07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Infisical's own pages, its app-store listings and our grades. Every fact in it is on Infisical's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 2 of the 49 other password managers we grade

Infisical is a platform for managing application secrets, certificates and privileged access, built for developers and infrastructure teams. Secrets are organized by project and environment, synced to deployment tools, and covered by access controls and audit logs. The cloud plans are priced per human or machine identity.

To get you started, here are **9 things to know about Infisical**, taken from its own pages and our grades.

> "
>
> **You set up projects, environments and syncs, with a command line in the mix.**
>
> From our grade for ease of use

1 **Best for developer teams replacing .env files**

Infisical keeps secrets by environment and syncs them to cloud and CI.

2 **Paid plans start at $20 a month for each person**

As its pricing page puts it: $20 per identity / month, billed annually ($23 billed monthly).

3 **There is a free plan**

Up to 5 identities, unlimited projects, 3 environments, 10 secret syncs, secret sharing and 2FA.

4 **It runs on 4 platforms**

Web, macOS, Windows and Linux.

5 **Secrets by environment**

Secrets live in projects with folders and environments; Free allows 3 environments, Pro 6 per project and Advanced 12.

6 **Secret syncs and integrations**

Pushes secrets to GitHub, Vercel, AWS and Kubernetes, with 100+ integrations listed; syncs are capped at 10, 25 or 50 by plan.

7 **Rotation and dynamic secrets**

Rotates credentials on a schedule from Pro, and issues short-lived on-demand secrets from Advanced.

8 **A 2.0 GPA, above 2 of 49**

That is against the other password managers we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Infisical you would be making a password vault, the last thing anyone should make for themselves. That is not a weekend's work, with an AI app builder or without one.

Infisical at a glance

PRICING Free plan, from $20 per identity / month, billed annually ($23 billed monthly)	FREE PLAN Yes
FREE TRIAL 14-day free trial on Pro and Advanced	RUNS ON Web, macOS, Windows, Linux
MADE BY Infisical	CATEGORY Password Managers
OUR GRADE 2.0 GPA, fair	

The report card

Best for developer teams replacing .env files

Infisical keeps secrets by environment and syncs them to cloud and CI. Pricing counts every person and every machine as an identity, so a team with pipelines pays fast, and the features teams ask about next sit on the dearer plans.

TOOLGPA REPORT CARD	Infisical	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	D	Pro is $20 per identity a month billed yearly, against $5 where the category's dearest tenth begins, and machines count as identities. The free plan is the cheap way in.
Free plan and trial	C	Free covers 5 identities, 3 environments and 10 secret syncs, and there is a 14-day trial of Pro and Advanced. You will hit those caps with a small team.
Features	C	Environments, syncs, rotation, access control and certificates. Dynamic secrets, custom roles and SOC 2 start at Advanced; SCIM, LDAP and approvals need Enterprise.
Ease of use	C	You set up projects, environments and syncs, with a command line in the mix. No store rating on record.
Platforms and integrations	B	Web, Mac, Windows and Linux, with GitHub, Vercel, AWS, Kubernetes, Terraform and more. No phone apps are listed.
Grade point average		Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Infisical is for

- ✓ Fits if you are a developer team moving off shared .env files
- ✓ Makes sense if you sync secrets to CI and cloud services

Who it is not for

- ✕ Pricey if you have many pipelines, since every machine identity is billed like a person
- ✕ Tight if you outgrow 5 identities, 3 environments or 10 syncs on the free plan
- ✕ Watch out: dynamic secrets and custom roles start at Advanced, $40 per identity
- ✕ Watch out: SCIM, LDAP, approvals and self-hosting sit under Enterprise, quoted by sales
- ✕ Skip it if you want phone apps, as none are listed

Good to know

Good for

- ✓ Developer teams replacing .env files and shared secrets in chat
- ✓ Platform teams that sync secrets to CI and cloud services
- ✓ Organizations that want a self-hosted secrets platform

Worth knowing

- ⓘ Pricing counts every human and machine identity, so CI pipelines and services add to the bill.
- ⓘ Free is limited to 5 identities, 3 environments and 10 secret syncs.
- ⓘ Dynamic secrets, custom roles and SOC 2 Type II start at Advanced; SCIM, LDAP and approvals need Enterprise.
- ⓘ Self-hosting is listed under Enterprise, with pricing quoted by sales.

