Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 5 of the 81 other cold outreach tools we grade

Hypertide sets up cold email infrastructure for senders: Google inboxes billed per inbox, and Microsoft Entra domains that each come with 25 inboxes. Orders are isolated from one another, with SPF, DKIM and DMARC configured, and the inboxes are uploaded to a sequencer by OAuth or SMTP.

To get you started, here are **8 things to know about Hypertide**, taken from its own pages and our grades.

> "
>
> **Setup is automated, but you wire it to a sequencer.**
>
> From our grade for ease of use

1 **Best for Google and Microsoft inboxes for cold email**

But it supplies inboxes only, and its own pages disagree on sending capacity and price.

2 **Paid plans start at $3.30 a month**

As its pricing page puts it: $3.30 per inbox / month.

3 **It runs on Web**

Web.

4 **Automated deployment**

Orders are set up automatically and the homepage says inboxes are ready in 4 to 6 hours.

5 **Tenant separation**

Each order is isolated, with its own domains, IPs and users.

6 **Reply Relay and Domain Layover**

Features included in both plans, described on the site as being for operational continuity.

7 **A 1.6 GPA, above 5 of 81**

That is against the other cold outreach tools we grade, on value, the free plan, features, ease of use and platforms.

8 **You could make this**

The report card

Best for Google and Microsoft inboxes for cold email

HyperTide sets up Google and Microsoft inboxes for cold email senders, from $3.30 an inbox a month with no minimums. But it supplies inboxes only, and its own pages disagree on sending capacity and price.

TOOLGPA REPORT CARD	Hypertide	Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	B	Google inboxes are $3.30 each a month with no minimum, and Entra domains $25 a month with 25 inboxes ($1 each). That is cheap per inbox, but you still pay for a sequencer.
Free plan and trial	F	No free plan and no trial is listed on its pages, so you pay from the first day.
Features	D	Automated setup, tenant separation, reply relay, domain layover and upload to a sequencer. It sends no campaigns itself.
Ease of use	C	No store rating on record. Setup is automated, but you wire it to a sequencer.
Platforms and integrations	C	Web only, with upload to Smartlead, Instantly and Bison.
Grade point average		Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Hypertide is for

- ✓ Fits if you already send through Smartlead or Instantly and want inboxes handled
- ✓ Works for people who want to pay per inbox with no package

Who it is not for

- ✗ Not for you if you need campaigns sent, since a separate sequencer does that
- ✗ Watch out: the homepage says 2,200+ sends a month per Entra domain, the pricing page says 6,000+
- ✗ Tight if you want a small Outlook order, as the smallest is one domain with 25 inboxes
- ✗ Skip it if freshness matters: the footer shows 2024

Good to know

Good for

- ✓ Agencies and teams that run many cold email inboxes
- ✓ Senders who want Microsoft Entra inboxes sold per domain

Worth knowing

- ⓘ It supplies inboxes only; a separate sequencer sends the campaigns.
- ⓘ Pages disagree on capacity and price: the homepage says 2,200+ monthly sends per Entra domain and mentions $25 or $50 a month for an order, while the pricing page says 6,000+.
- ⓘ Entra is billed per domain, so the smallest order is one domain with 25 inboxes.
- ⓘ The site footer shows a 2024 copyright, so the pages may not be updated often.

Where it stands

Its grades against its category, and whether to keep it or make your own

5/81

Other cold outreach tools it is graded above

Hypertide's GPA of 1.6 is higher than 5 of the 81 other cold outreach tools we grade, and level with 12.

