Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 43 of the 127 other accounting and invoicing tools we grade

Invoicera is invoicing and billing software for teams with more than a simple send-an-invoice workflow. It covers recurring, project, time and usage-based billing, outgoing approvals, collections and payment matching. Plans are priced per organisation, with limits on entities, invoices a year and users, and it works beside QuickBooks or Xero instead of replacing the ledger.

To get you started, here are **9 things to know about Invoicera**, taken from its own pages and our grades.

> **No store rating on record, and there are approval rules, entities and accounting connections to set up.**
>
> From our grade for ease of use

1 **Best for companies that bill by project, time or contract**

Invoicera covers recurring, project, time and usage-based billing with approvals and collections, alongside QuickBooks or Xero.

2 **Paid plans start at $50 a month**

As its pricing page puts it: $50 per month, billed annually ($600 a year), per organization.

3 **You can try it first**

7-day free trial of Grow, no card required; trial invoices are watermarked

4 **It runs on 3 platforms**

Web, iOS and Android.

5 **Recurring and contract billing**

Schedules, retainers and agreed terms produce invoices automatically; recurring invoices start on Operate.

6 **Project, time and usage billing**

Approved hours, milestones and entered or imported usage quantities turn into invoices; project and time billing starts at Grow.

7 **Approval workflows**

Outgoing invoices can be reviewed before clients see them: single-step on Operate, multi-step from Grow.

8 **A 2.2 GPA, above 43 of 127**

That is against the other accounting and invoicing tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

The plain part of Invoicera you could make: invoicing, reports and time tracking. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

The report card

Best for companies that bill by project, time or contract

Invoicera covers recurring, project, time and usage-based billing with approvals and collections, alongside QuickBooks or Xero. But it is a billing layer, not a ledger, plans start at $50 a month per organisation, and add-ons are billed on top.

TOOLGPA REPORT CARD — **Invoicera** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	$50 a month on yearly billing covers 5 users, which is $10 a head for a team of five. One person still pays $50, and monthly billing is about 20% more.
Free plan and trial	C	A 7-day free trial with no card, with watermarked invoices. There is no free plan.

SUBJECT	GRADE	COMMENT
Features	C	Recurring, project, time and usage billing, approvals, collections and multi-entity control. It does billing fully but isn't a ledger: the vendor says QuickBooks or Xero keeps the books.
Ease of use	C	No store rating on record, and there are approval rules, entities and accounting connections to set up.
Platforms and integrations	B	Web plus iOS and Android apps, with QuickBooks and Xero.
Grade point average		Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Invoicera is for

- ✓ Fits if you bill by the project, time or contract, with approvals before invoices go out
- ✓ Makes sense if you already keep books in QuickBooks or Xero

Who it is not for

- ✗ Skip it if you want it to replace your accounting software: it is a billing layer
- ✗ Pricey if you are one person, since the entry price is $50 a month
- ✗ Watch out: add-ons cost extra, a 5-user pack is $20 a month and an extra entity $30
- ✗ Watch out: GST and e-invoicing features are for India-registered entities, and India has its own rupee price list
- ✗ Tight if you pay monthly, at roughly 20% above the yearly rate

Good to know

Good for

- ✓ Agencies and consultancies billing by project, time or retainer
- ✓ Finance teams running several legal entities
- ✓ Companies keeping QuickBooks or Xero as the ledger

Worth knowing

- ⓘ It is a billing layer, not a replacement ledger: the vendor says QuickBooks or Xero can stay responsible for the books.
- ⓘ Monthly billing is available at roughly 20% above the annual rate, and the page does not state the monthly figures.
- ⓘ Add-ons are billed annually: 5-user pack $20 a month, extra entity $30, priority support $50 (Operate, Grow), integration pack $75.
- ⓘ India accounts use a separate rupee price list plus 18% GST; GST and e-invoicing features are for India-registered entities.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

43/127

Other accounting and invoicing tools it is graded above

Invoicera's GPA of 2.2 is higher than 43 of the 127 other accounting and invoicing tools we grade, and level with 30.