PART 02 · PRICING

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$20

A month to start, for each person.
There is a free plan too

Infisical has a free plan. Paid plans start at $20 per identity / month, billed annually ($23 billed monthly).

> **You will hit those caps with a small team.**
>
> From our grade for free plan and trial

FREE

$0

Up to 5 identities with unlimited projects, 100+ integrations, secret sharing, secret references and 2FA.

PRO

$20

per identity / month, billed annually ($23 billed monthly)

Adds access controls, secret rotation, SAML SSO, secret versioning, point-in-time recovery and 30-day audit logs.

ADVANCED

$40

per identity / month, billed annually ($46 billed monthly)

Adds dynamic secrets, custom roles, SSO and MFA enforcement, SOC 2 Type II and 90-day audit logs.

ENTERPRISE

Custom

Adds approval workflows, LDAP, SCIM, a 99.99% SLA, SIEM log streaming, and self-hosting or dedicated infrastructure.

The free plan

Up to 5 identities, unlimited projects, 3 environments, 10 secret syncs, secret sharing and 2FA.

PART 03 · FEATURES

What it does

Its main features, where it runs, what it works with and who makes it

4

Places it runs: Web, macOS, Windows and Linux

Secrets, certificate and privileged access platform for developers. Here is what it does, as its own site describes it, and what it covers: open source, self-hostable, public API, password manager, reports.

> **Environments, syncs, rotation, access control and certificates.**

From our grade for features

Secrets by environment

Secrets live in projects with folders and environments; Free allows 3 environments, Pro 6 per project and Advanced 12.

Secret syncs and integrations

Pushes secrets to GitHub, Vercel, AWS and Kubernetes, with 100+ integrations listed; syncs are capped at 10, 25 or 50 by plan.

Rotation and dynamic secrets

Rotates credentials on a schedule from Pro, and issues short-lived on-demand secrets from Advanced.

Access control and SSO

Role-based permissions from Pro, SAML single sign-on from Pro, custom roles and SSO enforcement from Advanced.

Certificates and privileged access

Separate products cover private certificate authorities and session-recorded privileged access; each has its own plans on the pricing page.

Secret sharing

Share a secret by an expiring link limited by time or views instead of pasting it into chat or email.

Where it runs

Web · macOS · Windows · Linux

What it works with

GitHub · Vercel · AWS · Kubernetes · Docker · Terraform · GitLab · CircleCI

Infisical is made by Infisical.

Where it stands

Its grades against its category, and whether to keep it or make your own

2/49

Other password managers it is graded above

Infisical's GPA of 2.0 is higher than 2 of the 49 other password managers we grade, and level with 6.

