5 **Trainable copilot**

7 **A 1.6 GPA, above 2 of 45**

That is against the other resume builders we grade, on value, the free plan, features, ease of use and platforms.

To replace JobCopilot you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

Best for auto-applying to career-page jobs

JobCopilot matches you to jobs each day and applies to them on company career pages, with a tracker and AI resume, cover letter and mock interview tools. Nothing on the pricing page is free, it shows only per-day starting prices with no totals, and tailoring each application is held back for Elite.

TOOLGPA REPORT CARD — **JobCopilot** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	Premium starts at $0.93 a day and Elite at $1.05 a day, with no term totals shown. Over a month that lands in the category's dearer quarter, which starts at $23.99, so this is ordinary at best.
Free plan and trial	F	No free plan or trial appears on the pricing page.
Features	C	Daily matching, auto-apply, tracker and AI writing tools. Per-application resume tailoring and hiring-manager credits are Elite only.
Ease of use	C	No store rating is on record. You train a copilot with your preferences first.
Platforms and integrations	C	Web plus a Chrome extension, and no phone or desktop app.

Grade point average — Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

2/45

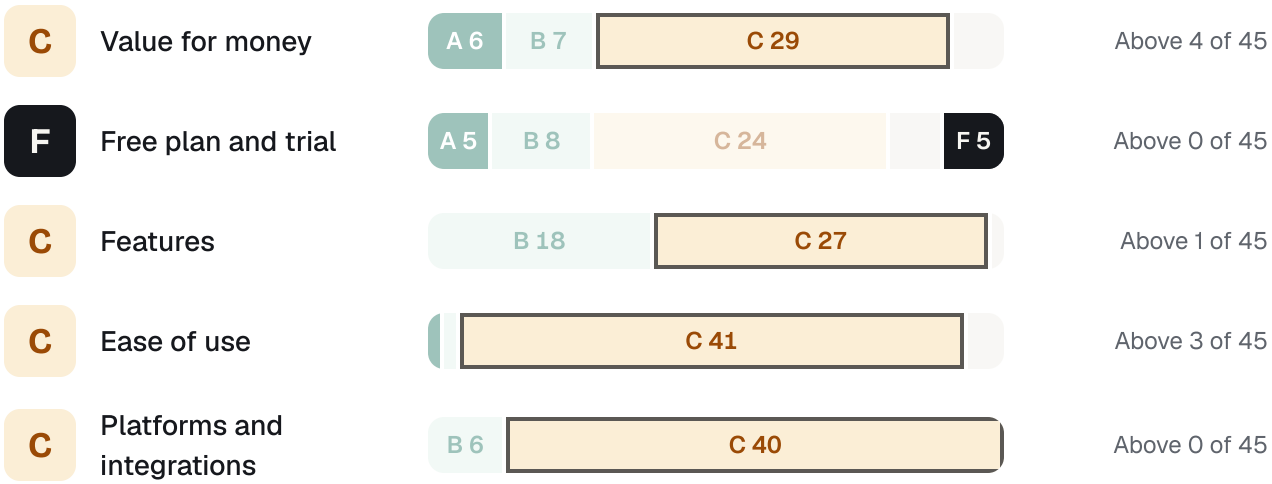

Other resume builders it is graded above

JobCopilot's GPA of 1.6 is higher than 2 of the 45 other resume builders we grade, and level with 2.

It stands best on value for money (C, above 4 of 45) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 46 resume builders we grade, cut by the letter each got. JobCopilot's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace JobCopilot you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 41 of the 45 other resume builders grade higher.

What you could make

- Resume builder: an app builder makes this well.

What you could not

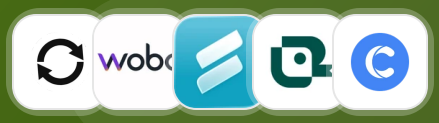

- Connections to other products, each kept working as those products change.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. JobCopilot's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
