Who made this guide, what else is on the site, and how to cite it

ToolGPA put this guide together from Linx's own pages, its app-store listings and our grades. Every fact in it is on Linx's page too, where it is kept up to date. Checked Nov 13, 2026.

Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 1 of the 134 other automation tools we grade

Linx is a low-code integration platform for building application integrations, APIs, data migrations, ETL jobs and process automation. Solutions are built in a Windows desktop designer and run on Linx Server, which can be hosted in the cloud, on premises or in a private cloud. Plans are priced by the number of solutions in production.

> "
>
> **You build solutions in the Designer, so there's a learning curve.**
>
> From our grade for ease of use

To get you started, here are **9 things to know about Linx**, taken from its own pages and our grades.

1 **Best for custom integrations and APIs with little code**

Linx is a low-code tool for custom integrations and APIs, priced by the number of solutions in production: $599 a month for up to 3, up to $4,999 for 40.

2 **Paid plans start at $599 a month**

As its pricing page puts it: $599 per month for up to 3 solutions in production.

3 **You can try it first**

Free trial offered; request it through the vendor's demo page

4 **It runs on 2 platforms**

Windows and Web.

5 **Low-code visual designer**

Solutions are built and debugged in the Linx Designer, a Windows application the docs compare to Visual Studio but simpler.

6 **Cloud or on-premises hosting**

Linx Server hosts the running solutions and can be deployed in the cloud, on premises or in a private cloud, managed through a browser interface.

7 **Plugins and connectors**

Packages of prebuilt functionality, called plugins, add connectors and features that solutions can use.

8 **A 1.6 GPA, above 1 of 134**

That is against the other automation tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Linx you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for custom integrations and APIs with little code

Linx is a low-code tool for custom integrations and APIs, priced by the number of solutions in production: $599 a month for up to 3, up to $4,999 for 40. The Designer is a Windows app, hosted databases from $19 a month are extra, and a trial is requested through the demo page.

TOOLGPA REPORT CARD	Linx	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	D	$599 a month for up to 3 solutions in production, far above the category's dearest tenth of $165. Stadium is $249 a month per web application.
Free plan and trial	D	A free trial is offered, but you request it through the vendor's demo page.
Features	C	Integrations and APIs on premises or in a private cloud. Price follows solutions in production; hosted databases cost extra.
Ease of use	C	No store rating on record. You build solutions in the Designer, so there's a learning curve.
Platforms and integrations	C	The Designer runs on Windows only; Linx Server is managed in a browser. No integrations list on the listing.
Grade point average		Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Linx is for

- ✓ Fits if you need custom integrations and APIs without writing full code
- ✓ Makes sense if you must run integrations on premises or in a private cloud

Who it is not for

- ✗ Pricey if you're small, as the cheapest plan is $599 a month
- ✗ Skip it if you don't use Windows, because the Designer is a Windows app
- ✗ Watch out: hosted MySQL or Postgres from $19 a month isn't in the plan price
- ✗ Watch out: cloud is billed monthly, but on-premises is annual in advance

Good to know

Good for

- ✓ Teams that need custom integrations and APIs without writing full code
- ✓ Companies that must run integrations on premises or in a private cloud

Worth knowing

- ⓘ Price follows the number of solutions deployed in production, not users or tasks.
- ⓘ Cloud is charged monthly; on-premises deployments are charged annually in advance.
- ⓘ Hosted MySQL or Postgres databases start at $19 a month and are not in the plan price.
- ⓘ The Designer is a Windows application; Linx Server is managed from a browser.

What it does

Its main features, where it runs, what it works with and who makes it

2

Places it runs: Web and Windows

Low-code iPaaS for integrations, APIs and data automation. Here is what it does, as its own site describes it, and what it covers: workflow automation, app builder.

> "
>
> **Integrations and APIs on premises or in a private cloud.**

From our grade for features

Low-code visual designer

Solutions are built and debugged in the Linx Designer, a Windows application the docs compare to Visual Studio but simpler.

Cloud or on-premises hosting

Linx Server hosts the running solutions and can be deployed in the cloud, on premises or in a private cloud, managed through a browser interface.

