Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 56 of the 101 other HR software we grade

It lists native links to GOSI, Nitaqat, Muqeem and WPS. Plans are quoted on request, and the pricing page shows one entry offer for small firms.

To get you started, here are **7 things to know about Jisr**, taken from its own pages and our grades.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

56/101

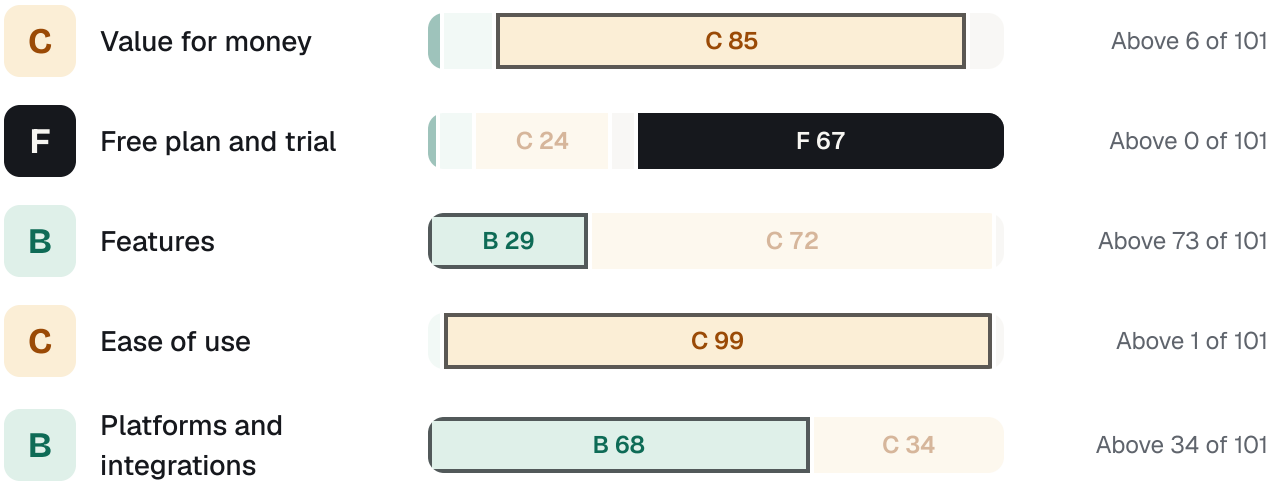

Other HR software it is graded above

Jisr's GPA of 2.0 is higher than 56 of the 101 other HR software we grade, and level with 15.

It stands best on features (B, above 73 of 101) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 102 HR software we grade, cut by the letter each got. Jisr's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Jisr you would be making payroll taxes worked out and filed with the government for you. That is not a weekend's work, with an AI app builder or without one.

What you could make

- Employee records, time off, applicant tracking, expense tracking and surveys: an app builder makes these well.

What you could not

- ✕ Payroll taxes worked out and filed with the government for you.
- ✕ A rota the whole staff sees on their phones, with swaps and alerts.
- ✕ A real app for iOS and Android. Something home-made would be a web page.
- ✕ What a company asks for before it lets staff use something: roles and permissions.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Jisr's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
