Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Hivelocity's own pages, its app-store listings and our grades. Every fact in it is on Hivelocity's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 29 of the 122 other web hosts we grade

Hivelocity rents dedicated servers, virtual private servers (VPS), virtual dedicated servers (VDS) and colocation space across more than 40 data centers on six continents. Servers are ordered from a catalog or configured to order, managed through the myVelocity portal or an API, and backed by round-the-clock human support.

> "
>
> **You get a server and run it yourself, usually over SSH.**
>
> From our grade for ease of use

To get you started, here are **8 things to know about Hivelocity**, taken from its own pages and our grades.

1 **Best for rented VPS, dedicated servers and colocation**

These are bare servers, so management and firewall are separate paid services, and dedicated prices vary by configuration.

2 **Paid plans start at $10 a month**

As its pricing page puts it: $10 per month (pro.sm.amd VPS).

3 **It runs on Web**

Web.

4 **Dedicated servers**

Single-tenant bare-metal machines, from entry Xeon models to a GPU server, either from a catalog of instant servers or configured to order.

5 **VPS and VDS**

VPS plans share CPU cores with guaranteed minimums, while VDS plans give unshared CPU cores and RAM.

6 **Global data centers**

The vendor lists 40+ data centers on six continents and a network it describes as 2+ Tbps with a 99.99% uptime SLA.

7 **A 1.8 GPA, above 29 of 122**

That is against the other web hosts we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

To replace Hivelocity you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

Hivelocity at a glance

OUR GRADE 1.8 GPA, weak	

The report card

Best for rented VPS, dedicated servers and colocation

Hivelocity rents VPS, dedicated servers and colocation from 40-plus data centres, with API and Terraform support. These are bare servers, so management and firewall are separate paid services, and dedicated prices vary by configuration.

TOOLGPA REPORT CARD — **Hivelocity** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	The smallest listed VPS is $10 a month for 2 vCPUs and 4 GB, below the $10.99 middle for web hosting. A dedicated E-2236 server is $97 and GPU servers start far higher.
Free plan and trial	F	Nothing is free: no free plan and no trial are listed.
Features	B	VPS, dedicated VDS, bare metal and colocation across 40-plus data centres, with an API, Terraform and a choice of OS and apps. Management is a separate service.
Ease of use	D	No store rating on record. You get a server and run it yourself, usually over SSH.
Platforms and integrations	B	Web only, but it has an API and Terraform and installs CloudPanel, Coolify, Nextcloud, Portainer, GitLab and Tailscale.

Grade point average — Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Hivelocity is for

- ✓ Fits if you want your own server with a choice of locations
- ✓ Works for teams that automate infrastructure with Terraform

Who it is not for

- ✕ Skip it if you want managed hosting, as server management and firewall are separate services
- ✕ Tight if you want a fixed price, since dedicated and GPU prices vary by configuration
- ✕ Watch out: the 35% lifetime savings banner covers eligible dedicated servers only
- ✕ Watch out: some listed VPS prices show a higher crossed-out figure beside them

Good to know

Good for

- ✓ Businesses that want bare-metal control with a human support team
- ✓ Developers needing a low-cost VPS in a US or international data center
- ✓ Teams that automate infrastructure through an API or Terraform

Worth knowing

- ⓘ These are rented servers, not managed web hosting; server management and firewall are separate listed services.
- ⓘ The homepage banner offers 35% lifetime savings on eligible dedicated servers, so many dedicated prices differ from the examples shown.
- ⓘ Prices above are monthly list prices for example plans; the catalog and custom quotes hold many more configurations.
- ⓘ Dedicated GPU servers are priced much higher, with a sample L4 server at $999 a month.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$10
A month to start

Hivelocity is a paid product, starting at $10 per month (pro.sm.amd VPS).

> **Nothing is free: no free plan and no trial are listed.**
>
> From our grade for free plan and trial

VPS PRO.SM.AMD

$10

per month

2 vCPUs, 4 GB memory, 40 GB NVMe SSD and 10 TB bandwidth on a 1 Gbps port.

VPS PRO.MD.AMD

$15

per month

4 vCPUs, 8 GB memory, 80 GB NVMe SSD, 10 TB / 1 Gbps. The page shows $20 crossed out beside the $15.

VDS VDS.SM.INTEL

$21

per month

Dedicated, unshared 2 vCPUs, 4 GB memory, 80 GB storage and 10 TB bandwidth on a 1 Gbps port.

VDS VDS.MD.INTEL

$37

per month

Dedicated 4 vCPUs, 8 GB memory and 160 GB storage. The page shows $42 crossed out beside the $37.

DEDICATED E-2236

$97

per month

A whole server: 6 cores and 12 threads, 16 GB memory, 480 GB SSD, 20 TB bandwidth on a 1 Gbps port.

Read from hivelocity.net on Nov 13, 2026.

