8/98

Other whiteboard and mind map tools it is graded above

Lino's GPA of 2.0 is higher than 8 of the 98 other whiteboard and mind map tools we grade, and level with 14.

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Lino you could make: notes. What surrounds it you could not. The 2 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 76 of the 98 other whiteboard and mind map tools grade higher.

What you could make

- Notes: an app builder makes this well.

What you could not

- Storing and serving files for other people.
- Several people working in it at the same moment.

What this rests on. Lino's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
