GPA, above 6 of the 101 other hiring and applicant tracking tools we grade

Hireology is a hiring platform for businesses with several locations, such as auto dealerships and healthcare groups. It combines career sites, job distribution, interview scheduling and candidate management, and offers a Perform plan with AI features on top of the Core plan.

To get you started, here are **7 things to know about Hireology**, taken from its own pages and our grades.

> **No price is published and AI Match, AI summaries and the AI interview are not in Core.**

6 **A 1.6 GPA, above 6 of 101**

That is against the other hiring and applicant tracking tools we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Hireology you would be making jobs posted to dozens of job boards at once, which takes an agreement with each board. That is not a weekend's work, with an AI app builder or without one.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

6/101

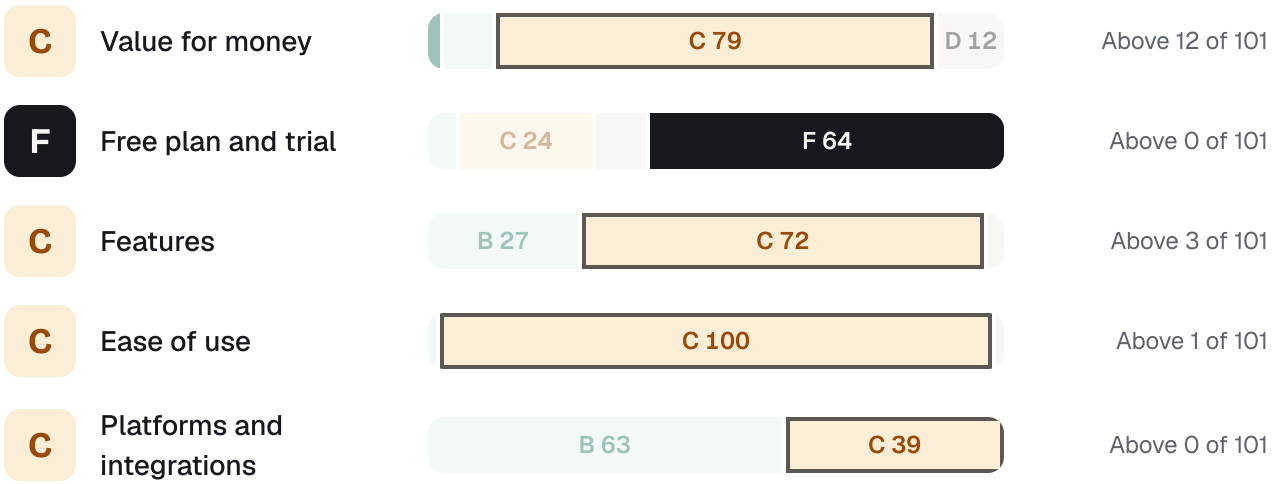

Other hiring and applicant tracking tools it is graded above

Hireology's GPA of 1.6 is higher than 6 of the 101 other hiring and applicant tracking tools we grade, and level with 23.

It stands best on value for money (C, above 12 of 101) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 102 hiring and applicant tracking tools we grade, cut by the letter each got. Hireology's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Hireology you would be making jobs posted to dozens of job boards at once, which takes an agreement with each board. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 72 of the 101 other hiring and applicant tracking tools grade higher.

What you could make

- Applicant tracking and reports: an app builder makes these well.

What you could not

- Jobs posted to dozens of job boards at once, which takes an agreement with each board.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. Hireology's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