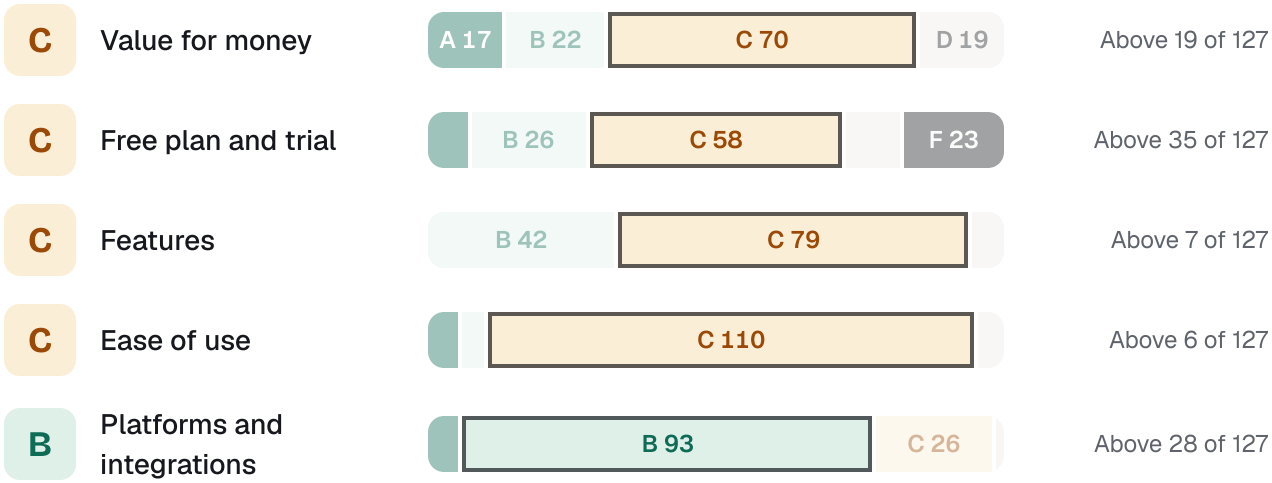

It stands best on platforms and integrations (B, above 28 of 127) and worst on ease of use (C, above 6).

Its paid plans start at $50 a month, against a middle price of $18.09 for the category: 73 of the 90 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 27 tools score higher and cost less.

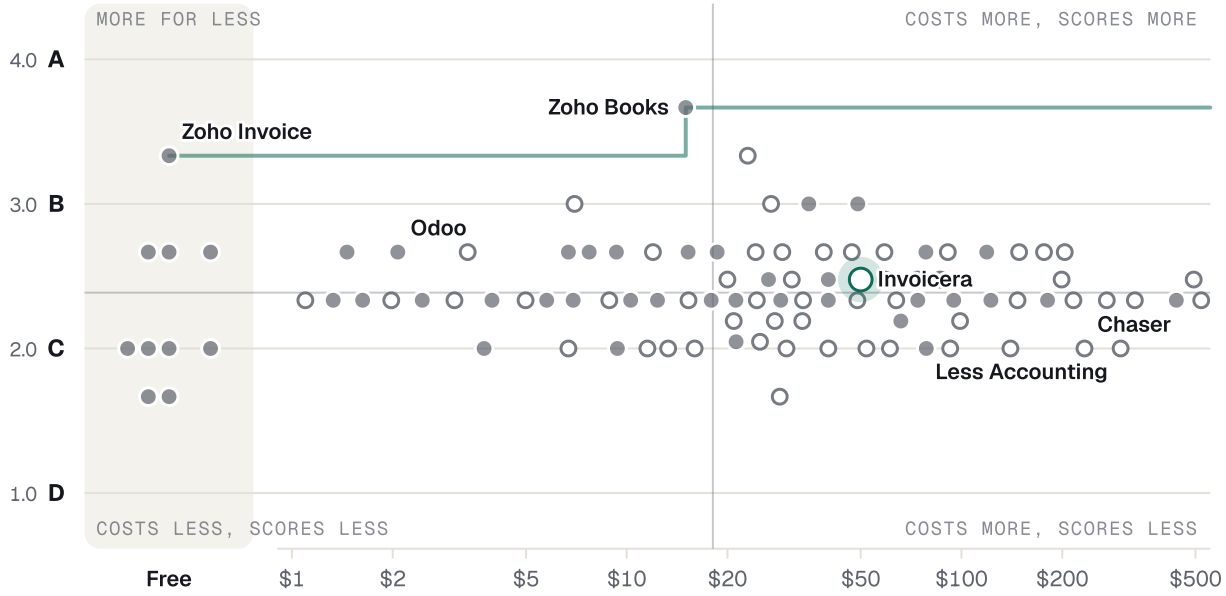

Each grade against the category

Every bar is all 128 accounting and invoicing tools we grade, cut by the letter each got. Invoicera's own letter is outlined.

Price against what you get

Each dot is one of 101 accounting and invoicing tools. Further left costs less; higher up scores better on features, ease of use and platforms. Invoicera is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Invoicera you could make: invoicing, reports and time tracking. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

It costs $600 a year.

What you could make

- Invoicing, reports and time tracking: an app builder makes these well.

What you could not

- A real app for iOS and Android. Something home-made would be a web page.

- It plugs into other products, QuickBooks and Xero among them, and has an API.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. Invoicera's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
