Who Kuse is for

- ✓ Fits if you turn piles of project files into slides and reports

Who it is not for

- ✗ Tight if you stay free: a one-time 1,800 credits, with no stated refill
- ✗ Skip it if you use an Intel Mac, as the Mac app is Apple Silicon only, macOS 14 or later
- ✗ Watch out: the pricing page named no plan tiers and showed Malaysian ringgit in one render

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

123/178

Other AI agents it is graded above

Kuse's GPA of 2.4 is higher than 123 of the 178 other AI agents we grade, and level with 15.

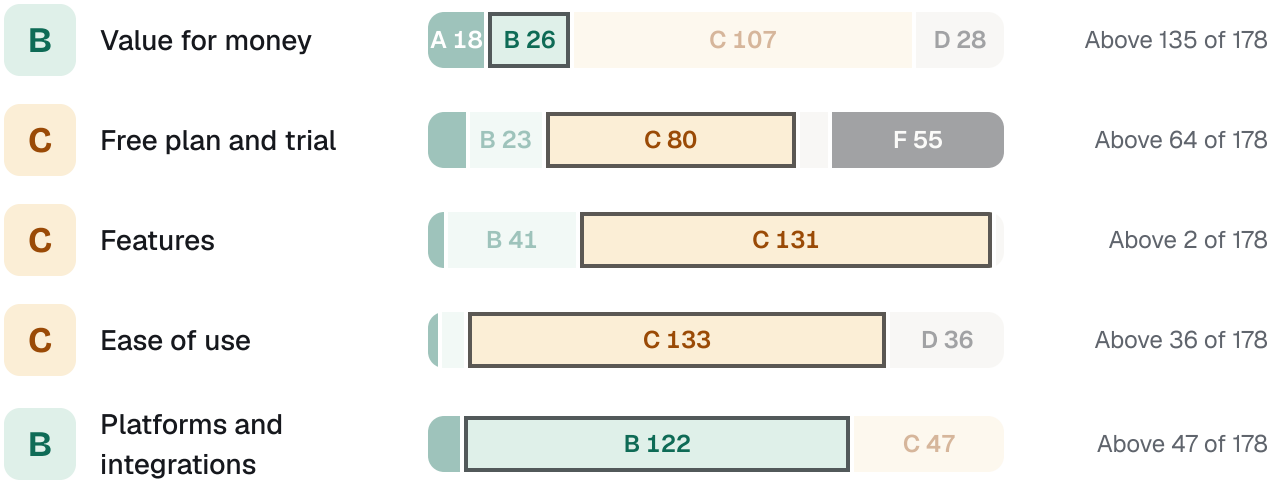

It stands best on value for money (B, above 135 of 178) and worst on features (C, above 2).

Its paid plans start at $19.90 a month, against a middle price of $25 for the category: 24 of the 98 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 11 tools score higher and cost less.

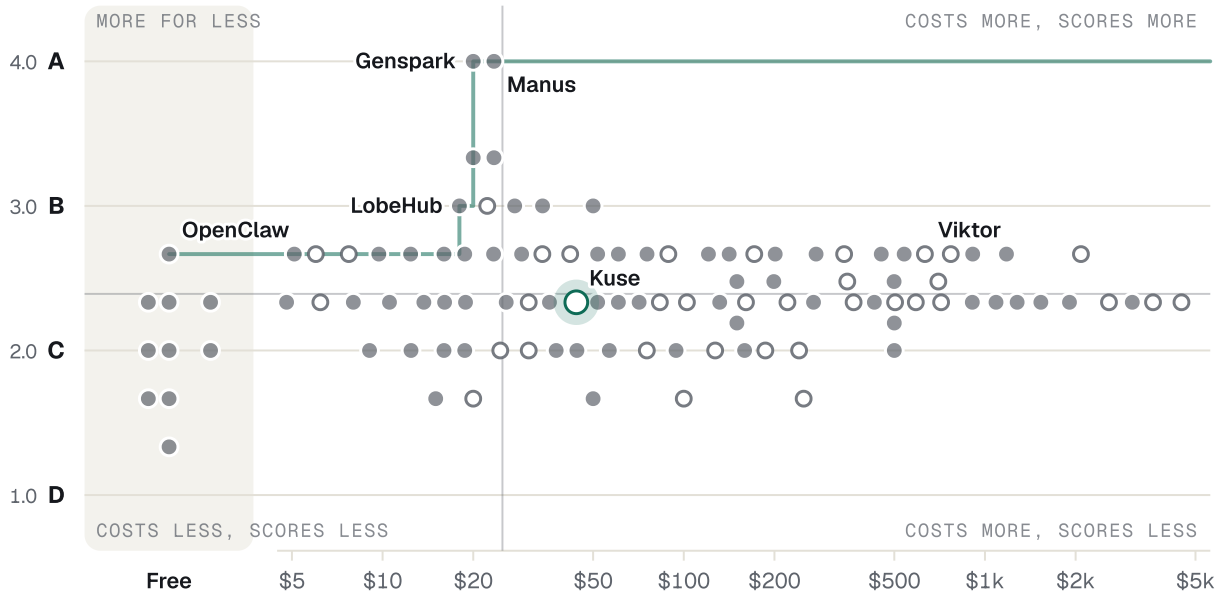

Each grade against the category

Every bar is all 179 AI agents we grade, cut by the letter each got. Kuse's own letter is outlined.

Price against what you get

Each dot is one of 109 AI agents. Further left costs less; higher up scores better on features, ease of use and platforms. Kuse is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Kuse you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.4 is higher than 123 of the 178 other AI agents we grade. It costs $238.80 a year.

What you could make

- Documents: an app builder makes this well.

What you could not

- An AI agent, with the models and the safeguards behind it.

- A library of papers and sources to search.
- An AI model, which you can rent by the request but not make.
- A slide editor.
- A real app for macOS and Windows. Something home-made would be a web page.
- It plugs into other products, Google Drive, Gmail and Notion among them.

What this rests on. Kuse's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
