Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 5 of the 47 other cold outreach tools we grade

Inboxkit sells Google Workspace, Microsoft 365 and Azure mailboxes set up for outreach, with DNS records configured automatically and an admin panel for each domain. It is email infrastructure that connects to sequencers rather than a sending tool. There are no plans or minimums; each mailbox is charged on its own renewal date from a prepaid wallet.

>
> **DNS is automated, but you still connect mailboxes to another tool.**
>
> From our grade for ease of use

To get you started, here are **8 things to know about Inboxkit**, taken from its own pages and our grades.

1 **Best for Google and Microsoft mailboxes for cold email**

It isn't a sending tool, there is no trial, and warmup and InfraGuard are paid add-ons with no rates shown.

2 **Paid plans start at $2.50 a month**

As its pricing page puts it: $2.50 per mailbox / month, billed yearly ($3 billed monthly).

3 **It runs on Web**

Web.

4 **Official Google and Microsoft accounts**

Mailboxes are real Google Workspace or Microsoft 365 accounts with admin panel access and 2FA for each domain.

5 **Automated DNS setup**

SPF, DKIM and DMARC records are configured for you, and an isolated panel is kept per domain.

6 **Sequencer connections**

The vendor lists 24+ integrations with sequencers such as Instantly, Smartlead and Apollo, plus a full REST API with webhooks.

7 **A 1.8 GPA, above 5 of 47**

That is against the other cold outreach tools we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

To replace Inboxkit you would be making a network of real inboxes that open and answer your emails. That is not a weekend's work, with an AI app builder or without one.

Best for Google and Microsoft mailboxes for cold email

Inboxkit sells Google Workspace, Microsoft 365 and Azure mailboxes for outreach, with DNS set up for you. Mailboxes are $2.50 each a month on yearly billing. It isn't a sending tool, there is no trial, and warmup and InfraGuard are paid add-ons with no rates shown.

TOOLGPA REPORT CARD	Inboxkit	Graded Nov 12, 2026

SUBJECT	GRADE	COMMENT
Value for money	B	$2.50 a mailbox a month on yearly billing, $3 monthly. Ten mailboxes is $25, in the cheapest quarter ($25). Domains cost extra, from $12.50 each, once.
Free plan and trial	F	No free plan and no trial. Each mailbox is charged from the first month, out of a prepaid wallet.
Features	D	It supplies mailboxes and DNS, and needs a sequencer like Instantly or Smartlead to do anything. Warmup and InfraGuard are add-ons.
Ease of use	C	No store rating on record. DNS is automated, but you still connect mailboxes to another tool.
Platforms and integrations	B	Web with an API, plus Instantly, Smartlead, Apollo, Google Workspace and Microsoft 365.

Grade point average Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Inboxkit is for

- ✓ Fits if you run a sequencer and need a lot of mailboxes fast
- ✓ Works for teams who want Google or Microsoft mailboxes, not shared SMTP

Who it is not for

- ✗ Skip it if you want a sending tool, since you still need a sequencer
- ✗ Not for you if you want a free trial, as there isn't one
- ✗ Watch out: warmup and InfraGuard are paid add-ons and their rates aren't shown
- ✗ Tight if you can't top up a prepaid wallet by card

Good to know

Good for

- ✓ Teams that want real Google or Microsoft mailboxes for outreach
- ✓ Agencies that manage many client domains
- ✓ Buyers who prefer one flat per-mailbox rate with no base fee

Worth knowing

- ⓘ Mailboxes are paid from a prepaid wallet topped up by card, with NET-30 invoicing offered only for large volumes.
- ⓘ Warmup and InfraGuard are paid add-ons; the pricing page does not give their rates.
- ⓘ There is no free trial: creating an account is free, but each mailbox is charged from the first month.
- ⓘ The page says there is no promo code; the saving comes from choosing quarterly or annual billing.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

5/47

Other cold outreach tools it is graded above

Inboxkit's GPA of 1.8 is higher than 5 of the 47 other cold outreach tools we grade, and level with 3.

