PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

19/72

Other lead and email finders it is graded above

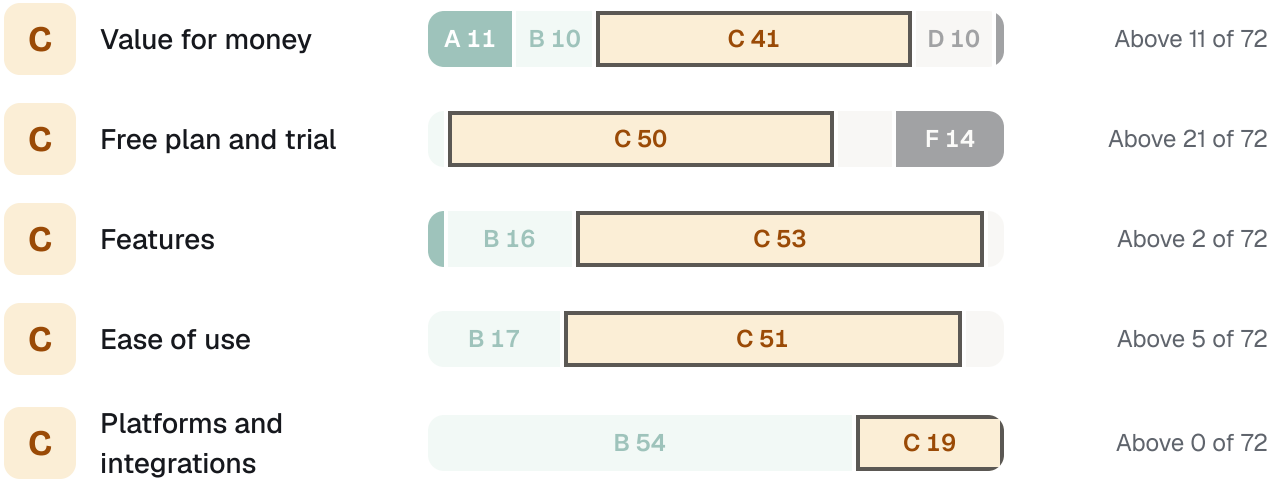

Lead Gibbon's GPA of 2.0 is higher than 19 of the 72 other lead and email finders we grade, and level with 9.

Its paid plans start at $39 a month, against a middle price of $49 for the category: 19 of the 54 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 19 tools score higher and cost less.

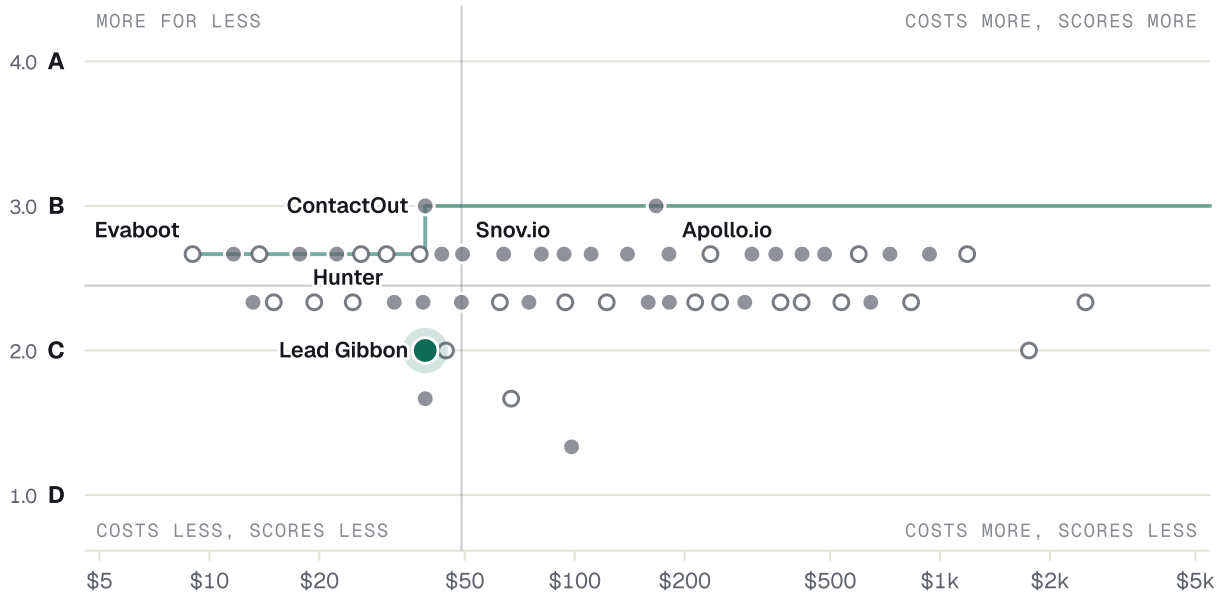

Each grade against the category

Every bar is all 73 lead and email finders we grade, cut by the letter each got. Lead Gibbon's own letter is outlined.

Price against what you get

Each dot is one of 55 lead and email finders. Further left costs less; higher up scores better on features, ease of use and platforms. Lead Gibbon is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Lead Gibbon you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 44 of the 72 other lead and email finders grade higher. It costs $468 a year.

What you could make

- Sales pipeline: an app builder makes this well.

What you could not

- Connections to other products, each kept working as those products change.
- Checking that an address exists without writing to it.

What this rests on. Lead Gibbon's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
