Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Laser AI's own pages, its app-store listings and our grades. Every fact in it is on Laser AI's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.4

GPA, above 0 of the 69 other AI research tools we grade

Laser AI is a web workspace for evidence synthesis from Evidence Prime, the company behind GRADEpro. It prioritizes abstracts for screening, suggests values to extract from PDFs, and removes duplicate references. It is aimed at government bodies, life-science companies and research institutions.

To get you started, here are **8 things to know about Laser AI**, taken from its own pages and our grades.

> "
>
> **That price is out of reach for most students.**
>
> From our report card of Laser AI

1 **Best for AI screening for systematic reviews**

Laser AI prioritises screening, suggests data extraction and removes duplicates for systematic reviews, with a human checking each step.

2 **Paid plans start at $3,000 a month**

As its pricing page puts it: $3000 per project, for projects up to 18 months.

3 **It runs on Web**

Web.

4 **AI screening prioritization**

A focus mode and AI ranking put the most relevant abstracts first to reduce screening time.

5 **Data extraction suggestions**

Suggests text and table values from PDFs, and reviewers validate or edit each entry.

6 **Deduplication**

Finds duplicate references after bulk uploads; the vendor cites a study showing no lost references.

7 **A 1.4 GPA, above 0 of 69**

That is against the other AI research tools we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

To replace Laser AI you would be making a library of papers and sources to search. That is not a weekend's work, with an AI app builder or without one.

Laser AI at a glance

OUR GRADE 1.4 GPA, weak	

The report card

Best for AI screening for systematic reviews

Laser AI prioritises screening, suggests data extraction and removes duplicates for systematic reviews, with a human checking each step. It costs $3,000 a project or $3,000 a year and is bought through the vendor, with no free tier or trial shown. That price is out of reach for most students.

TOOLGPA REPORT CARD

Laser AI

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	D	$3,000 per project for up to 18 months, or $3,000 a year, which is about $250 a month. Unlimited users on a project helps a team, but the category's dearest tenth starts at $23.
Free plan and trial	F	No free tier or free trial is shown on the pricing page, only a demo.
Features	C	Screening prioritisation, extraction suggestions, deduplication and reference matching. The listing shows the price unit unclear between per user and per team.
Ease of use	C	No store rating on record, and a review has to be set up and loaded first.
Platforms and integrations	C	Web only, with no integrations or API listed.

Grade point average — Weak, out of 4.0 **1.4**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Laser AI is for

- ✓ Fits if you run reviews for a research organisation with budget
- ✓ Works for teams who want unlimited users on one project

Who it is not for

- ✗ Pricey if you are a student or solo, at $3,000 a project or a year
- ✗ Skip it if you want to try before paying, as no free tier or trial is shown, only a demo
- ✗ Watch out: the page labels the $3,000-a-year plan Per user in one view and Team in another
- ✗ Watch out: every plan is bought by contacting the vendor, with no self-serve checkout

Good to know

Good for

- ✓ Health agencies and companies running regulated evidence reviews
- ✓ Teams running many reviews who want reusable forms and libraries
- ✓ Researchers wanting help with screening and extraction time

Worth knowing

- ⓘ Pricing is by project or per year at $3000, and every plan is bought by contacting the vendor.
- ⓘ No free tier or free trial is shown on the pricing page; a demo can be booked.
- ⓘ The pricing page labels the $3000-a-year plan 'Per user' in one view and 'Team' in another.
- ⓘ The per-project price covers projects of up to 18 months.

PART 02 · PRICING

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$3,000

A month to start

Laser AI is a paid product, starting at $3000 per project, for projects up to 18 months.

> **No free tier or free trial is shown on the pricing page, only a demo.**

From our grade for free plan and trial

PER PROJECT

$3000

per project, for projects up to 18 months

One project with unlimited users and general customer support; sold through the contact form.

PER USER

$3000

per year, billed annually

Unlimited projects with general support; shown as 'Per user' in one view and 'Team' in another, so the unit is unclear.

ENTERPRISE

Custom

For companies; optional custom development and premium security, with priority support.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

AI-assisted screening and data extraction for systematic reviews. Here is what it does, as its own site describes it, and what it covers: AI features, real-time collaboration, research, citations.