Plugins and connectors

Packages of prebuilt functionality, called plugins, add connectors and features that solutions can use.

Monitoring and metrics

Linx Server includes management, observability and metrics for the solutions it runs.

Broad use cases

The vendor lists API development, application integration, data migration, data automation, process automation and ETL as use cases.

Stadium web apps

The Stadium add-on builds data-driven web applications that show and act on data and processes managed in Linx.

Where it runs

Web

Windows

What it works with

Its own pages name no integrations.

Linx is made by Linx Software.

Where it stands

Its grades against its category, and whether to keep it or make your own

1/134

Other automation tools it is graded above

Linx's GPA of 1.6 is higher than 1 of the 134 other automation tools we grade, and level with 8.

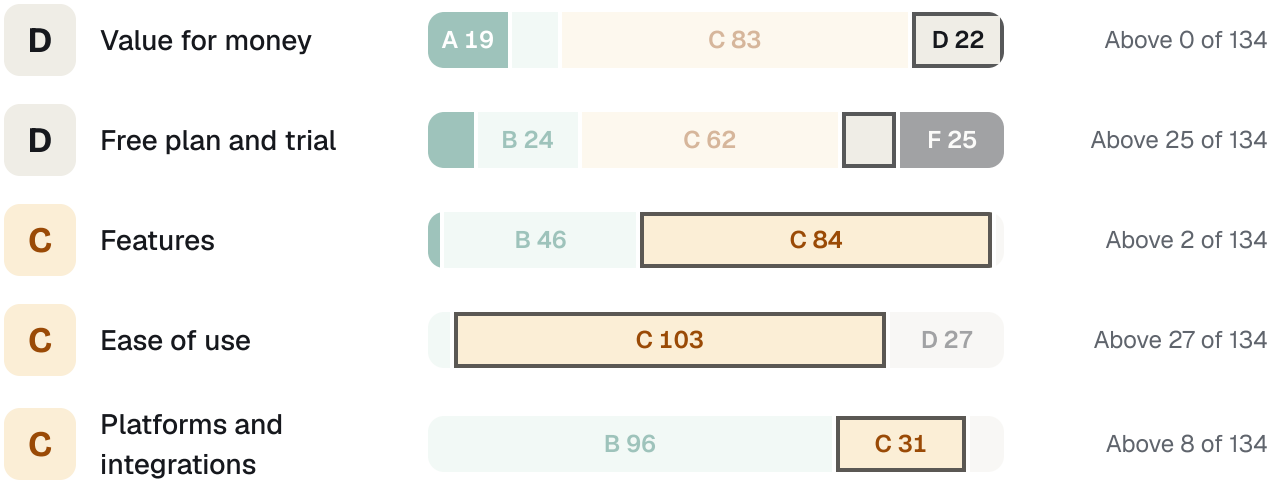

It stands best on ease of use (C, above 27 of 134) and worst on value for money (D, above 0).

Its paid plans start at $599 a month, against a middle price of $22.17 for the category: 61 of the 65 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 53 tools score higher and cost less.

