Welcome

What it is, who it suits, its grades and the ten things to know first

2.4

GPA, above 123 of the 178 other AI agents we grade

Jenova is an AI platform that the site now describes as a world engine, with hundreds of ready-made AIs for roleplay games, characters, creative writing and art studios, everyday advice, language learning and work. It keeps long-term memory of characters and storylines, and paid plans let users switch between models from several providers and create their own AIs. A separate Jenova Agent API lets developers run configured agents through one endpoint.

To get you started, here are **9 things to know about Jenova AI**, taken from its own pages and our grades.

> **Usage limits are given only as multiples of an unstated free allowance, and the site now reads as a roleplay product.**
>
> From our report card of Jenova AI

1 **Best for chat AIs for roleplay and writing**

Jenova is a chat platform of ready-made AIs for roleplay, writing and advice, with paid plans that add model switching and your own AIs.

2 **Paid plans start at $20 a month**

As its pricing page puts it: $20 per month (Plus).

3 **There is a free plan**

A free tier with core features and limited monthly usage.

4 **It runs on 3 platforms**

Web, iOS and Android.

5 **World Engine memory**

Tracks characters, relationships, decisions and storylines after every turn and retrieves context from weeks or months earlier.

6 **Hundreds of AIs**

Ready-made AIs for roleplay games, companions, relationship and financial advice, language practice and work tasks.

7 **Creative studios**

Dedicated studios for novels, fan fiction, comics, manga, webtoons, screenplays, children's books, concept art and pixel art.

8 **A 2.4 GPA, above 123 of 178**

That is against the other AI agents we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Jenova AI you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for chat AIs for roleplay and writing

Jenova is a chat platform of ready-made AIs for roleplay, writing and advice, with paid plans that add model switching and your own AIs. Usage limits are given only as multiples of an unstated free allowance, and the site now reads as a roleplay product.

TOOLGPA REPORT CARD — **Jenova AI** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	B	Plus is $20 a month, at the category's cheaper-quarter start, though the billing period is not stated. Higher tiers climb to $500.
Free plan and trial	C	A free tier with core features and limited monthly usage, but the allowance is not stated.

SUBJECT	GRADE	COMMENT
Features	C	Memory, hundreds of AIs, creative studios and model switching, which needs a paid plan. It fits the agents category less closely than before.
Ease of use	C	No rating on record. You choose among many AIs and models, and building your own takes effort.
Platforms and integrations	B	Web, iOS and Android with an Agent API, and OpenAI, Anthropic, Google, xAI and DeepSeek models.
Grade point average		Fair, out of 4.0 **2.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Jenova AI is for

- ✓ Fits if you want roleplay or creative writing with a bot that remembers the story
- ✓ Works for people who like swapping between models in one place

Who it is not for

- ✗ Tight if you stay free: the monthly allowance is not stated
- ✗ Skip it if you want a work agent, as the homepage now sells a roleplay world
- ✗ Watch out: limits are given only as multiples of the free tier, up to 1,100x on Ultra
- ✗ Watch out: the Agent API is billed separately in credits from $10, not through plans

Good to know

Good for

- ✓ Roleplay and interactive fiction fans who want long-running memory
- ✓ Writers and artists using story and comic studios
- ✓ Developers who want a managed agent endpoint billed by use

Worth knowing

- ⓘ The homepage now presents Jenova as a roleplay and creative platform, so it fits the AI agents category less closely than before.
- ⓘ Usage limits are given only as multiples of the free tier, and the free allowance itself is not stated.
- ⓘ The Agent API is billed separately as pay-as-you-go credits from $10, not through the monthly plans.
- ⓘ Model switching, custom AIs and watermark-free exports need a paid plan.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

123/178

Other AI agents it is graded above

Jenova AI's GPA of 2.4 is higher than 123 of the 178 other AI agents we grade, and level with 15.