> **Screening prioritisation, extraction suggestions, deduplication and reference matching.**
>
> From our grade for features

AI screening prioritization

A focus mode and AI ranking put the most relevant abstracts first to reduce screening time.

Data extraction suggestions

Suggests text and table values from PDFs, and reviewers validate or edit each entry.

Deduplication

Finds duplicate references after bulk uploads; the vendor cites a study showing no lost references.

Reference matching

Bulk-uploads PDFs and automatically matches or generates the references for them.

Reusable libraries

Keeps screening guides, extraction forms and controlled vocabularies to standardize work across an organization.

Human-verified workflow

Keeps a person in the loop with quality control and transparency over AI suggestions.

Where it runs

Web

What it works with

Its own pages name no integrations.

Laser AI is made by Evidence Prime, and has been around since 2014.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

0/69

Other AI research tools it is graded above

Laser AI's GPA of 1.4 is higher than 0 of the 69 other AI research tools we grade.

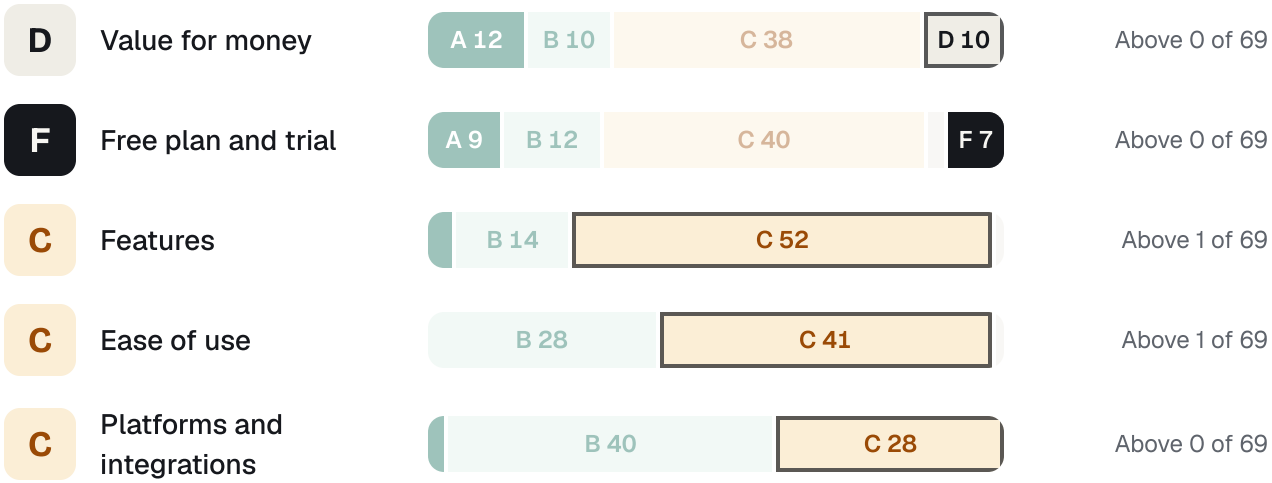

It stands best on features (C, above 1 of 69) and worst on free plan and trial (F, above 0).

Its paid plans start at $3,000 a month, against a middle price of $10 for the category: 48 of the 48 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 45 tools score higher and cost less.