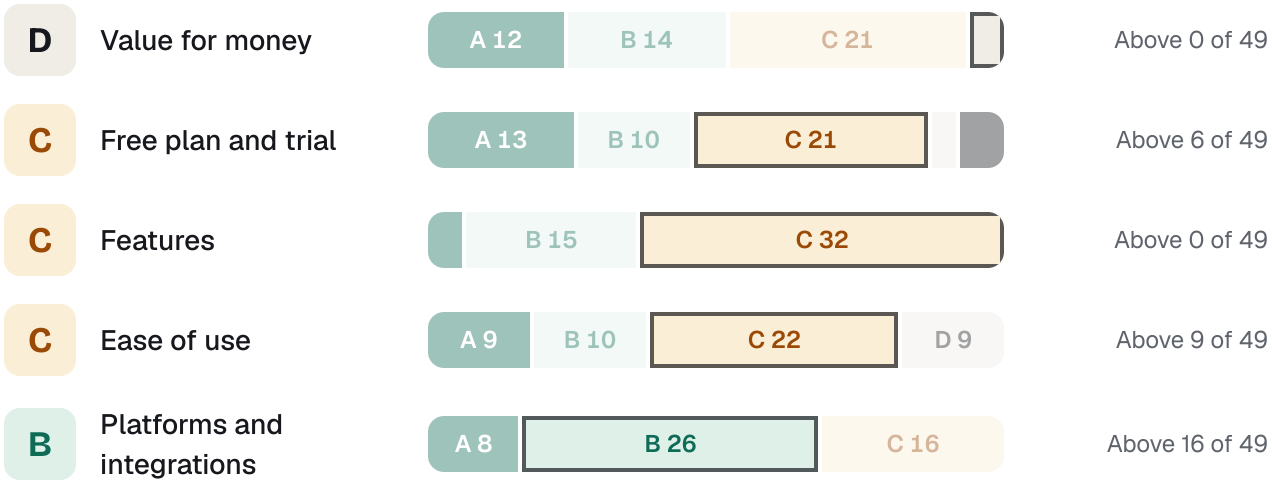

It stands best on platforms and integrations (B, above 16 of 49) and worst on value for money (D, above 0).

Its paid plans start at $20 a month for each person, against a middle price of $2.50 for the category: 29 of the 29 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 21 tools score higher and cost less.

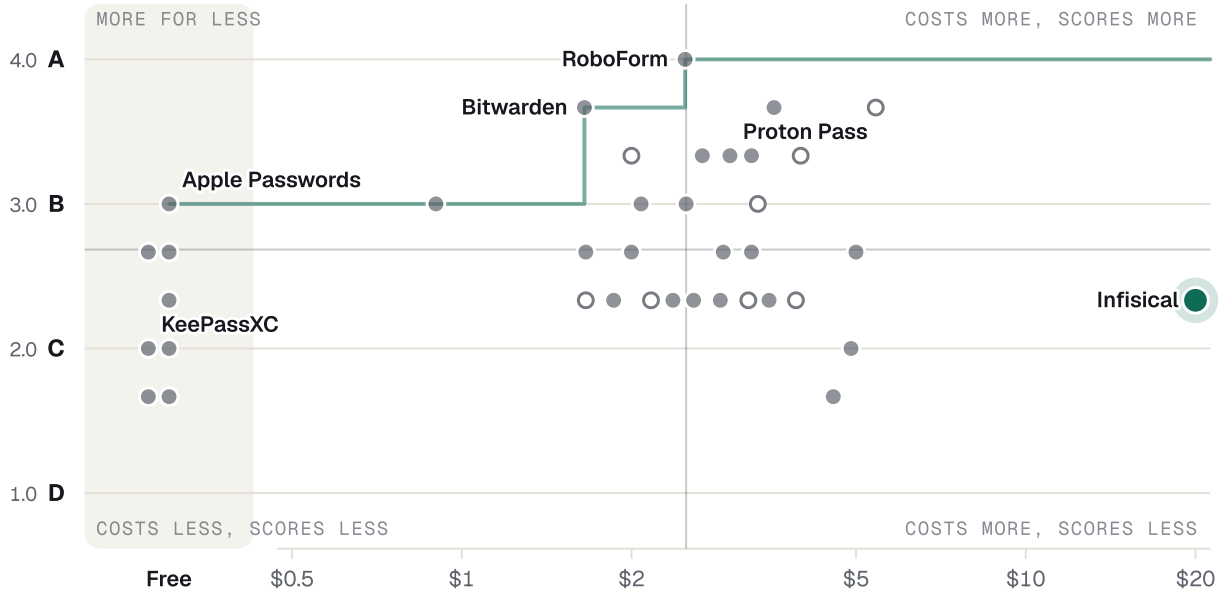

Each grade against the category

Every bar is all 50 password managers we grade, cut by the letter each got. Infisical's own letter is outlined.

Price against what you get

Each dot is one of 38 password managers. Further left costs less; higher up scores better on features, ease of use and platforms. Infisical is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Infisical you would be making a password vault, the last thing anyone should make for themselves. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 41 of the 49 other password managers grade higher. It costs $240 a year. Infisical is open source, so there is a third way: take its code and run it yourself.

