To get you started, here are **9 things to know about JobSight**, taken from its own pages and our grades.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of JobSight you could make: job scheduling, tasks and invoicing. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

It costs $348 a year.

What you could make

- Job scheduling, tasks and invoicing: an app builder makes these well.

What you could not

- Speech turned into text you can trust.

- It is priced for each person, which means accounts and billing for a team.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. JobSight's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
