PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

23/79

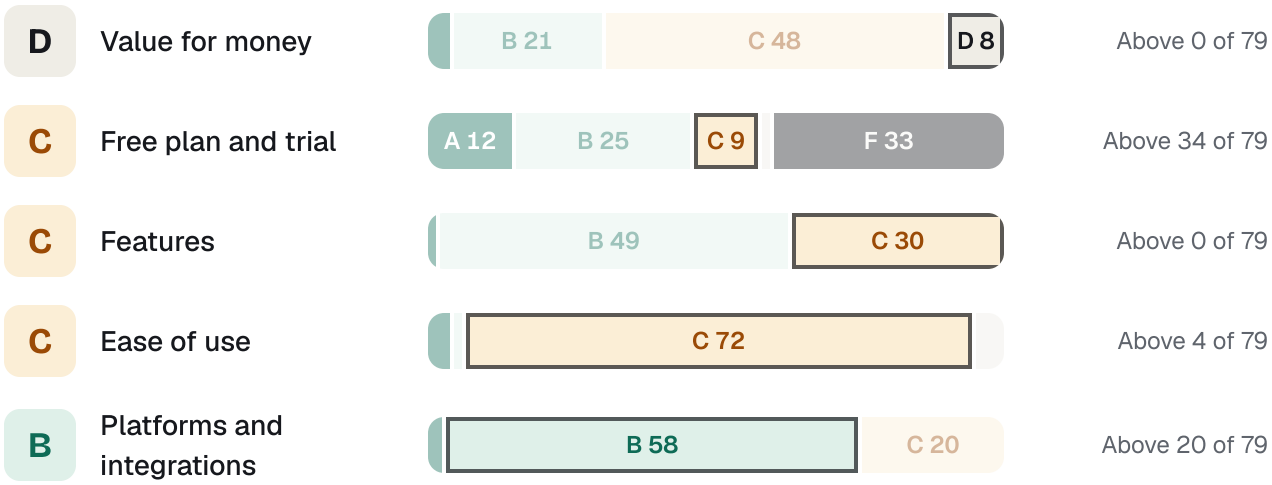

Other event ticketing platforms it is graded above

KonfHub's GPA of 2.0 is higher than 23 of the 79 other event ticketing platforms we grade, and level with 12.

It stands best on platforms and integrations (B, above 20 of 79) and worst on value for money (D, above 0).

Each grade against the category

Every bar is all 80 event ticketing platforms we grade, cut by the letter each got. KonfHub's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of KonfHub you could make: qR codes. What surrounds it you could not. The 4 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 44 of the 79 other event ticketing platforms grade higher.

What you could make

- QR codes: an app builder makes this well.

What you could not

- Selling tickets and checking them at the door.
- It plugs into other products, Razorpay, Stripe and Zapier among them, and has an API.
- AI features, unless you pay a model provider for each request yourself.
- Hooks into the device itself: widgets.

What this rests on. KonfHub's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
