Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 8 of the 98 other whiteboard and mind map tools we grade

InfraNodus converts text, files and search results into a network graph, then reads the graph for topic clusters, main ideas and gaps between topics. It sits closer to a text-analysis and research tool than a drawing board. AI summaries, an API and an MCP server are included on paid plans.

> **You have to learn how to read a text network.**
>
> From our grade for ease of use

To get you started, here are **9 things to know about InfraNodus**, taken from its own pages and our grades.

1 **Best for turning text into a network graph to find gaps**

InfraNodus turns text into a network graph and uses AI to summarise it and point at gaps in the ideas.

2 **Paid plans start at about $13.41 a month**

As its pricing page puts it: €12 per month, billed annually (€19 billed monthly).

3 **There is a free plan**

Free account with limited text and graph analytics, 3 graphs in total, 20 AI credits per hour and 3 AI chats.

4 **It runs on Web**

Web, with a browser extension too.

5 **Text-to-network graphs**

Paste text or upload files and words become nodes in a graph, grouped into topical clusters that you can filter and explore.

6 **Content gap analysis**

The analytics panel points out topics that are weakly connected in your text and suggests questions to bridge them.

7 **AI summaries and chat**

AI tools summarize the visible statements or the essential ones, and generate ideas that link disconnected topics. Limits depend on the plan.

8 **A 2.0 GPA, above 8 of 98**

That is against the other whiteboard and mind map tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace InfraNodus you would be making a library of papers and sources to search. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for turning text into a network graph to find gaps

InfraNodus turns text into a network graph and uses AI to summarise it and point at gaps in the ideas. It is an analysis tool, not a board, and Basic at €12 a month is for personal and academic use only, so work use starts at €32.

TOOLGPA REPORT CARD	InfraNodus	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	D	Basic is €12 a month billed annually and covers personal and academic use only. Commercial use starts at Advanced, €32 a month, well above the $8.25 middle.
Free plan and trial	C	Free account keeps 3 graphs in total, with limited analytics, 20 AI credits an hour and 3 AI chats. Every paid plan has a 14-day trial.
Features	C	Text-to-graph, content gap analysis, AI chat, imports and exports. The listing says it analyses text and offers no freehand canvas or sticky notes.
Ease of use	C	No store rating on record. You have to learn how to read a text network.
Platforms and integrations	B	Web and a browser extension, with Obsidian, Chrome, Firefox, Gephi, n8n and Claude. No desktop or phone app.
Grade point average		Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who InfraNodus is for

- ✓ Fits if you want to find themes and gaps in a pile of notes or interviews
- ✓ Works for researchers who keep notes in Obsidian

Who it is not for

- ✗ Skip it if you want a whiteboard: there is no freehand canvas or sticky notes
- ✗ Tight if you stay free: 3 graphs in total
- ✗ Pricey if you use it for work: commercial use needs Advanced at €32 a month
- ✗ Watch out: prices are in euros and exclude VAT for private EU customers

Good to know

Good for

- ✓ Researchers and analysts mapping themes in interviews, reviews or articles
- ✓ SEO and content teams looking for topic gaps
- ✓ Obsidian users who want a graph view of their notes

Worth knowing

- ⓘ It analyzes text rather than offering a freehand canvas or sticky notes, so it is not a drop-in board.
- ⓘ The free account is capped at 3 graphs in total and limited analytics.
- ⓘ Prices are shown in euros and exclude VAT for private EU customers.
- ⓘ The Basic plan is for personal and academic use; commercial use starts at Advanced.

From our grade for features

Text-to-network graphs

Paste text or upload files and words become nodes in a graph, grouped into topical clusters that you can filter and explore.

Content gap analysis

The analytics panel points out topics that are weakly connected in your text and suggests questions to bridge them.

AI summaries and chat

AI tools summarize the visible statements or the essential ones, and generate ideas that link disconnected topics. Limits depend on the plan.

Data imports

Pull in Google, YouTube and Amazon review results, RSS feeds and uploaded TXT, MD, JSON, CSV and PDF files. Quotas rise with each plan.

Exports

Export graph images as PNG or SVG, statements as CSV or Markdown, and graph data as JSON, CSV or Gexf for Gephi.

Extension, plugin and MCP server

A Chrome and Firefox extension and an Obsidian graph view plugin come with paid plans; an MCP server connects graphs to AI tools.

InfraNodus is made by Nodus Labs, and has been around since 2018.

Where it stands

Its grades against its category, and whether to keep it or make your own

8/98

Other whiteboard and mind map tools it is graded above

InfraNodus's GPA of 2.0 is higher than 8 of the 98 other whiteboard and mind map tools we grade, and level with 14.

