Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 7 of the 45 other resume builders we grade

Jobright matches job seekers to open roles from their resume and preferences, then edits the resume for a chosen job and fills in application forms with a browser extension. It also offers an AI career assistant called Orion and a way to look for insider connections at a company.

To get you started, here are **7 things to know about Jobright**, taken from its own pages and our grades.

5 AI job matching

Ranks roles against the user's skills, experience level and preferences, with a match score shown for each.

6 A 2.0 GPA, above 7 of 45

That is against the other resume builders we grade, on value, the free plan, features, ease of use and platforms.

7 Keep it

To replace Jobright you would be making an AI model, which you can rent by the request but not make. That is not a weekend's work, with an AI app builder or without one.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

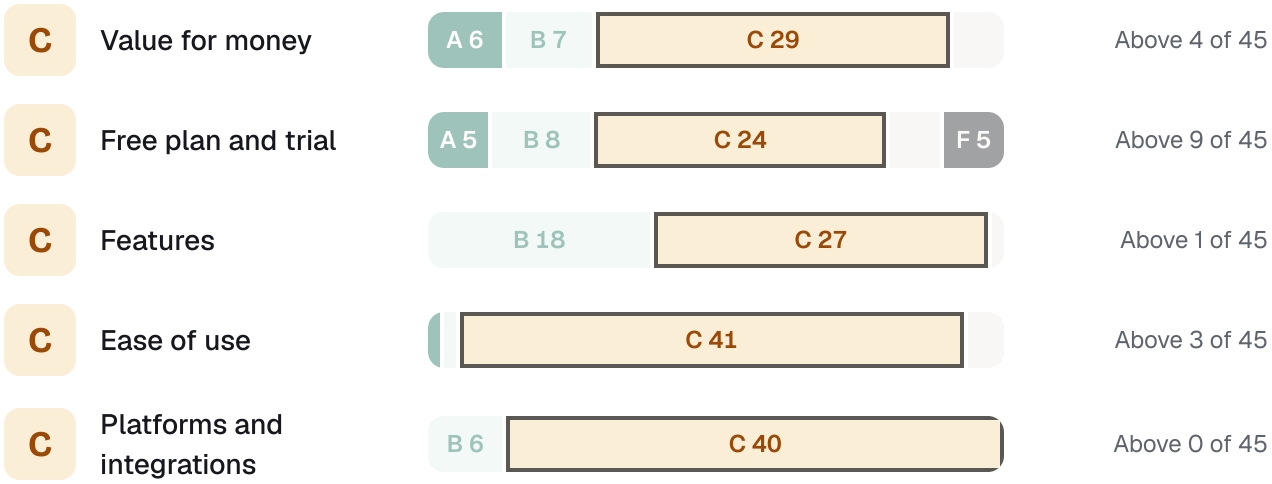

7 /45

Other resume builders it is graded above

Jobright's GPA of 2.0 is higher than 7 of the 45 other resume builders we grade, and level with 12.

Each grade against the category

Every bar is all 46 resume builders we grade, cut by the letter each got. Jobright's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Jobright you would be making an AI model, which you can rent by the request but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 26 of the 45 other resume builders grade higher.

What you could make

- Resume builder: an app builder makes this well.

What you could not

- An AI model, which you can rent by the request but not make.

What this rests on. Jobright's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