Ways to pay less

OTHER SAVINGS

35% lifetime savings on eligible servers

A banner on the homepage advertises 35% lifetime savings on eligible dedicated servers; which servers qualify is not listed there.

Stated on hivelocity.net

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Bare-metal dedicated servers, VPS and colocation in 40+ data centers. Here is what it does, as its own site describes it, and what it covers: public API, workflow automation.

> **Web only, but it has an API and Terraform and installs CloudPanel, Coolify, Nextcloud, Portainer, GitLab and Tailscale.**
>
> From our grade for platforms and integrations

Dedicated servers

Single-tenant bare-metal machines, from entry Xeon models to a GPU server, either from a catalog of instant servers or configured to order.

VPS and VDS

VPS plans share CPU cores with guaranteed minimums, while VDS plans give unshared CPU cores and RAM.

Global data centers

The vendor lists 40+ data centers on six continents and a network it describes as 2+ Tbps with a 99.99% uptime SLA.

API and Terraform

Servers can be purchased, deployed and managed through an API, and a Terraform provider for Hivelocity is published.

Colocation and add-on services

Customers can house their own hardware, and the services list covers server management, firewall, backups and cloud object storage.

Choice of operating systems and apps

VPS options include Ubuntu, Windows, AlmaLinux, Debian and Rocky, with app images such as CloudPanel, WordPress, Coolify and Nextcloud.

Where it runs

Web

What it works with

Terraform
CloudPanel
WordPress
Coolify
Nextcloud
Portainer
GitLab
Tailscale

Hivelocity is made by Hivelocity.

Where it stands

Its grades against its category, and whether to keep it or make your own

29/122

Other web hosts it is graded above

Hivelocity's GPA of 1.8 is higher than 29 of the 122 other web hosts we grade, and level with 19.

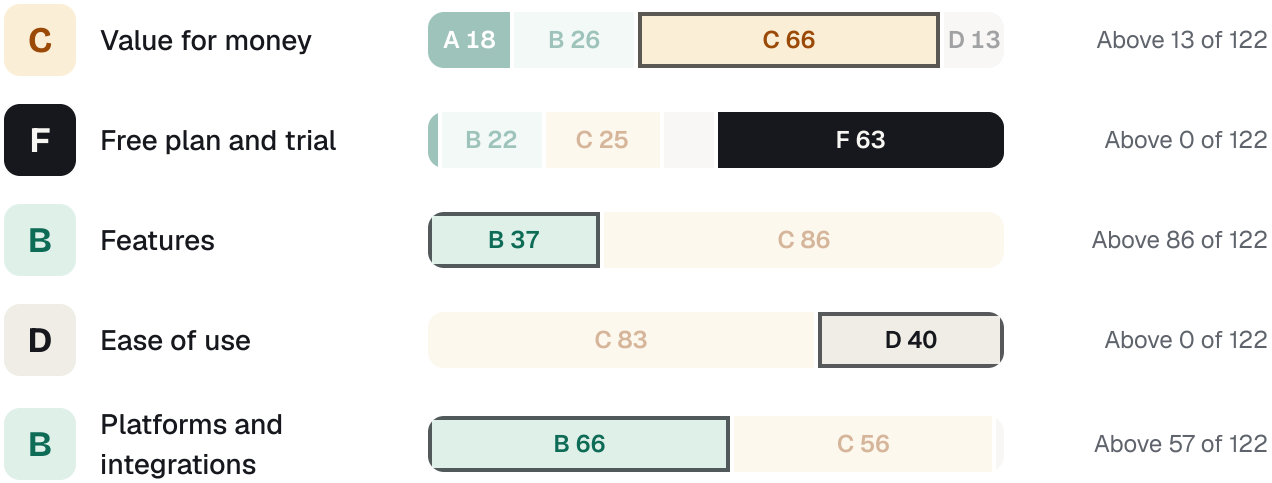

It stands best on features (B, above 86 of 122) and worst on free plan and trial (F, above 0).

Its paid plans start at $10 a month, against a middle price of $9.69 for the category: 54 of the 107 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 3 tools score higher and cost less.

