PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

6/91

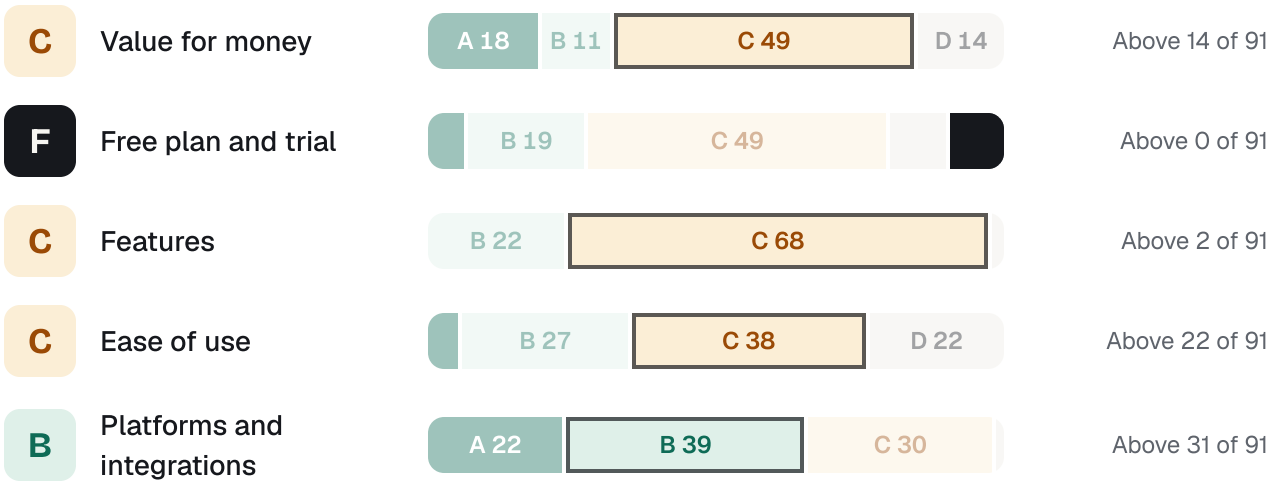

Other file storage and sync services it is graded above

JSCAPE's GPA of 1.8 is higher than 6 of the 91 other file storage and sync services we grade, and level with 6.

It stands best on platforms and integrations (B, above 31 of 91) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 92 file storage and sync services we grade, cut by the letter each got. JSCAPE's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace JSCAPE you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 79 of the 91 other file storage and sync services grade higher.

What you could make

- Reports: an app builder makes this well.

What you could not

- Connections to other products, each kept working as those products change.
- Storing and serving files for other people.
- What a company asks for before it lets staff use something: audit logs.

What this rests on. JSCAPE's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
