Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 26 of the 56 other antivirus apps we grade

K7 Security, from K7 Computing Pvt Ltd, sells home antivirus suites (Antivirus Premium, Total Security and Ultimate Security), mobile security apps for Android and iOS, and business products such as endpoint, EDR and XDR tools. The US storefront loads its prices by script, so no plan prices could be read from the page text.

> **No store rating on record, but it is a consumer antivirus you install and run.**
>
> From our grade for ease of use

To get you started, here are **7 things to know about K7 Security**, taken from its own pages and our grades.

That is against the other antivirus apps we grade, on value, the free plan, features, ease of use and platforms.

The report card

Best for Windows, Android and iPhone home antivirus

TOOLGPA REPORT CARD	K7 Security	Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No plan price could be read, so it sits at the ordinary grade. The banner offer of $11.11 for 2 years is a promotion with unknown renewal terms.
Free plan and trial	D	A Free Trial link is in the site menu but no terms are recorded, so it earns a D.
Features	C	Home antivirus suites for Windows, plus business endpoint security, but the listing records no feature list.
Ease of use	B	No store rating on record, but it is a consumer antivirus you install and run.
Platforms and integrations	B	Windows, Android and iPhone are listed, with no Mac and no integrations.
Grade point average		Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who K7 Security is for

- ✗ Skip it if you use a Mac, since none is listed
- ✗ Watch out: the $11.11 offer is for 2-year purchases only and renewal terms are not shown
- ✗ Too light for detail: the listing records only the home page

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

26/56

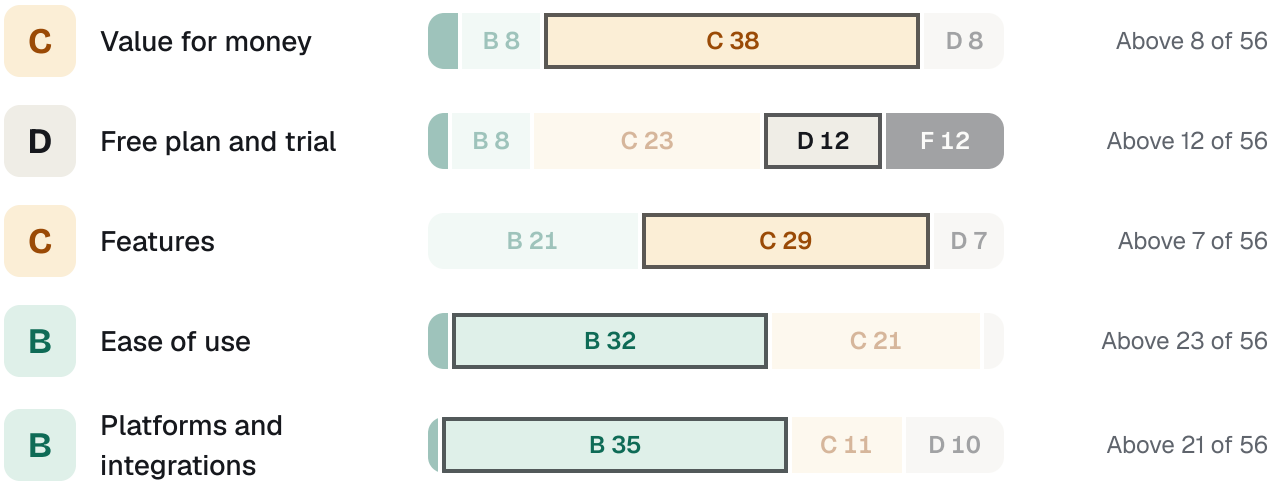

Other antivirus apps it is graded above

K7 Security's GPA of 2.2 is higher than 26 of the 56 other antivirus apps we grade, and level with 5.

It stands best on ease of use (B, above 23 of 56) and worst on free plan and trial (D, above 12).

Each grade against the category

Every bar is all 57 antivirus apps we grade, cut by the letter each got. K7 Security's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace K7 Security you would be making an engine that recognises new malware as it appears. That is not a weekend's work, with an AI app builder or without one.

What you could not

- ✕ An engine that recognises new malware as it appears.
- ✕ Readings from inside the operating system.
- ✕ Apps for Windows, iOS and Android that stay in step with each other.

What this rests on. K7 Security's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
