It stands best on value for money (B, above 18 of 23) and worst on features (C, above 0).

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Humanity Schedule you could make: time off and reports. What surrounds it you could not. The 6 things listed below take a company, not a weekend.

It costs $33 a year.

What you could make

- Time off and reports: an app builder makes these well.

What you could not

- A rota the whole staff sees on their phones, with swaps and alerts.

- ✕ Clocking in from a phone, checked against where and when.
- ✕ A real app for iOS and Android. Something home-made would be a web page.
- ✕ It is priced for each person, which means accounts and billing for a team.
- ✕ AI features, unless you pay a model provider for each request yourself.
- ✕ Hooks into the device itself: an Apple Watch app.

What this rests on. Humanity Schedule's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
