Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

What you could make

- Ad and tracker blocking: an app builder makes this well.

What you could not

- Servers in dozens of countries, kept fast and private.

- An engine that recognises new malware as it appears.
- Apps for macOS, Windows, Linux, iOS and Android that stay in step with each other.

What this rests on. Hoxx VPN's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
