07 About ToolGPA
Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Latitude.sh's own pages, its app-store listings and our grades. Every fact in it is on Latitude.sh's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 5 of the 122 other web hosts we grade

Latitude.sh sells automated bare-metal servers, GPU servers and general-purpose virtual machines, plus storage, managed Postgres, Kubernetes and networking products. Compute is priced per hour or per month, with reserved monthly and yearly options listed as cheaper than hourly, and each server includes 20 TB of free outbound traffic.

To get you started, here are **8 things to know about Latitude.sh**, taken from its own pages and our grades.

> **Servers you configure yourself, with developer tooling rather than a guided setup.**
>
> From our grade for ease of use

1 **Best for bare-metal and GPU servers**

Latitude.sh rents bare-metal, GPU and virtual servers with free outbound traffic, from $18 a month for a small VM.

2 **Paid plans start at $18 a month**

As its pricing page puts it: $18 per month for a 1 vCPU virtual machine ($0.02 per hour).

3 **It runs on Web**

Web.

4 **Bare-metal servers**

Fully automated AMD-based metal servers are listed in small to extra-large sizes with NVMe storage and up to 200 Gbps networking.

5 **GPU servers**

Dedicated GPU plans range from a single H100 to eight-GPU NVIDIA RTX PRO 6000 and HGX B300 clusters.

6 **Virtual machines**

General-purpose VMs come in six sizes with local storage and a 10 Gbps network.

7 **A 1.6 GPA, above 5 of 122**

That is against the other web hosts we grade, on value, the free plan, features, ease of use and platforms.

8 **Your call**

Latitude.sh sits between: not beyond making, and not a weekend's work either.

The report card

Best for bare-metal and GPU servers

Latitude.sh rents bare-metal, GPU and virtual servers with free outbound traffic, from $18 a month for a small VM. Metal servers start at $296 a month,

and several billing terms were not readable.

TOOLGPA REPORT CARD	Latitude.sh	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	C	The smallest VM is $18 a month, in the ordinary range, but the cheapest metal plan is $296.
Free plan and trial	F	Nothing free and no trial on the pages read, so you pay from day one.
Features	C	Bare metal, GPU servers, VMs, free outbound traffic and managed services. The biggest plans are in fewer locations.
Ease of use	D	Servers you configure yourself, with developer tooling rather than a guided setup.
Platforms and integrations	B	Web console with developer tooling and an API.
Grade point average		Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Latitude.sh is for

- ✓ Fits if you need bare-metal or GPU servers
- ✓ Works for teams that automate their infrastructure

Who it is not for

- ✕ Pricey if you need dedicated hardware, as metal starts at $296 a month
- ✕ Watch out: reserved discounts are labeled 50% and 65%, but the billing basis is not stated
- ✕ Skip it if you want a free trial, as none is listed
- ✕ Tight if you need the biggest plans in many locations, as they have fewer

Good to know

Good for

- ✓ AI and GPU teams that want dedicated hardware
- ✓ Companies migrating off hyperscale clouds
- ✓ Developers who want an API for bare-metal provisioning

Worth knowing

- ⓘ Reserved monthly and yearly options are labeled 50% and 65% cheaper than hourly, but the page text shows one monthly figure per plan, whose billing basis is not stated.
- ⓘ Compute is dedicated hardware, so the lowest metal plan is far above typical VPS pricing.
- ⓘ The pricing page lists an FAQ on bandwidth fees and taxes, but its answers were not readable, so overage and tax terms are not recorded.
- ⓘ Each plan lists the number of locations it is available in, and the largest GPU and metal plans have fewer locations than the small ones.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

$18

A month to start

Latitude.sh is a paid product, starting at $18 per month for a 1 vCPU virtual machine ($0.02 per hour).

> **Nothing free and no trial on the pages read, so you pay from day one.**

From our grade for free plan and trial

VM.MICRO

$18

per month and up, shown beside an hourly rate of $0.02

1 vCPU, 4 GB RAM and 40 GB local storage on a 10 Gbps network. Larger VMs run to 32 vCPUs and 128 GB at $372 a month.

METAL M4.METAL.SMALL

$296

per month and up, shown beside an hourly rate of $0.41

6 cores AMD 4244P, 48 GB RAM and 2 x 960 GB NVMe. The largest listed metal plan is $3,971 a month.

METAL GPU G3.H100.SMALL

$1,230

per month and up, shown beside an hourly rate of $1.68

1 x NVIDIA H100 80 GB with 2 x 3.8 TB NVMe. Multi-GPU plans run from $17,520 to $46,720 a month.

Read from latitude.sh on Nov 13, 2026.