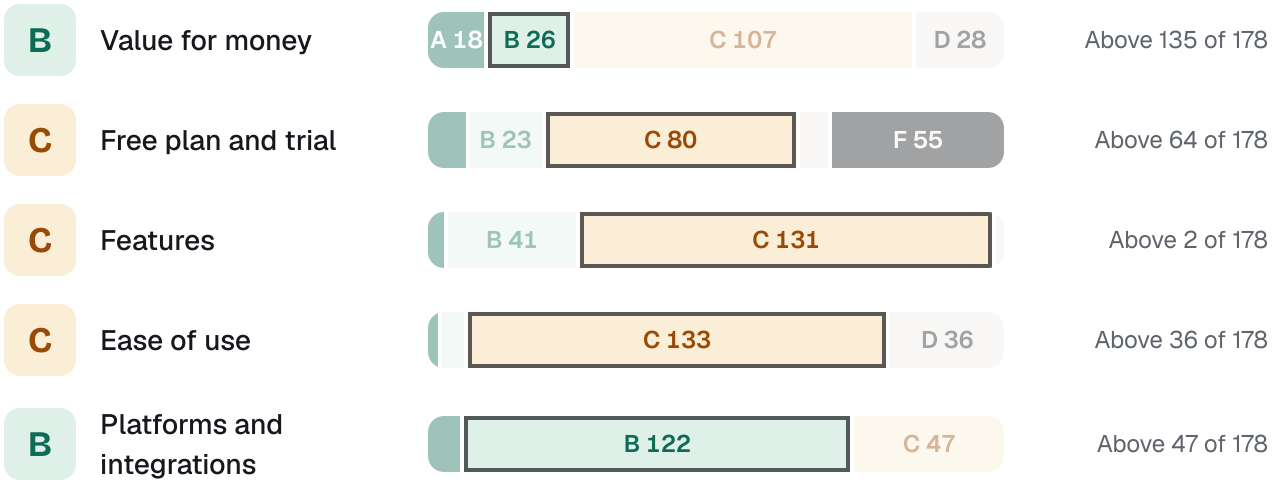

It stands best on value for money (B, above 135 of 178) and worst on features (C, above 2).

Its paid plans start at $20 a month, against a middle price of $25 for the category: 29 of the 98 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 13 tools score higher and cost less.

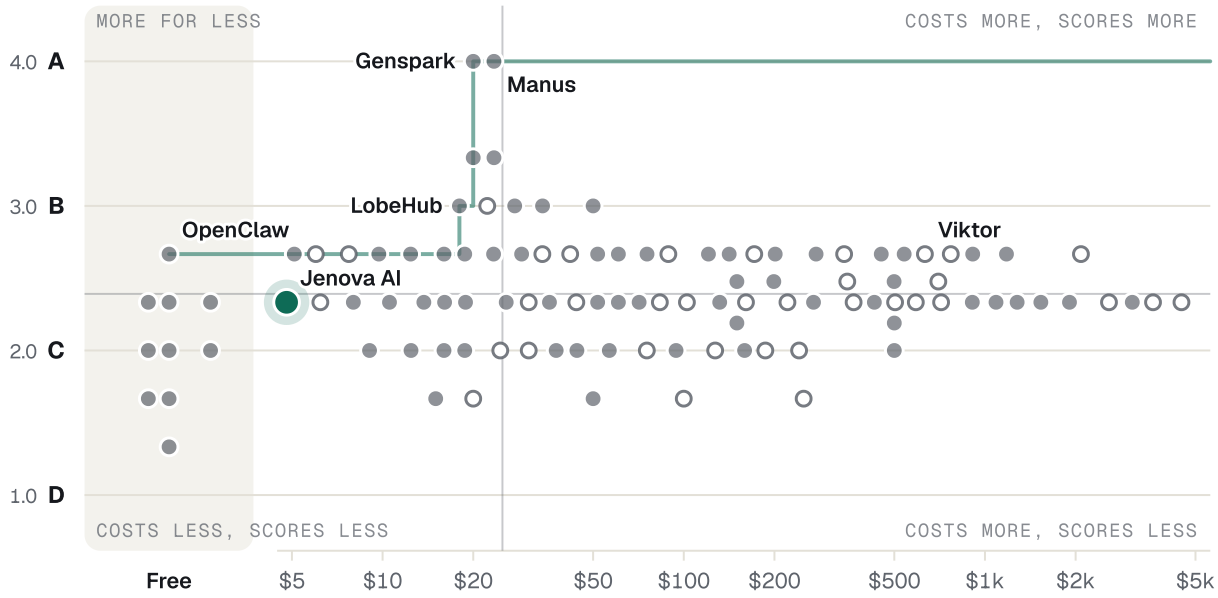

Each grade against the category

Every bar is all 179 AI agents we grade, cut by the letter each got. Jenova AI's own letter is outlined.

Price against what you get

Each dot is one of 109 AI agents. Further left costs less; higher up scores better on features, ease of use and platforms. Jenova AI is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Jenova AI you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.4 is higher than 123 of the 178 other AI agents we grade. It costs $240 a year.

What you could make

- Long-form writing: an app builder makes this well.

What you could not

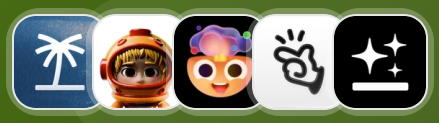

- An AI agent, with the models and the safeguards behind it.

- An AI model, which you can rent by the request but not make.
- A real app for iOS and Android. Something home-made would be a web page.
- It plugs into other products, OpenAI, Anthropic and Google among them, and has an API.

What this rests on. Jenova AI's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