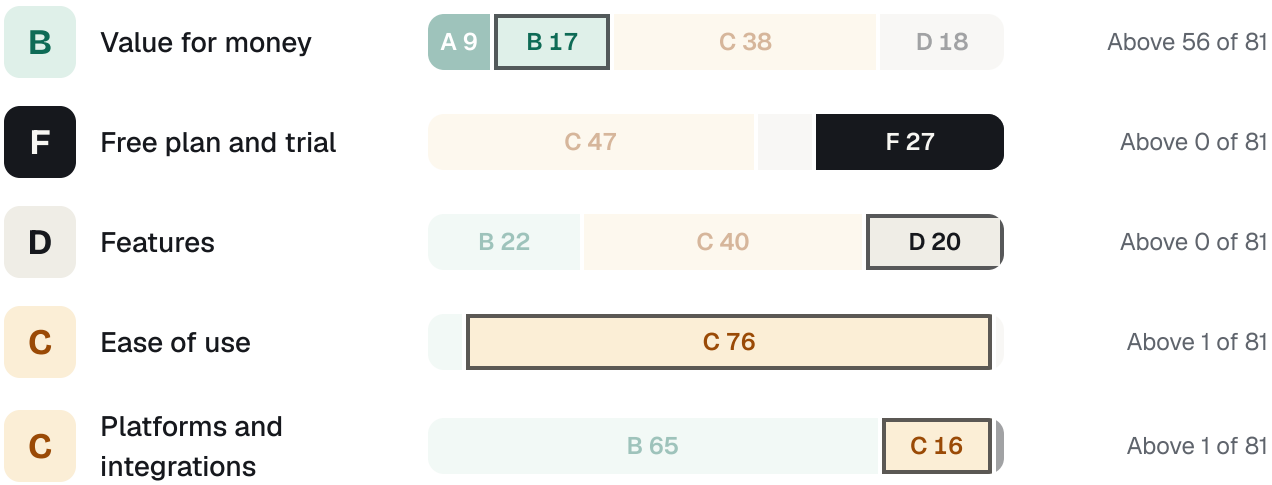

It stands best on value for money (B, above 56 of 81) and worst on free plan and trial (F, above 0).

Its paid plans start at $3.30 a month, against a middle price of $39 for the category: 3 of the 73 others that charge start lower.

On features, ease of use and platforms it scores 1.7 out of 4. 3 tools score higher and cost less.

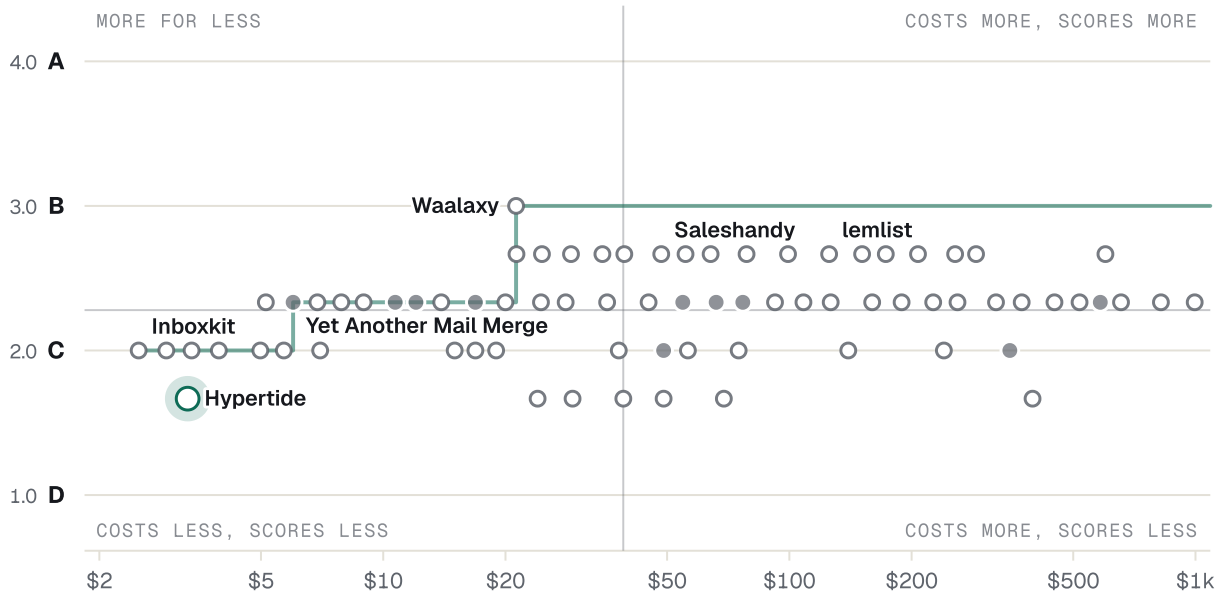

Each grade against the category

Every bar is all 82 cold outreach tools we grade, cut by the letter each got. Hypertide's own letter is outlined.

Price against what you get

Each dot is one of 74 cold outreach tools. Further left costs less; higher up scores better on features, ease of use and platforms. Hypertide is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

You could make this

What Hypertide does at its core is plain work, and that is the kind of thing an AI app builder makes well.

You would give up 2 things, listed below, and little else. It costs $39.60 a year. An AI app builder starts at about $20 a month on our listings, and you only need it while you build.

What you could make

- It runs in a browser, which is where something home-made would run too.

What you could not

- Reading the reports inbox providers send about your domain.

- ✕ It plugs into other products, Smartlead, Instantly and Bison among them, and has an API.

What this rests on. Hypertide's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