Ways to pay less

ANNUAL DISCOUNT

Reserved instances cheaper than hourly

The pricing page says paying upfront for monthly reserved instances is 50% cheaper than hourly and yearly is 65% cheaper.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Bare-metal servers, GPU clusters and VMs with hourly or monthly rates. Here is what it does, as its own site describes it, and what it covers: public API, databases.

> **Bare metal, GPU servers, VMs, free outbound traffic and managed services.**

From our grade for features

Bare-metal servers

Fully automated AMD-based metal servers are listed in small to extra-large sizes with NVMe storage and up to 200 Gbps networking.

GPU servers

Dedicated GPU plans range from a single H100 to eight-GPU NVIDIA RTX PRO 6000 and HGX B300 clusters.

Virtual machines

General-purpose VMs come in six sizes with local storage and a 10 Gbps network.

Free outbound traffic

Each plan lists 20 TB of free outbound traffic and unlimited inbound.

Managed services

Managed Postgres, Kubernetes, block, file and object storage and private networks are in the product menu.

Developer tooling

An API, SDKs, a CLI and a Terraform provider are listed.

Kubernetes

Latitude.sh is made by Latitude.sh.

Where it stands

Its grades against its category, and whether to keep it or make your own

5/122

Other web hosts it is graded above

Latitude.sh's GPA of 1.6 is higher than 5 of the 122 other web hosts we grade, and level with 23.

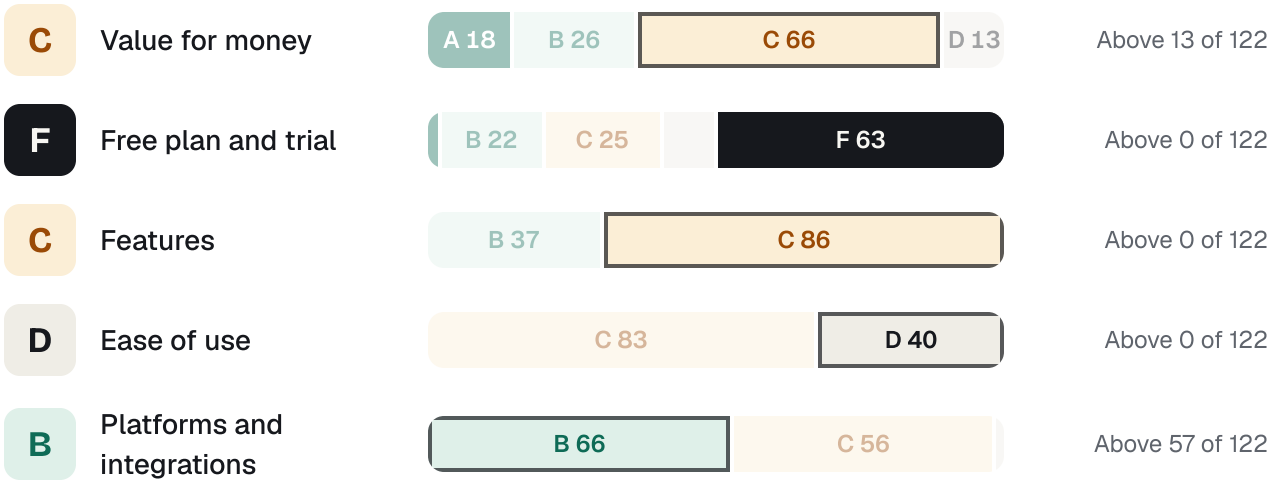

It stands best on platforms and integrations (B, above 57 of 122) and worst on free plan and trial (F, above 0).

Its paid plans start at $18 a month, against a middle price of $9.69 for the category: 79 of the 107 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 43 tools score higher and cost less.

