2.4

GPA, above 61 of the 81 other cold outreach tools we grade

LinkedCamp runs LinkedIn outreach from the cloud, with email steps in the same sequences and a shared inbox for replies. Each LinkedIn account gets a dedicated IP. It sells a single plan for teams running their own outreach and a set of agency plans with client sub-accounts and white-label, and it ships an MCP server for AI assistants.

It stands best on features (B, above 60 of 81) and worst on ease of use (C, above 1).

Each grade against the category

Every bar is all 82 cold outreach tools we grade, cut by the letter each got. LinkedCamp's own letter is outlined.

Price against what you get

Each dot is one of 74 cold outreach tools. Further left costs less; higher up scores better on features, ease of use and platforms. LinkedCamp is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace LinkedCamp you would be making email sent in volume that still reaches the inbox. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.4 is higher than 61 of the 81 other cold outreach tools we grade. It costs $768 a year.

What you could not

- ✕ Email sent in volume that still reaches the inbox.
- ✕ Newsletters sent to thousands of people that still reach the inbox.

- ✕ An AI agent, with the models and the safeguards behind it.
- ✕ Connections to other products, each kept working as those products change.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. LinkedCamp's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
