PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

96/101

Other HR software it is graded above

LeaveBoard's GPA of 2.6 is higher than 96 of the 101 other HR software we grade, and level with 5.

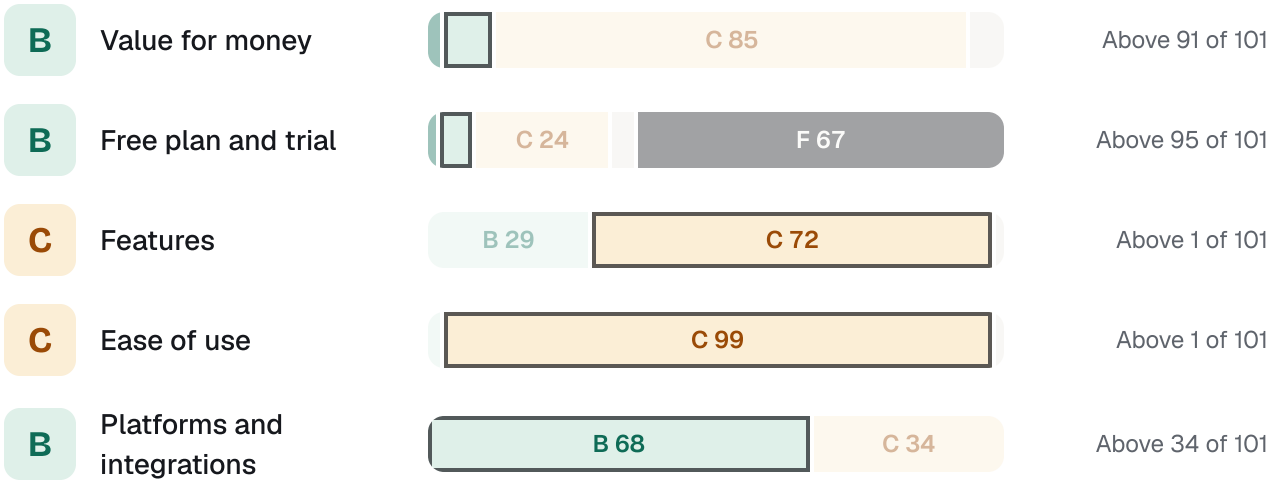

It stands best on free plan and trial (B, above 95 of 101) and worst on features (C, above 1).

Its paid plans start at $1.35 a month for each person, against a middle price of $5 for the category: 2 of the 40 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

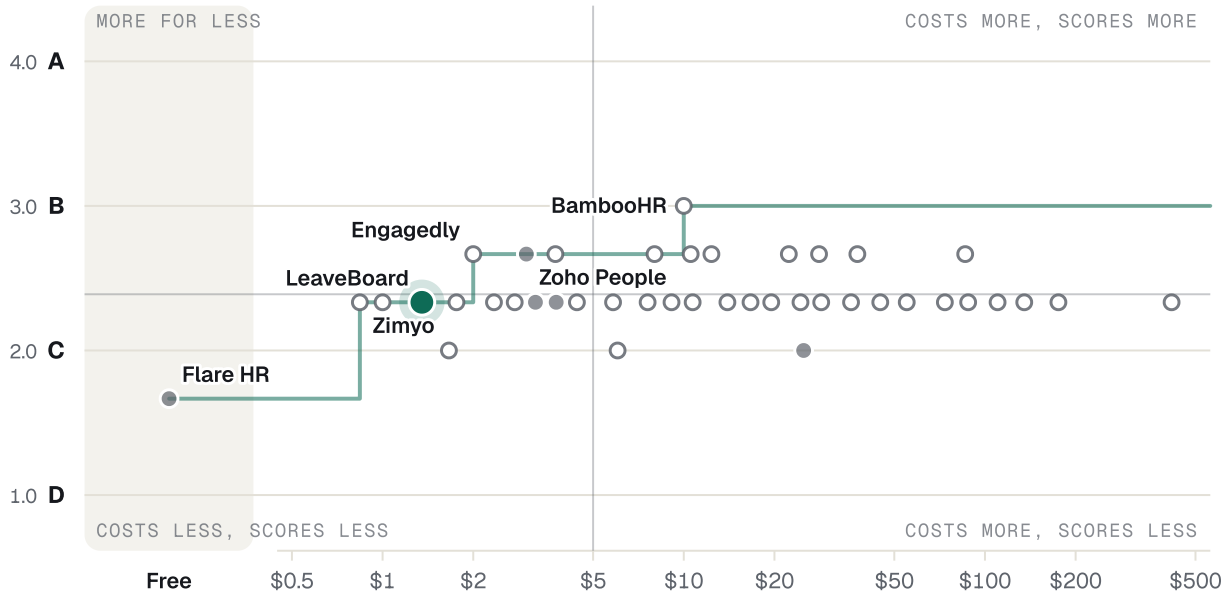

Each grade against the category

Every bar is all 102 HR software we grade, cut by the letter each got. LeaveBoard's own letter is outlined.

Price against what you get

Each dot is one of 42 HR software. Further left costs less; higher up scores better on features, ease of use and platforms. LeaveBoard is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of LeaveBoard you could make: time off, employee records and reports. What surrounds it you could not. The 4 things listed below take a company, not a weekend.

It is one of the better ones too: its GPA of 2.6 is higher than 96 of the 101 other HR software we grade. It costs $16.20 a year.

What you could make

- Time off, employee records and reports: an app builder makes these well.

What you could not

- Connections that pull numbers from dozens of other services.
- It is priced for each person, which means accounts and billing for a team.
- It plugs into other products, Google Calendar, Microsoft Office 365 and Outlook Calendar among them.
- What a company asks for before it lets staff use something: single sign-on.

What this rests on. LeaveBoard's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
