Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 54 of the 101 other hiring and applicant tracking tools we grade

Jobylon is an applicant tracking system aimed at large employers that hire across several brands, markets and teams. Besides the ATS it sells a talent CRM and a candidate feedback product, and it posts to job boards in the Nordics and elsewhere.

To get you started, here are **7 things to know about Jobylon**, taken from its own pages and our grades.

It posts to Nordic and international boards.

2 **It runs on Web**

Web.

3 **ATS**

Configurable pipelines, collaboration between hiring teams and permissions for multi-team setups.

4 **Multi-brand and multi-country hiring**

Separate hiring processes per brand and market, viewed from one platform.

5 **Job distribution and career pages**

Posts to job boards, including Nordic ones such as Jobindex, Duunitori and FINN, and builds branded career pages.

6 **A 2.0 GPA, above 54 of 101**

That is against the other hiring and applicant tracking tools we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Jobylon you would be making jobs posted to dozens of job boards at once, which takes an agreement with each board. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for an ATS for companies hiring across several brands

Jobylon is an ATS for large employers that hire across several brands, markets and teams, with a talent CRM and a candidate feedback product as extensions. It posts to Nordic and international boards. There's no price, and small teams will find it more than they need.

TOOLGPA REPORT CARD	Jobylon	Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published, so we can't set it against the $74 to $149 a month this category charges. That leaves it at C.
Free plan and trial	F	No free plan and no trial is listed; the site routes you to a demo. A demo request isn't a trial.
Features	B	ATS with multi-brand and multi-country hiring, career pages, job distribution and compliance controls. The talent CRM and Candidate Insights are extensions; the listing names no gap in the core ATS work.
Ease of use	C	No store rating on record, and the listing shows multiple brands and markets to set up. That puts it at C.
Platforms and integrations	B	Web product posting to LinkedIn, Indeed, Glassdoor, CareerBuilder and Nordic boards such as Jobindex and FINN. No desktop or phone app, so B.

Grade point average Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Jobylon is for

- ✓ Fits if you hire across several brands or countries from one account
- ✓ Works for Nordic employers who need local job boards

Who it is not for

- ✕ Not for you if you're a small team: it's aimed at large employers
- ✕ Skip it if you want a price, since the site sends visitors to book a demo
- ✕ Watch out: the talent CRM and Candidate Insights are extensions beyond the ATS
- ✕ Tight if you want a free plan or trial, as none is listed

Good to know

Good for

- ✓ Enterprises hiring in several countries or brands, especially in Europe

Where it stands

Its grades against its category, and whether to keep it or make your own

54/101

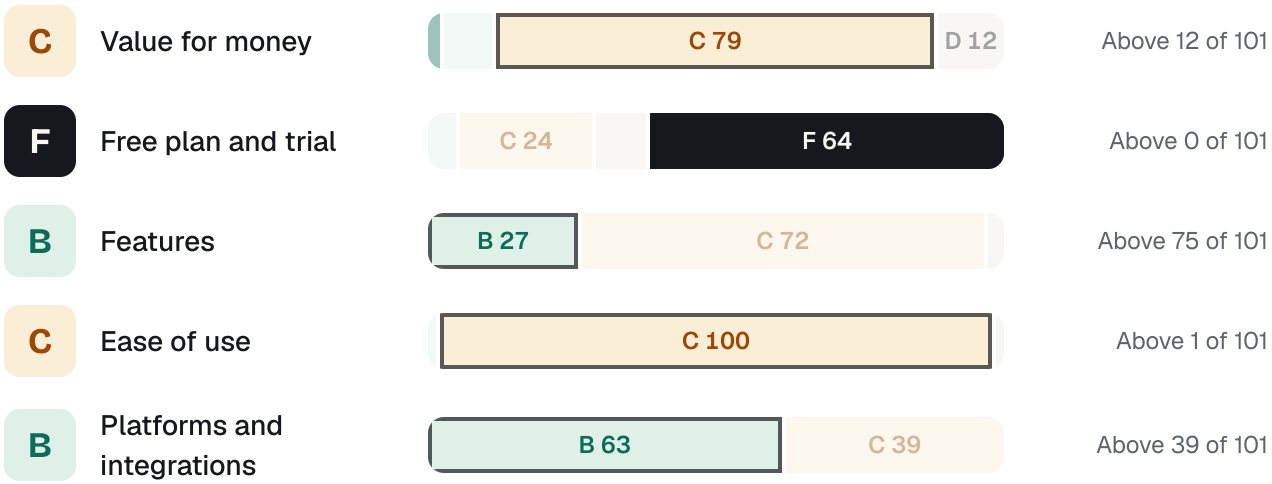

Other hiring and applicant tracking tools it is graded above

Jobylon's GPA of 2.0 is higher than 54 of the 101 other hiring and applicant tracking tools we grade, and level with 21.

It stands best on features (B, above 75 of 101) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 102 hiring and applicant tracking tools we grade, cut by the letter each got. Jobylon's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Jobylon you would be making jobs posted to dozens of job boards at once, which takes an agreement with each board. That is not a weekend's work, with an AI app builder or without one.

What you could make

- Applicant tracking and reports: an app builder makes these well.

What you could not

- Jobs posted to dozens of job boards at once, which takes an agreement with each board.
- It plugs into other products, LinkedIn, Indeed and Glassdoor among them.
- What a company asks for before it lets staff use something: roles and permissions.
- Sharing with other people, which means accounts and invitations.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Jobylon's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