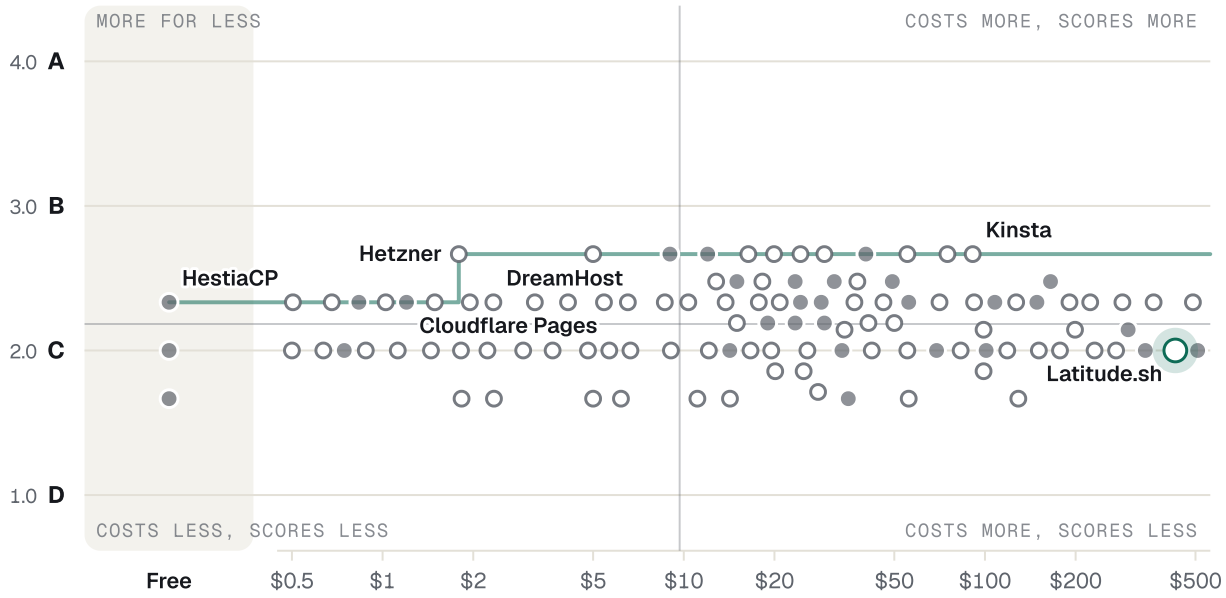

Each grade against the category

Every bar is all 123 web hosts we grade, cut by the letter each got. Latitude.sh's own letter is outlined.

Price against what you get

Each dot is one of 111 web hosts. Further left costs less; higher up scores better on features, ease of use and platforms. Latitude.sh is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Your call

Latitude.sh sits between: not beyond making, and not a weekend's work either.

What you would give up is listed below. Whether that is worth the price is your call. It costs $216 a year.

What you could make

- It runs in a browser, which is where something home-made would run too.

What you could not

- Databases with views, filters and links between them.

- ✕ It plugs into other products, Terraform and Kubernetes among them, and has an API.

What this rests on. Latitude.sh's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Cherry Servers, Hivelocity, Leaseweb, Hetzner and Vultr

The 5 tools Latitude.sh is most often weighed against, with where each one differs from it.

1.8 GPA

Cherry Servers

From $3.5/mo

Bare-metal and virtual servers billed hourly or on fixed terms.

- Latitude.sh also covers databases.
- Cherry Servers also covers workflow automation.

Latitude.sh and Cherry Servers compared in full

1.8 GPA

Hivelocity

From $10/mo

Bare-metal dedicated servers, VPS and colocation in 40+ data centers.

- Latitude.sh also covers databases.
- Hivelocity also covers workflow automation.

Quick answers

The questions people ask about it, each answered in a line or two

14

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Latitude.sh free?

No. Latitude.sh is a paid product, starting at $18 per month for a 1 vCPU virtual machine ($0.02 per hour).

How much does Latitude.sh cost?

Latitude.sh lists 3 plans. vm.micro: $18 per month and up, shown beside an hourly rate of $0.02.

What platforms does Latitude.sh work on?

Latitude.sh is available on Web.

Does Latitude.sh offer any discounts?

Latitude.sh publicly lists the following: Reserved instances cheaper than hourly.

Does Latitude.sh have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. Latitude.sh is listed for Web.

Does Latitude.sh have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. Latitude.sh is listed for Web.

Is Latitude.sh open source?

Latitude.sh is not described as open source on its own site, as read on Nov 13, 2026.

Does Latitude.sh have an API?

Yes. Latitude.sh offers a public API, according to its own site.

What does Latitude.sh integrate with?

Latitude.sh's listing names Terraform and Kubernetes. A listing names up to eight integrations, so it may connect to more.

Who makes Latitude.sh?

Latitude.sh is made by a company of the same name.

What are the alternatives to Latitude.sh?

The closest alternatives to Latitude.sh in our directory are Cherry Servers, Hivelocity, Leaseweb, Hetzner and Vultr.

How does Latitude.sh compare with other web hosts?

Latitude.sh's GPA of 1.6 is higher than 5 of the 122 other web hosts we grade, and level with 23.

Is Latitude.sh good value for money?

ToolGPA grades Latitude.sh C for value for money. Its paid plans start at $18 a month, against a middle price of $9.69 for the category: 79 of the 107 others that charge start lower.

Could I make my own version of Latitude.sh?

Latitude.sh sits between: not beyond making, and not a weekend's work either.

Where this guide comes from

The prices, plans, platforms and features were read from Latitude.sh's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Latitude.sh's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Latitude.sh. Prices change, so check latitude.sh before you buy.