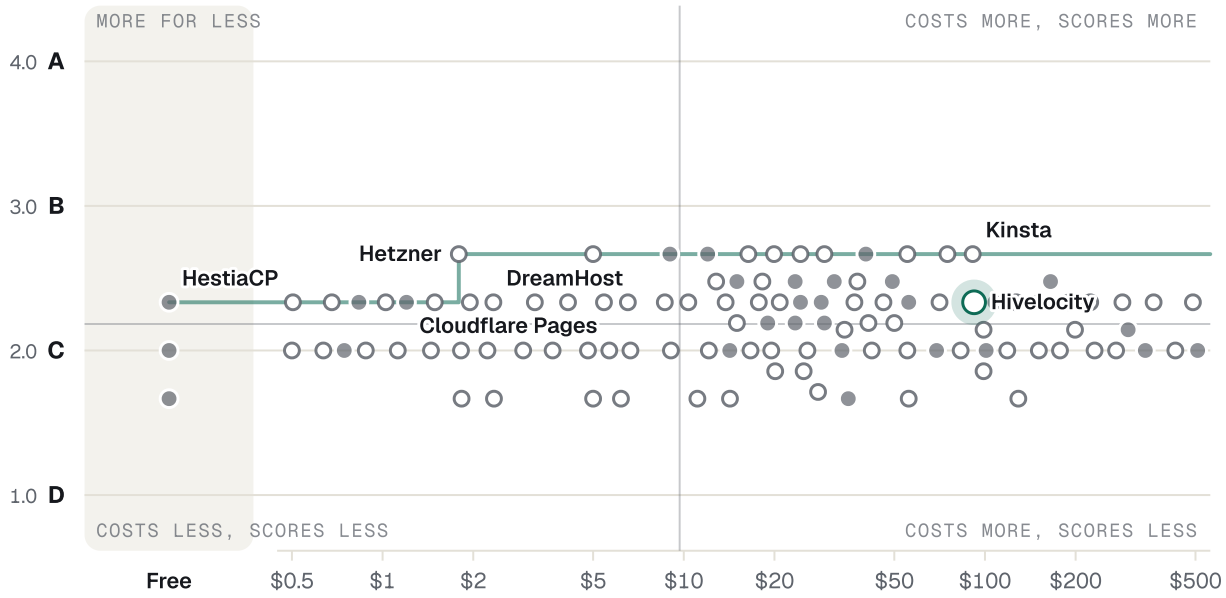

Each grade against the category

Every bar is all 123 web hosts we grade, cut by the letter each got. Hivelocity's own letter is outlined.

Price against what you get

Each dot is one of 111 web hosts. Further left costs less; higher up scores better on features, ease of use and platforms. Hivelocity is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Hivelocity you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 74 of the 122 other web hosts grade higher. It costs $120 a year.

What you could not

- ✕ Connections to other products, each kept working as those products change.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Hivelocity's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Leaseweb, Liquid Web, Hostwinds, Kimsufi and Latitude.sh

The 5 tools Hivelocity is most often weighed against, with where each one differs from it.

1.6 GPA

Leaseweb

Paid

Dedicated servers, VPS and public cloud infrastructure.

- Hivelocity also covers workflow automation.
- Leaseweb also covers system monitor.

Hivelocity and Leaseweb compared in full

2.0 GPA

Liquid Web

From $17/mo

Managed WordPress, VPS and dedicated server hosting for businesses.

- Hivelocity also covers workflow automation.
- Liquid Web also covers malware protection and managed WordPress.

Hivelocity and Liquid Web compared in full

1.8
GPA

Hostwinds

From $4.99/mo

Shared, business, VPS and cloud hosting with managed support.

- Hivelocity also covers workflow automation.
- Hostwinds also covers no-code.

Quick answers

The questions people ask about it, each answered in a line or two

14

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Hivelocity free?

No. Hivelocity is a paid product, starting at $10 per month (pro.sm.amd VPS).

How much does Hivelocity cost?

Hivelocity lists 5 plans. VPS pro.sm.amd: $10 per month.

What platforms does Hivelocity work on?

Hivelocity is available on Web.

Does Hivelocity offer any discounts?

Hivelocity publicly lists the following: 35% lifetime savings on eligible servers.

Does Hivelocity have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. Hivelocity is listed for Web.

Does Hivelocity have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. Hivelocity is listed for Web.

Is Hivelocity open source?

Hivelocity is not described as open source on its own site, as read on Nov 13, 2026.

Does Hivelocity have an API?

Yes. Hivelocity offers a public API, according to its own site.

What does Hivelocity integrate with?

Hivelocity's listing names Terraform, CloudPanel, WordPress, Coolify, Nextcloud, Portainer, GitLab and Tailscale.

Who makes Hivelocity?

Hivelocity is made by a company of the same name.

What are the alternatives to Hivelocity?

The closest alternatives to Hivelocity in our directory are Leaseweb, Liquid Web, Hostwinds, Kimsufi and Latitude.sh.

How does Hivelocity compare with other web hosts?

Hivelocity's GPA of 1.8 is higher than 29 of the 122 other web hosts we grade, and level with 19.

Is Hivelocity good value for money?

ToolGPA grades Hivelocity C for value for money. Its paid plans start at $10 a month, against a middle price of $9.69 for the category: 54 of the 107 others that charge start lower.

Could I make my own version of Hivelocity?

To replace Hivelocity you would be making connections to other products, each kept working as those products change.

Where this guide comes from

The prices, plans, platforms and features were read from Hivelocity's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Hivelocity's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Hivelocity. Prices change, so check hivelocity.net before you buy.