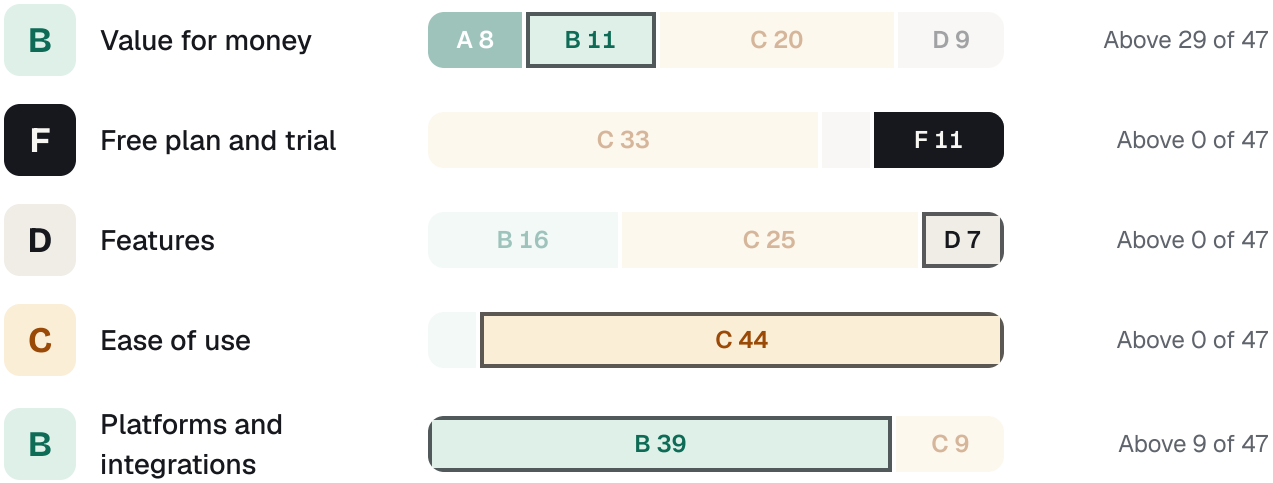

It stands best on value for money (B, above 29 of 47) and worst on free plan and trial (F, above 0).

Its paid plans start at $2.50 a month, against a middle price of $39 for the category: 0 of the 43 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4, and no tool on the category's chart scores higher without costing more.

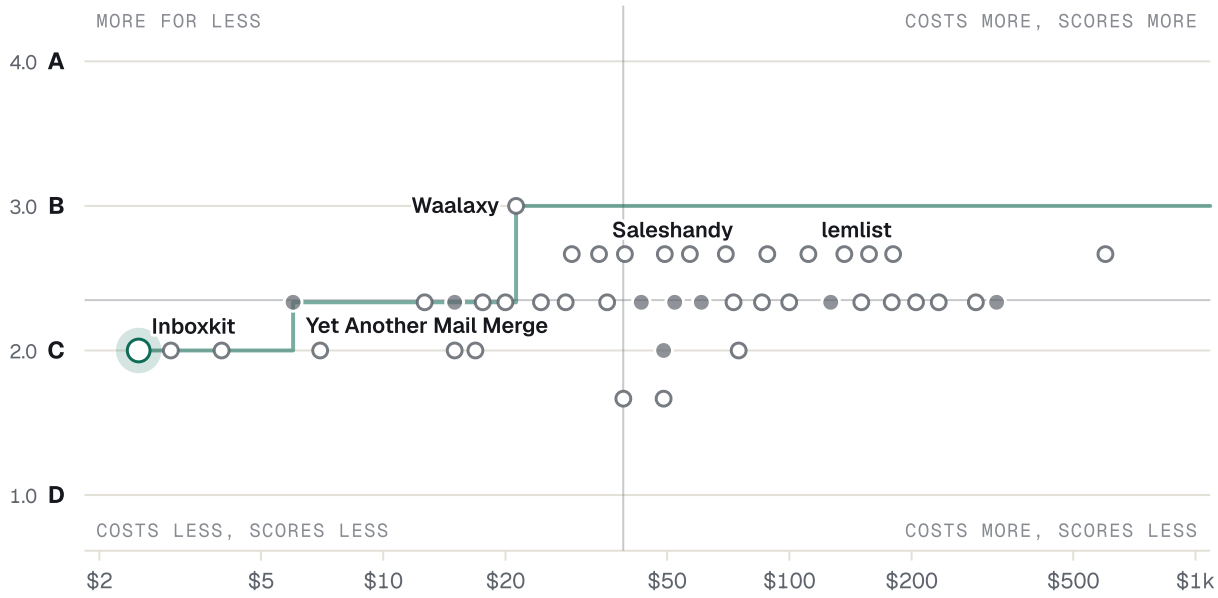

Each grade against the category

Every bar is all 48 cold outreach tools we grade, cut by the letter each got. Inboxkit's own letter is outlined.

Price against what you get

Each dot is one of 44 cold outreach tools. Further left costs less; higher up scores better on features, ease of use and platforms. Inboxkit is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Inboxkit you would be making a network of real inboxes that open and answer your emails. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 39 of the 47 other cold outreach tools grade higher. It costs $30 a year.

What you could not

- ✕ A network of real inboxes that open and answer your emails.
- ✕ Reading the reports inbox providers send about your domain.

- ✕ It plugs into other products, Instantly, Smartlead and Apollo among them, and has an API.

What this rests on. Inboxkit's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
