Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 8 of the 98 other course and community platforms we grade

Intellum is an enterprise learning platform that runs education for customers, partners and employees from one instance, each audience with its own catalog, sign-on and rules. It includes an LMS, built-in AI agents for learners, course creators and managers, and a browser-based course authoring tool called Evolve. The site publishes no prices and asks visitors to request a demo.

To get you started, here are **7 things to know about Intellum**, taken from its own pages and our grades.

1 **Best for enterprise learning for customers, partners and staff**

No pricing is published and every route goes through a demo.

2 **It runs on Web**

Web.

3 **One instance, many audiences**

Customers, partners and employees each get their own catalog, sign-on, access rules and administrators, run from a single platform.

4 **Creator Agent**

Given a goal, an audience and up to ten PDF or video files, it drafts learning objectives, a lesson plan, pages and assessment questions for a team to revise.

5 **Learner Agent**

Learners ask in their own words and are pointed to courses they can access; answers stay within each person's approved content.

6 **A 1.8 GPA, above 8 of 98**

That is against the other course and community platforms we grade, on value, the free plan, features, ease of use and platforms.

7 **Your call**

You could make the core of Intellum for yourself: online courses and reports.

The report card

Best for enterprise learning for customers, partners and staff

Intellum is an enterprise learning platform that runs customers, partners and staff in one instance, with AI agents for creators, learners and managers. No

pricing is published and every route goes through a demo. The pages describe large programs and mention no small-team plan.

TOOLGPA REPORT CARD	Intellum	Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published; Intellum quotes each platform individually, so there is no number to compare against the category's $37 middle.
Free plan and trial	F	No free plan or trial is listed, only a demo request.
Features	C	One instance for many audiences, AI agents, an authoring studio, SCORM and LTI. The listing says access rules must be configured per audience.
Ease of use	C	No store rating on record, and an enterprise instance needs configuring per audience.
Platforms and integrations	B	Web, with SCORM, LTI and AI connections such as Claude, Gemini and Copilot. No phone or desktop apps are listed.

Grade point average — Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Intellum is for

- ✓ Fits if you run large learning programs for customers, partners and staff
- ✓ Works for enterprises that want AI connectors on top of their LMS

Who it is not for

- ✕ Not for you if you want a price, as none is published and the site directs you to request a demo
- ✕ Too light on small-team options, as the pages describe only enterprise programs
- ✕ Skip it if you want to try first, since no free plan or trial is listed
- ✕ Watch out: every audience shares one instance, so access rules need setting per audience

Good to know

Good for

- ✓ Large companies educating customers, partners and staff together
- ✓ Programs that need audit-ready certification records
- ✓ Teams that want AI help for building and managing courses

Worth knowing

- ⓘ No pricing is published; the site directs visitors to request a demo.
- ⓘ Built for enterprise programs, with named customers such as Meta, Google and Stripe; the pages do not describe a small-team plan.
- ⓘ Each audience runs inside one shared instance rather than separate accounts, so access rules need configuring per audience.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Intellum's current pricing could not be confirmed from its own site.

> **No free plan or trial is listed, only a demo request.**

From our grade for features

One instance, many audiences

Customers, partners and employees each get their own catalog, sign-on, access rules and administrators, run from a single platform.

Creator Agent

Given a goal, an audience and up to ten PDF or video files, it drafts learning objectives, a lesson plan, pages and assessment questions for a team to revise.

Learner Agent

Learners ask in their own words and are pointed to courses they can access; answers stay within each person's approved content.

Manager Agent and MCP connectors

Admins can ask who is overdue or who registered, in Intellum or from Claude, Gemini or Copilot, and approve the change before it applies.

Evolve course studio

A browser-based studio for building interactive courses and publishing them to the LMS with no export step.

Standards and integrations

SCORM and LTI content, single sign-on, a data API for BI tools, and syncing of learning records with CRM and customer tools.

Where it stands

Its grades against its category, and whether to keep it or make your own

8/98

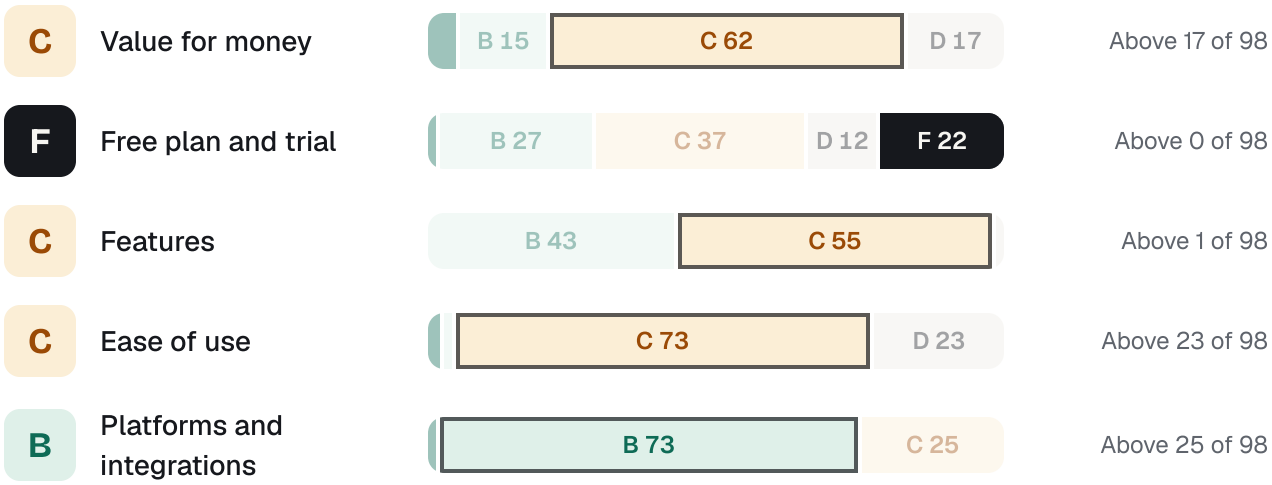

Other course and community platforms it is graded above

Intellum's GPA of 1.8 is higher than 8 of the 98 other course and community platforms we grade, and level with 14.

It stands best on platforms and integrations (B, above 25 of 98) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 99 course and community platforms we grade, cut by the letter each got. Intellum's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Your call

You could make the core of Intellum for yourself: online courses and reports.

What you would give up is listed below. Whether that is worth the price is your call.

What you could make

- Online courses and reports: an app builder makes these well.
- It runs in a browser, which is where something home-made would run too.

What you could not

- It plugs into other products, SCORM, LTI and Claude among them, and has an API.
- AI features, unless you pay a model provider for each request yourself.
- What a company asks for before it lets staff use something: single sign-on.

What this rests on. Intellum's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