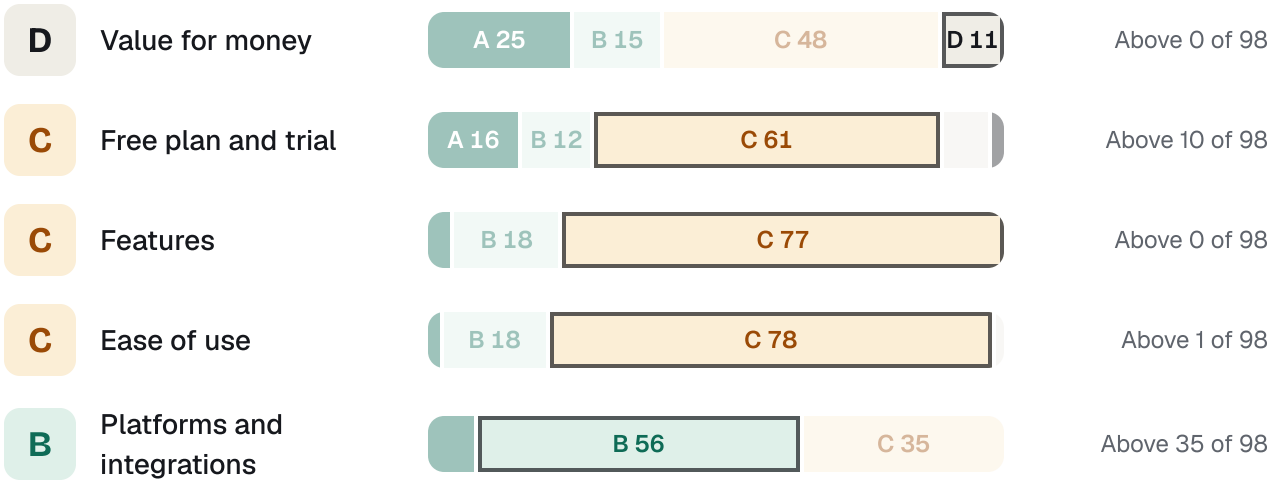

It stands best on platforms and integrations (B, above 35 of 98) and worst on value for money (D, above 0).

Its paid plans start at about $13.41 a month, against a middle price of $8 for the category: 55 of the 69 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 26 tools score higher and cost less.

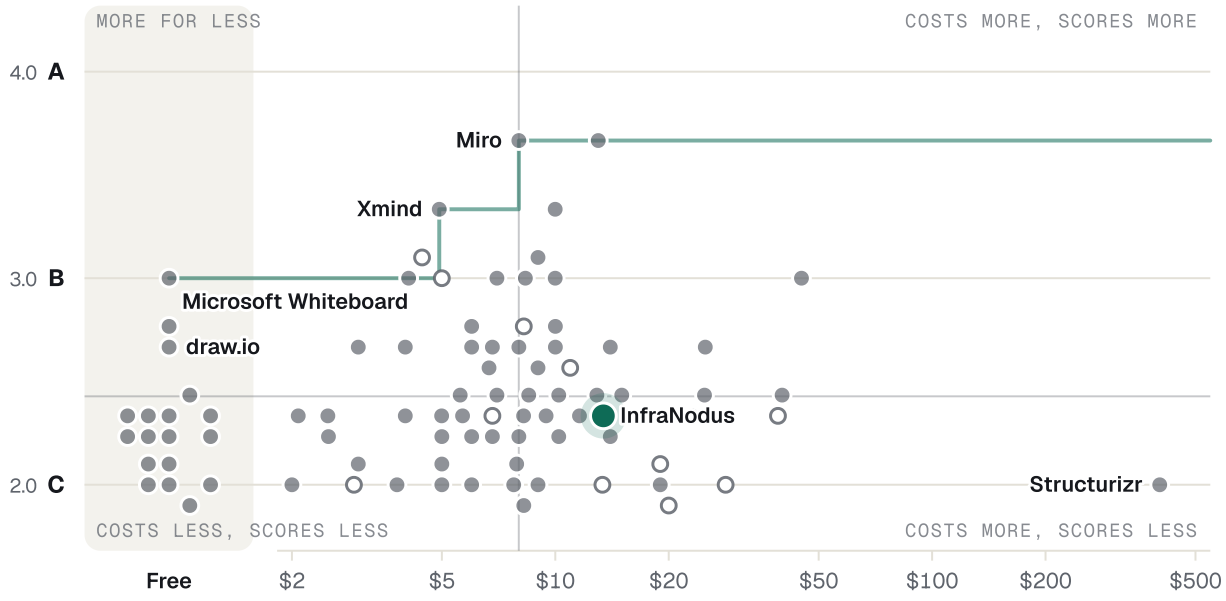

Each grade against the category

Every bar is all 99 whiteboard and mind map tools we grade, cut by the letter each got. InfraNodus's own letter is outlined.

Price against what you get

Each dot is one of 88 whiteboard and mind map tools. Further left costs less; higher up scores better on features, ease of use and platforms. InfraNodus is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace InfraNodus you would be making a library of papers and sources to search. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 76 of the 98 other whiteboard and mind map tools grade higher. It costs $160.88 a year.

What you could make

- Mind mapping: an app builder makes this well.

What you could not

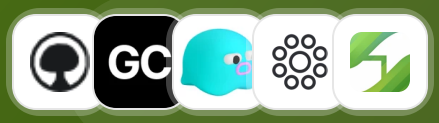

- A library of papers and sources to search.

- It plugs into other products, Obsidian, Chrome and Firefox among them, and has an API.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. InfraNodus's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