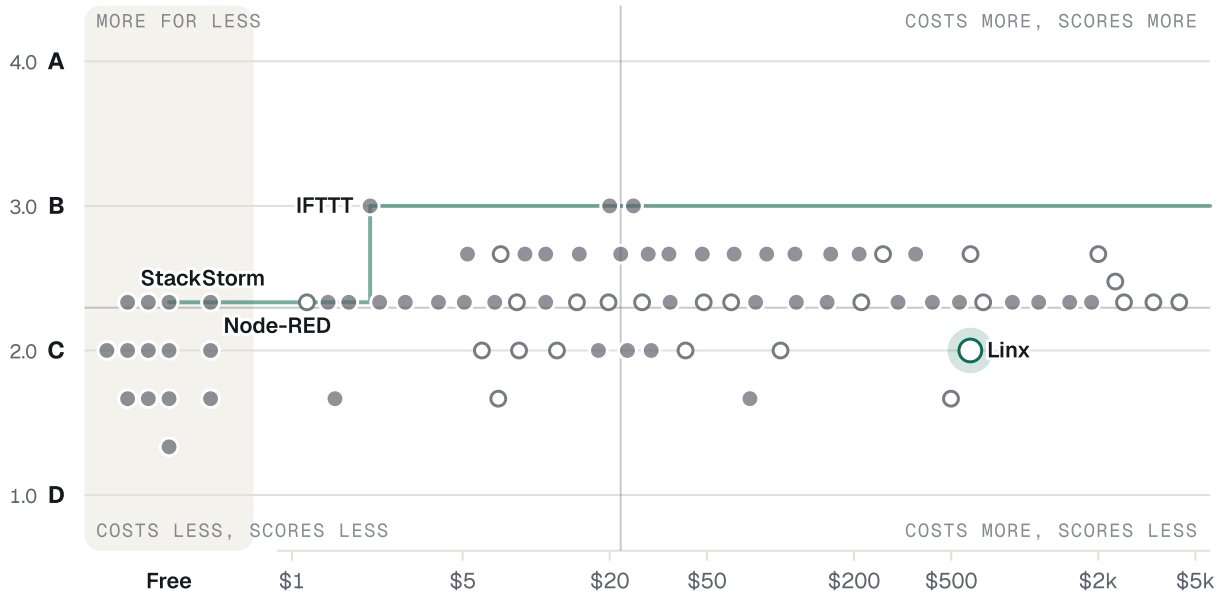

Each grade against the category

Every bar is all 135 automation tools we grade, cut by the letter each got. Linx's own letter is outlined.

Price against what you get

Each dot is one of 80 automation tools. Further left costs less; higher up scores better on features, ease of use and platforms. Linx is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Linx you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 125 of the 134 other automation tools grade higher. It costs $7,188 a year.

What you could not

- ✕ Connections to other products, each kept working as those products change.
- ✕ A tool that builds and hosts other apps.

× A real app for Windows. Something home-made would be a web page.

What this rests on. Linx's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.

The alternatives

The tools it is most often weighed against, side by side

Jitterbit, Boomi, SnapLogic and Workato

The 4 tools Linx is most often weighed against, with where each one differs from it.

Quick answers

The questions people ask about it, each answered in a line or two

11

Questions, each answered in a line or two

The short version of everything above, for when you only need the answer. Each one is told in full in its part of the guide.

Is Linx free?

No, Linx is a paid product, but you can try it first. Free trial offered; request it through the vendor's demo page.

How much does Linx cost?

Linx lists 5 plans. 3 Solutions: $599 per month for up to 3 solutions in production.

What platforms does Linx work on?

Linx is available on Windows and Web.

Does Linx have an Android app?

No Android app was listed when its pages were read on Nov 13, 2026. Linx is listed for Windows and Web.

Does Linx have an iPhone app?

No iPhone app was listed when its pages were read on Nov 13, 2026. Linx is listed for Windows and Web.

Is Linx open source?

Linx is not described as open source on its own site, as read on Nov 13, 2026.

Who makes Linx?

Linx is made by Linx Software.

What are the alternatives to Linx?

The closest alternatives to Linx in our directory are Jitterbit, Boomi, SnapLogic and Workato.

How does Linx compare with other automation tools?

Linx's GPA of 1.6 is higher than 1 of the 134 other automation tools we grade, and level with 8.

Is Linx good value for money?

ToolGPA grades Linx D for value for money. Its paid plans start at $599 a month, against a middle price of $22.17 for the category: 61 of the 65 others that charge start lower.

Could I make my own version of Linx?

To replace Linx you would be making connections to other products, each kept working as those products change.

Where this guide comes from

The prices, plans, platforms and features were read from Linx's own pages on Nov 13, 2026, and the grades were given on Nov 13, 2026. Graded from this listing, whose facts were read from Linx's own pages on 13 November 2026. Not based on using the product, and shorter than our full reviews.

Every tool we list gets five grades, A to F, each with its reason, and a GPA that averages them. How each is decided is at toolgpa.com/grades. This guide is ToolGPA's own work; it is not made, paid for or approved by Linx Software. Prices change, so check linx.software before you buy.
