Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 2 of the 37 other e-signature and proposal tools we grade

Juro is a contract management platform for legal and business teams, covering drafting from templates, AI review, approval, signing and a searchable repository of signed contracts. It is priced by contract volume and integrations rather than by user, and prices are quoted through sales. The site describes it as an AI-native platform.

To get you started, here are **7 things to know about Juro**, taken from its own pages and our grades.

1 **Best for contract management for in-house legal teams**

Juro is a contract platform with templates, AI intake and review, a contract repository and signing, with unlimited users and workflows.

2 **It runs on Web**

Web.

3 **Self-serve templates**

Legal controls the templates, and colleagues create contracts from them or generate them from an integrated CRM or applicant tracking system.

4 **AI intake and review**

AI agents triage incoming contracts and review them against custom playbooks, with auto-redlining.

5 **Intelligent repository**

AI Extract tags contract data, and Operator answers questions about stored contracts in plain language and cites its sources.

6 **A 2.0 GPA, above 2 of 37**

That is against the other e-signature and proposal tools we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Juro you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for contract management for in-house legal teams

Juro is a contract platform with templates, AI intake and review, a contract repository and signing, with unlimited users and workflows. It publishes no prices, and you get a quote after a demo. That makes it a hard buy for a small team or anyone who just wants signatures.

TOOLGPA REPORT CARD	Juro	Graded Nov 12, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No prices are published; plans are built by contract volume and integrations and quoted after a demo. With nothing on record, this sits in the middle.
Free plan and trial	F	No free plan and no trial on record. Everything starts with a demo.
Features	B	Self-serve templates, AI intake and review, a contract repository, signing, AI connectors, and unlimited users and workflows. Nothing the listing shows is missing from contract work.
Ease of use	C	No store rating on record. It's a platform you roll out through a demo, with templates, workflows and integrations to set up.
Platforms and integrations	B	Web only, with Salesforce, HubSpot, Slack, Google Drive, Workday, Zapier, Greenhouse and Microsoft Word. No desktop or phone app is listed.
Grade point average		Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Juro is for

- ✓ Fits if you're a legal or operations team that wants staff to build contracts from approved templates
- ✓ Works for companies with enough contracts to justify a quoted platform

Who it is not for

- ✗ Skip it if you want a price before you talk to anyone, as none is published
- ✗ Not for you if you only need to sign PDFs, since it's a contract platform and broader than that
- ✗ Pricey if you need Salesforce, HubSpot or Workday, as the deeper integrations cost extra
- ✗ Tight if you want to try it first, as there is no free plan or trial

Good to know

Good for

- ✓ In-house legal teams that want business teams to self-serve on contracts
- ✓ Companies agreeing more than about 10 contracts a month
- ✓ Teams that want contracts created from a CRM such as Salesforce or HubSpot

Worth knowing

- ⓘ No prices are published; plans are built by contract volume and integrations, and quoted after a demo.
- ⓘ Deeper integrations such as Salesforce, HubSpot and Workday cost extra, while Slack and Google Drive are included.
- ⓘ It is a contract management platform, so it is broader than a plain signing tool.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Juro's current pricing could not be confirmed from its own site.

>
> From our grade for features

Self-serve templates

Legal controls the templates, and colleagues create contracts from them or generate them from an integrated CRM or applicant tracking system.

AI intake and review

AI agents triage incoming contracts and review them against custom playbooks, with auto-redlining.

Intelligent repository

AI Extract tags contract data, and Operator answers questions about stored contracts in plain language and cites its sources.

Signing

The product menu lists a signing stage, and the site has an e-signature legality page. The home page says Juro replaces Docusign.

AI tool connectors

MCP connectors let contracts be drafted, reviewed and managed from AI tools such as Claude and ChatGPT.

Unlimited users and workflows

Every plan includes unlimited users, workflows and templates. Pricing depends on contract volume and the integrations needed.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

2/37

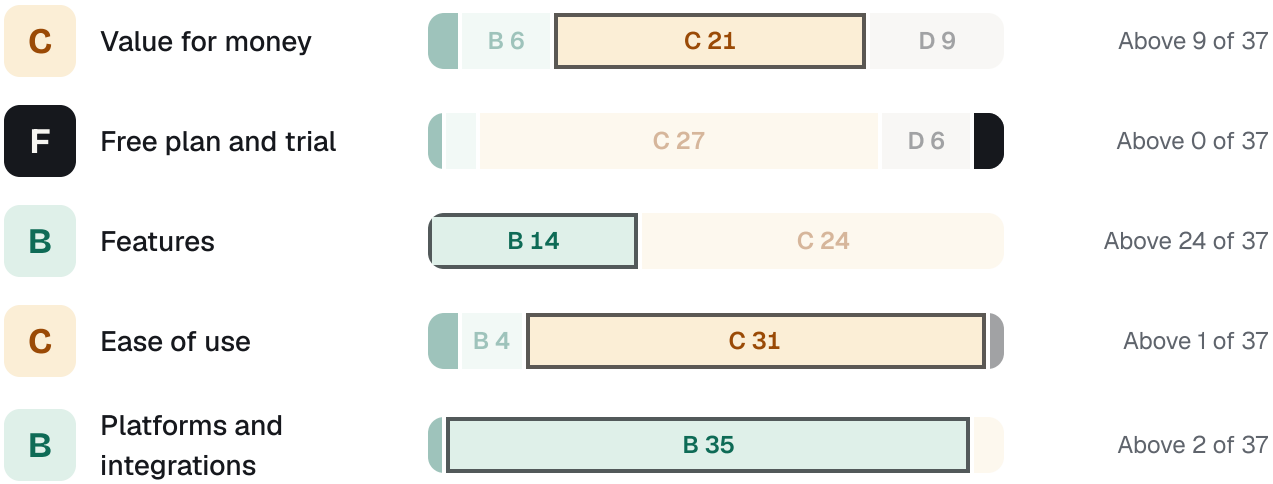

Other e-signature and proposal tools it is graded above

Juro's GPA of 2.0 is higher than 2 of the 37 other e-signature and proposal tools we grade, and level with 9.

It stands best on features (B, above 24 of 37) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 38 e-signature and proposal tools we grade, cut by the letter each got. Juro's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Juro you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 26 of the 37 other e-signature and proposal tools grade higher.

What you could make

- Documents and templates: an app builder makes these well.

What you could not

- Connections to other products, each kept working as those products change.
- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Juro's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
