Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 81 of the 178 other AI agents we grade

Hyperbrowser provides cloud-hosted Chrome sessions that agents control through Playwright, Puppeteer or an SDK, plus isolated sandboxes for running code and a Web API for fetching, crawling and searching pages. It can also run browser tasks from a prompt with HyperAgent, Browser Use or computer-use models. All four products draw on one pool of credits.

To get you started, here are **9 things to know about Hyperbrowser**, taken from its own pages and our grades.

- ✗ Pricey if you go past the plan, at $0.10 an hour of browser time and $10 a GB of proxy data
- ✗ Watch out: agent steps cost $0.02 each on top of browser time and proxy data
- ✗ Watch out: plan credits reset on renewal and don't carry over

Each grade against the category

Every bar is all 179 AI agents we grade, cut by the letter each got. Hyperbrowser's own letter is outlined.

Price against what you get

Each dot is one of 109 AI agents. Further left costs less; higher up scores better on features, ease of use and platforms. Hyperbrowser is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Hyperbrowser you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

It costs $360 a year.

What you could not

- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ Connections to other products, each kept working as those products change.

- ✕ Capture tools hooked into the operating system.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Hyperbrowser's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
