Who JetWebinar is for

- ✓ Fits if you host webinars for up to 200 people and want live and automated in one tool
- ✓ Works for teams that want webinar leads pushed into HubSpot or Salesforce

Who it is not for

- ✗ Tight if your audience is large: plans cap live attendees at 200, 500 and 2,000
- ✗ Skip it if you want evergreen webinars on the cheapest plan, as those start on Professional
- ✗ Watch out: the feature table lists breakout rooms and whiteboards without showing which plan has them
- ✗ Not for you if you want a free plan, since only a 7-day trial is offered

Good to know

Good for

- ✓ Marketing teams that want live and evergreen webinars in one tool
- ✓ Hosts whose audience fits under 200 to 2,000 live attendees
- ✓ Companies that need white-labeling and SSO on the Business plan

Worth knowing

- ⓘ Plans are capped by live attendees: 200, 500 and 2,000, with anything larger sold through sales.
- ⓘ Evergreen webinars, custom domains and paid webinars are listed under Professional, so Basic lacks them.
- ⓘ The feature table lists capabilities such as breakout rooms and whiteboards, but the page text does not show which plan includes each.
- ⓘ Annual prices are shown per month; the page advertises 20% off for annual billing.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace JetWebinar you would be making live video to hundreds of people at once. That is not a weekend's work, with an AI app builder or without one.

It costs $588 a year.

What you could make

- Surveys and reports: an app builder makes these well.

What you could not

- × Live video to hundreds of people at once.

- Email sent in volume that still reaches the inbox.
- Newsletters sent to thousands of people that still reach the inbox.
- It plugs into other products, Google Calendar, Mailchimp and HubSpot among them.

What this rests on. JetWebinar's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