What you could make

- Reports: an app builder makes this well.

What you could not

- A password vault, the last thing anyone should make for themselves.
- Apps for macOS, Windows and Linux that stay in step with each other.
- It is priced for each person, which means accounts and billing for a team.
- It plugs into other products, GitHub, Vercel and AWS among them, and has an API.
- What a company asks for before it lets staff use something: single sign-on, audit logs and roles and permissions.

What this rests on. Infisical's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

HashiCorp Vault, Akeyless, Passbolt, Psono and Delinea Secret Server

The 5 tools Infisical is most often weighed against, with where each one differs from it.

2.0 GPA

HashiCorp Vault

Paid

Secrets and encryption management for infrastructure teams.

- Infisical has a free plan. HashiCorp Vault does not.
- Infisical is open source, according to its own site.
- Infisical also covers reports.

Infisical and HashiCorp Vault compared in full

2.2 GPA

Akeyless

Free plan

Workforce password manager inside a secrets platform.

- Only Infisical lists macOS, Windows and Linux apps.
- Only Akeyless lists a browser extension.
- Infisical is open source and self-hostable, according to its own site.

Infisical and Akeyless compared in full

2.2
GPA

Passbolt

Free plan · from $4.90/mo

Open-source password manager for teams, self-hosted or cloud.

- Only Infisical lists macOS and Linux apps.
- Only Passbolt lists iOS and Android apps.
- Only Passbolt lists a browser extension.

Infisical and Passbolt compared in full

2.6
GPA

Psono

Free plan · from $3/mo

Open-source password manager that a company runs on its own servers.

- Only Psono lists iOS and Android apps.
- Only Psono lists a browser extension.
- Infisical also covers reports.

Infisical and Psono compared in full

2.0
GPA

Delinea Secret Server

Free trial

Enterprise vault for privileged accounts and secrets.

- Infisical has a free plan. Delinea Secret Server does not, though it has a free trial.
- Only Infisical lists macOS, Windows and Linux apps.
- Infisical is open source and self-hostable, according to its own site.

Infisical and Delinea Secret Server compared in full

Quick answers

The questions people ask about it, each answered in a line or two

15

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Infisical free?

Infisical has a free plan. Up to 5 identities, unlimited projects, 3 environments, 10 secret syncs, secret sharing and 2FA.

How much does Infisical cost?

Infisical lists 4 plans. Free: $0.

What platforms does Infisical work on?

Infisical is available on Web, macOS, Windows and Linux.

Does Infisical offer any discounts?

Infisical publicly lists the following: Save 13% with annual billing.

Does Infisical have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. Infisical is listed for Web, macOS, Windows and Linux.

Does Infisical have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. Infisical is listed for Web, macOS, Windows and Linux.

Is Infisical open source?

Yes. Infisical is open source, according to its own site.

Does Infisical have an API?

Yes. Infisical offers a public API, according to its own site.

What does Infisical integrate with?

Infisical's listing names GitHub, Vercel, AWS, Kubernetes, Docker, Terraform, GitLab and CircleCI.

Does Infisical have a free trial?

Yes. 14-day free trial on Pro and Advanced.

Who makes Infisical?

Infisical is made by a company of the same name.

What are the alternatives to Infisical?

The closest alternatives to Infisical in our directory are HashiCorp Vault, Akeyless, Passbolt, Psono and Delinea Secret Server.

How does Infisical compare with other password managers?

Infisical's GPA of 2.0 is higher than 2 of the 49 other password managers we grade, and level with 6.

Is Infisical good value for money?

ToolGPA grades Infisical D for value for money. Its paid plans start at $20 a month for each person, against a middle price of $2.50 for the category: 29 of the 29 others that charge start lower.

Could I make my own version of Infisical?

To replace Infisical you would be making a password vault, the last thing anyone should make for themselves.

Where this guide comes from

The prices, plans, platforms and features were read from Infisical's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Infisical's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Infisical. Prices change, so check infisical.com before you buy.
