Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 30 of the 101 other hiring and applicant tracking tools we grade

JobDiva is a recruiting platform for staffing firms. It combines an applicant tracking system, client relationship management, onboarding, a financial back office (DivaFinancials), vendor management system synchronization and reporting. The vendor publishes no prices and says it has built-in integrations to 100+ products.

To get you started, here are **7 things to know about JobDiva**, taken from its own pages and our grades.

> **No price is published, it is not aimed at in-house teams, and only an Android app was found.**
>
> From our report card of JobDiva

1 **Best for an ATS and back office for staffing agencies**

JobDiva is applicant tracking and CRM built for staffing and recruiting firms, with onboarding and back-office finance.

2 **It runs on 2 platforms**

Web and Android.

3 **Applicant tracking**

The core ATS, which the vendor says has led its category for more than 20 years, for sourcing, tracking and placing candidates.

4 **Client relationship management**

A CRM module for client services and business development, kept alongside the candidate records.

5 **Onboarding**

Automated onboarding workflows for different hiring scenarios, so new placements move to start dates without separate tools.

6 **A 1.8 GPA, above 30 of 101**

That is against the other hiring and applicant tracking tools we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace JobDiva you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for an ATS and back office for staffing agencies

JobDiva is applicant tracking and CRM built for staffing and recruiting firms, with onboarding and back-office finance. No price is published, it is not aimed at in-house teams, and only an Android app was found.

TOOLGPA REPORT CARD	JobDiva	Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No prices are published; pricing is by contact or by submitting an RFP.
Free plan and trial	F	No free plan and no trial on the listing.
Features	C	Applicant tracking, client CRM, onboarding, back-office finance and VMS sync. It is built for staffing agencies, so an in-house hiring team gets features it does not need.
Ease of use	C	No store rating on record. Agency workflows and VMS links need setting up before use.
Platforms and integrations	B	Web and Android, with reports and an API. iOS support is not stated on the pages read.
Grade point average		Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who JobDiva is for

- ✓ Fits if you run a staffing or recruiting firm
- ✓ Works for agencies that want ATS, client CRM and invoicing together

Who it is not for

- ✕ Skip it if you hire only for your own company, as it is aimed at agencies
- ✕ Not for you if you need an iPhone app; only Android was found
- ✕ Pricey if you expect a posted price, since pricing is by contact or an RFP
- ✕ Watch out: the pages read do not state iOS support

Good to know

Good for

- ✓ Staffing agencies that want ATS, CRM and back office in one system
- ✓ Firms that supply workers to clients who use a vendor management system
- ✓ Agencies that want a white-label hiring app under their own brand

Worth knowing

- ⓘ No prices are published on the site; pricing is by contact or by submitting an RFP.
- ⓘ It is aimed at staffing and recruiting firms, not at in-house hiring teams.
- ⓘ Only an Android listing for the JobDiva app was found; iOS support is not stated on the pages read.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

JobDiva's current pricing could not be confirmed from its own site.

> **No prices are published; pricing is by contact or by submitting an RFP.**
>
> From our grade for value for money

We could not confirm JobDiva's current prices from its own site, so this guide lists no plans. jobdiva.com has them.

Its main features, where it runs, what it works with and who makes it

2

Places it runs: Web and Android

Recruiting platform for staffing agencies, with back office tools. Here is what it does, as its own site describes it, and what it covers: public API, AI features, sales pipeline, workflow automation, applicant tracking, dashboards.

> **Applicant tracking, client CRM, onboarding, back-office finance and VMS sync.**

From our grade for features

Applicant tracking

The core ATS, which the vendor says has led its category for more than 20 years, for sourcing, tracking and placing candidates.

Client relationship management

A CRM module for client services and business development, kept alongside the candidate records.

Onboarding

Automated onboarding workflows for different hiring scenarios, so new placements move to start dates without separate tools.

DivaFinancials back office

A back office suite for staffing businesses; the homepage presents it alongside the ATS rather than as a separate product line.

VMS synchronization

Synchronization programs with vendor management systems, which matter to agencies filling roles for large clients.

Reports, apps and API

Dashboards, reports and BI tools, mobile apps for recruiters and workers (JobDiva App, MyTime App) and an open API suite.

JobDiva is made by JobDiva.

Where it stands

Its grades against its category, and whether to keep it or make your own

30/101

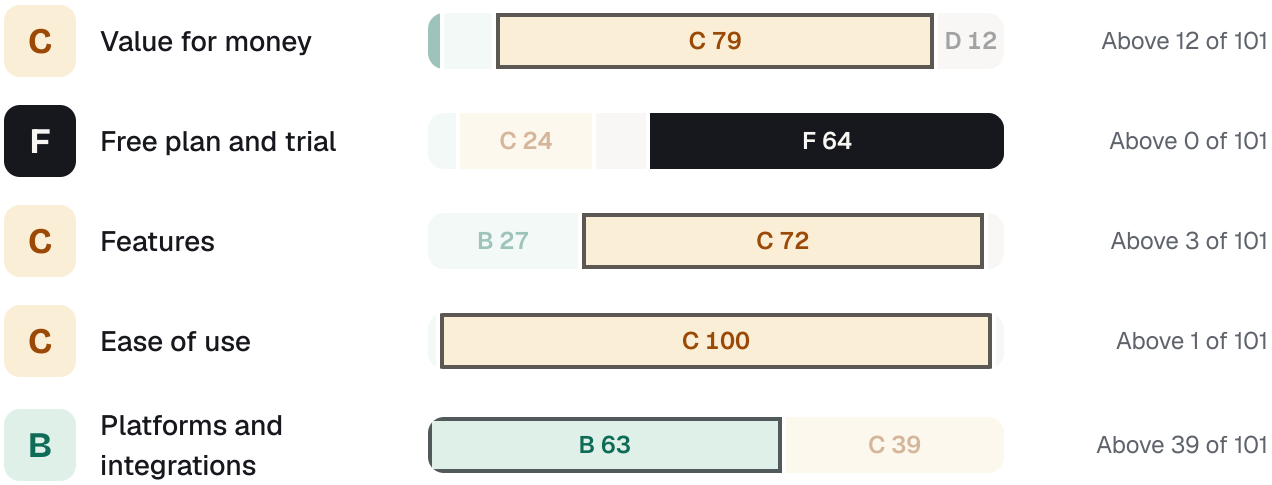

Other hiring and applicant tracking tools it is graded above

JobDiva's GPA of 1.8 is higher than 30 of the 101 other hiring and applicant tracking tools we grade, and level with 23.

It stands best on platforms and integrations (B, above 39 of 101) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 102 hiring and applicant tracking tools we grade, cut by the letter each got. JobDiva's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace JobDiva you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 48 of the 101 other hiring and applicant tracking tools grade higher.

What you could make

- Applicant tracking and sales pipeline: an app builder makes these well.

What you could not

- Connections to other products, each kept working as those products change.
- Connections that pull numbers from dozens of other services.
- A real app for Android. Something home-made would be a web page.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. JobDiva's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