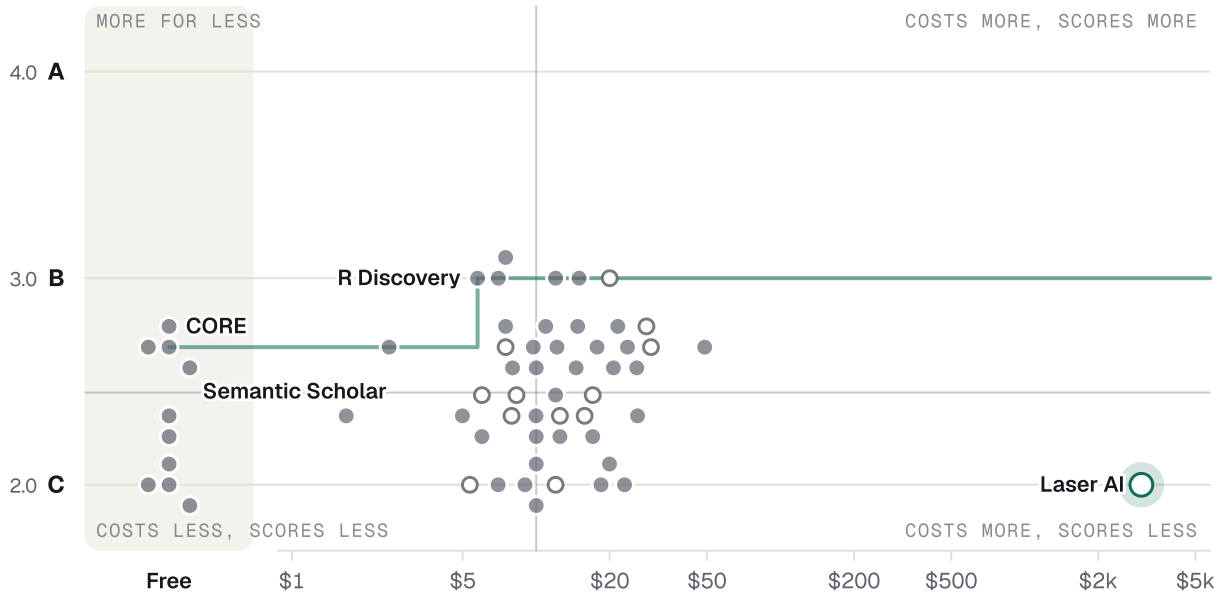

Each grade against the category

Every bar is all 70 AI research tools we grade, cut by the letter each got. Laser AI's own letter is outlined.

Price against what you get

Each dot is one of 59 AI research tools. Further left costs less; higher up scores better on features, ease of use and platforms. Laser AI is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Laser AI you would be making a library of papers and sources to search. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 69 of the 69 other AI research tools grade higher. It costs $36,000 a year.

What you could not

- ✕ A library of papers and sources to search.
- ✕ Citation records for millions of papers.

- ✕ Several people working in it at the same moment.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Laser AI's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

DistillerSR, Nested Knowledge, Rayyan, Covidence and Silvi

The 5 tools Laser AI is most often weighed against, with where each one differs from it.

1.8 GPA

DistillerSR

From $19.95/mo

Literature review software for systematic reviews and surveillance.

- Laser AI also covers citations.
- DistillerSR also covers reports.

PART 06 · QUESTIONS

Quick answers

The questions people ask about it, each answered in a line or two

11

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Laser AI free?

No. Laser AI is a paid product, starting at $3000 per project, for projects up to 18 months.

How much does Laser AI cost?

Laser AI lists 3 plans. Per project: $3000 per project, for projects up to 18 months.

What platforms does Laser AI work on?

Laser AI is available on Web.

Does Laser AI have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. Laser AI is listed for Web.

Does Laser AI have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. Laser AI is listed for Web.

Is Laser AI open source?

Laser AI is not described as open source on its own site, as read on Nov 13, 2026.

Who makes Laser AI?

Laser AI is made by Evidence Prime. It dates from 2014.

What are the alternatives to Laser AI?

The closest alternatives to Laser AI in our directory are DistillerSR, Nested Knowledge, Rayyan, Covidence and Silvi.

How does Laser AI compare with other AI research tools?

Laser AI's GPA of 1.4 is higher than 0 of the 69 other AI research tools we grade.

Is Laser AI good value for money?

ToolGPA grades Laser AI D for value for money. Its paid plans start at $3,000 a month, against a middle price of $10 for the category: 48 of the 48 others that charge start lower.

Could I make my own version of Laser AI?

To replace Laser AI you would be making a library of papers and sources to search.

Where this guide comes from

The prices, plans, platforms and features were read from Laser AI's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Laser AI's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Evidence Prime. Prices change, so check laser.ai before you buy.

PART 07 · ABOUT

About ToolGPA

Who made this guide, what else is on the site, and how to cite it

7,721

Tools graded, in 95 categories

ToolGPA grades software the way a school report grades a pupil: five subjects, a letter for each with the reason written beside it, and a GPA that averages them. Prices, plans and platforms are read from each maker's own pages and dated, so you always know how fresh a figure is.

Every grade, review and ranking on ToolGPA is our own judgement. No company can pay for a grade or change one. Every tool on the site has a guide like this one, free to download and pass on. It all lives at **toolgpa.com**.
