Welcome

What it is, who it suits, its grades and the ten things to know first

2.6

GPA, above 54 of the 60 other webinar and live streaming tools we grade

Livepush is a cloud streaming service that takes a live feed from OBS or another encoder over RTMP or SRT and sends it to 40+ platforms. It also schedules pre-recorded videos to go live on repeat and sells hosted event pages and HLS delivery on a separate plan set.

To get you started, here are **9 things to know about Livepush**, taken from its own pages and our grades.

1 **Best for multistreaming and scheduled streams**

Livepush streams to several platforms at once, plays pre-recorded video as live and hosts HLS streams.

2 **Paid plans start at $13 a month**

As its pricing page puts it: $13 per month, billed annually ($15 billed monthly).

3 **There is a free plan**

Free forever: 20 hours of streaming a month, 3 destinations, 1 live source and 1 GB of video storage.

4 **It runs on Web**

Web.

5 **Multistreaming**

Send one stream to 40+ destinations; the number at once is 3, 15, 25 or 45 depending on plan.

6 **Pre-recorded live**

Upload a video once and schedule it to stream on any platform; paid plans add repeat and 24/7 playlist channels.

7 **HLS live streaming**

CDN-backed adaptive .m3u8 playback to embed on a site or app; priced on a separate hosting plan set.

8 **A 2.6 GPA, above 54 of 60**

That is against the other webinar and live streaming tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Livepush you would be making one live stream sent to several platforms at once. That is not a weekend's work, with an AI app builder or without one.
