Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Leena AI's own pages, its app-store listings and our grades. Every fact in it is on Leena AI's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 30 of the 178 other AI agents we grade

Leena AI sells an enterprise AI platform with ready-made assistants for HR, IT and finance questions, plus a platform for building custom autonomous AI colleagues. It connects to the HR, ERP and ticketing systems a company already runs. Pricing is quoted per company after a short questionnaire.

To get you started, here are **7 things to know about Leena AI**, taken from its own pages and our grades.

1 **Best for AI assistants for HR, IT and finance questions**

Leena AI builds AI assistants for employee questions in HR, IT and finance, with over 200 connectors and support for MCP.

2 **It runs on Web**

Web.

3 **Universal HR, IT and Finance Assistants**

Three pre-built assistants that answer employee requests such as leave, onboarding, password resets and finance questions.

4 **AI Colleagues Platform**

Lets a company create and deploy its own autonomous AI colleagues for specific back-office processes.

5 **200+ pre-built connectors**

The vendor says integrations with systems such as Workday, ServiceNow and SAP are included rather than custom code.

6 **A 1.8 GPA, above 30 of 178**

That is against the other AI agents we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Leena AI you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

Leena AI at a glance

PRICING Paid	FREE PLAN No

OUR GRADE 1.8 GPA, weak	

The report card

Best for AI assistants for HR, IT and finance questions

Leena AI builds AI assistants for employee questions in HR, IT and finance, with over 200 connectors and support for MCP. No price is published, a quote is built from six questions, and the 45-day go-live is an average across customers, not a promise.

TOOLGPA REPORT CARD	Leena AI	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	C	No price is published. A quote comes from questions about headcount and use cases, and the vendor describes a per-employee yearly licence, so it stays at the ordinary grade.
Free plan and trial	F	No free plan and no trial are listed anywhere on the site.
Features	C	HR, IT and finance assistants, a platform for building AI colleagues, MCP and A2A support and governance. Setup is a project, not a click.
Ease of use	C	No store rating on record, and the vendor's go-live figure is 45 days on average.
Platforms and integrations	B	Web, with 200+ connectors and MCP and A2A support. No desktop or phone app is listed.
Grade point average		Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Leena AI is for

- ✓ Fits if a mid-size or large company wants one assistant for employee questions
- ✓ Makes sense if your HR, IT and finance systems are already among the connectors

Who it is not for

- ✗ Skip it if you want a price on the page, as you get a quote after answering questions
- ✗ Not for you if you need it live in days: the vendor's own average is 45 days
- ✗ Watch out: the custom platform adds a platform fee plus token-based usage
- ✗ Not for you if you are a small team, as it is sold to companies on a per-employee licence

Good to know

Good for

- ✓ Large enterprises that want one assistant across HR, IT and finance
- ✓ Teams that already run Workday, SAP or ServiceNow and want it connected

Worth knowing

- ⓘ No prices are published; a quote is built from six questions about industry, headcount, use cases and volumes.
- ⓘ The vendor describes the Universal Assistant as a flat per-employee yearly license and the custom platform as a platform fee plus token-based usage.
- ⓘ The vendor's go-live figure of 45 days is an average across its customers, not a guarantee.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Leena AI's current pricing could not be confirmed from its own site.

> **No free plan and no trial are listed anywhere on the site.**

From our grade for free plan and trial

We could not confirm Leena AI's current prices from its own site, so this guide lists no plans. leena.ai has them.

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

AI assistants for HR, IT and finance help in large companies. Here is what it does, as its own site describes it, and what it covers: AI features, workflow automation, AI agents.

Universal HR, IT and Finance Assistants

Three pre-built assistants that answer employee requests such as leave, onboarding, password resets and finance questions.

AI Colleagues Platform

Lets a company create and deploy its own autonomous AI colleagues for specific back-office processes.

200+ pre-built connectors

The vendor says integrations with systems such as Workday, ServiceNow and SAP are included rather than custom code.

MCP and A2A support

Says the platform has MCP and A2A built in, so other AI agents and systems can connect to it.

Observability and governance

Role-based access, policy guardrails and an audit trail of what each AI colleague did.

Where it runs

Web

What it works with

Workday
ServiceNow
SAP
Microsoft Teams
SharePoint

Leena AI is made by Leena AI.

Where it stands

Its grades against its category, and whether to keep it or make your own

30/178

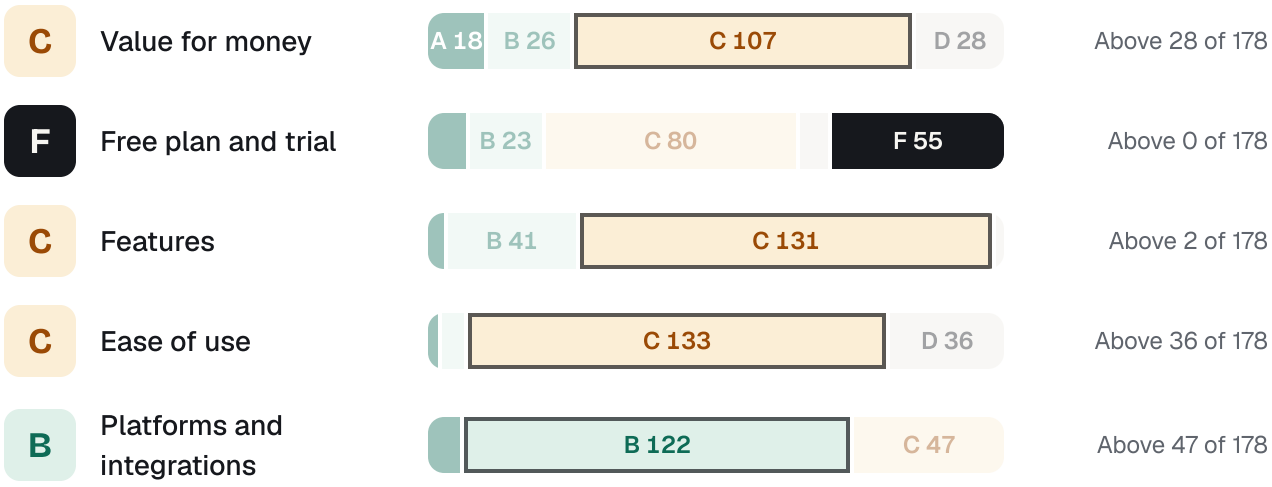

Other AI agents it is graded above

Leena AI's GPA of 1.8 is higher than 30 of the 178 other AI agents we grade, and level with 33.

It stands best on platforms and integrations (B, above 47 of 178) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 179 AI agents we grade, cut by the letter each got. Leena AI's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Leena AI you would be making an AI agent, with the models and the safeguards behind it. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 115 of the 178 other AI agents grade higher.

What you could not

- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ Connections to other products, each kept working as those products change.
- ✕ What a company asks for before it lets staff use something: roles and permissions.

What this rests on. Leena AI's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Atomicwork, Aisera, Workativ, Kore.ai and Ema

The 5 tools Leena AI is most often weighed against, with where each one differs from it.

2.2 GPA
