around APIs, a command line tool and model weights you wire in yourself.**
>
> From our grade for ease of use

1 **Best for computer-use agents API and models**

H Company offers agent and model APIs, open weights and a browser add-on.

2 **Paid plans start at $20 a month**

As its pricing page puts it: $20 per month (Builder plan).

3 **There is a free plan**

Up to 3 concurrent agents and about 60 sessions a month, with model cost free and a datacenter proxy.

4 **It runs on Web**

Web, with a browser extension too.

5 **Agents API**

Agents work in a cloud-hosted browser or on a desktop without needing site APIs, and are reachable through an API, SDK, MCP server or CLI.

6 **Models API**

An OpenAI-compatible API for the Holo multimodal models, taking text and image input, so you can run your own agent loop.

7 **Open weights**

Holo model checkpoints can be downloaded from Hugging Face and run on your own hardware.

8 **A 2.2 GPA, above 81 of 178**

That is against the other AI agents we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace H Company you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.
