Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Your call

You could make the core of Juicer for yourself: popups.

What you would give up is listed below. Whether that is worth the price is your call. It costs $180 a year.

What you could make

- Popups: an app builder makes this well.
- It runs in a browser, which is where something home-made would run too.

What you could not

- ✕ It plugs into other products, Instagram, Facebook and LinkedIn among them, and has an API.

What this rests on. Juicer's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
