7 /78

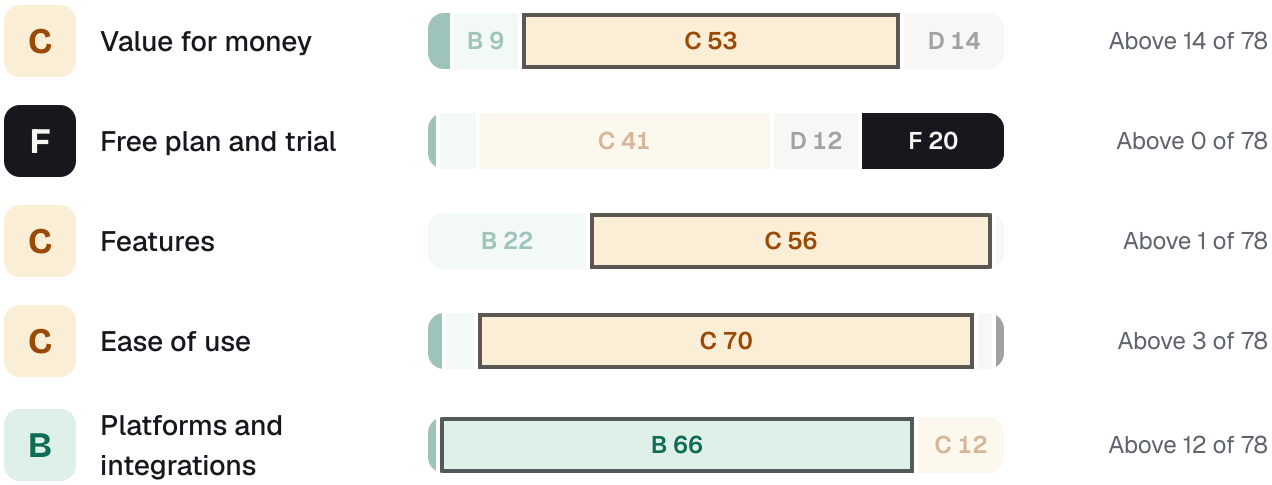

Other e-signature and proposal tools it is graded above

Leegality's GPA of 1.8 is higher than 7 of the 78 other e-signature and proposal tools we grade, and level with 11.

It stands best on platforms and integrations (B, above 12 of 78) and worst on free plan and trial (F, above 0).

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Leegality you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 60 of the 78 other e-signature and proposal tools grade higher.

What you could make

- Templates: an app builder makes this well.

What you could not

- Connections to other products, each kept working as those products change.
- Sharing with other people, which means accounts and invitations.

What this rests on. Leegality's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
