Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Hearth Display you could make: calendar, tasks and habit tracking. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 113 of the 114 other calendar and scheduling apps grade higher. It costs $69.12 a year.

What you could make

- Calendar, tasks and habit tracking: an app builder makes these well.

What you could not

- A real app for iOS and Android. Something home-made would be a web page.
- AI features, unless you pay a model provider for each request yourself.
- Sharing with other people, which means accounts and invitations.

What this rests on. Hearth Display's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
