Its paid plans start at $4.17 a month when paid by the year, against a middle price of $3.33 for the category: 26 of the 38 others that charge start lower.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

You could make this

A habit tracker at its plainest is a list of habits, a tick for each day and a count of the streak.

What LevelHabit does at its core is habit tracking and goals, and that is the kind of thing an AI app builder makes well. Nothing on its listing is beyond a weekend of building. It costs $49.99 a year. An AI app builder starts at about $20 a month on our listings, and you only need it while you build.

What you could make

- Habit tracking and goals: an app builder makes these well.

It runs in a browser, which is where something home-made would run too.

What this rests on. LevelHabit's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
