PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

8/83

Other focus apps it is graded above

Lofi Girl's GPA of 2.2 is higher than 8 of the 83 other focus apps we grade, and level with 14.

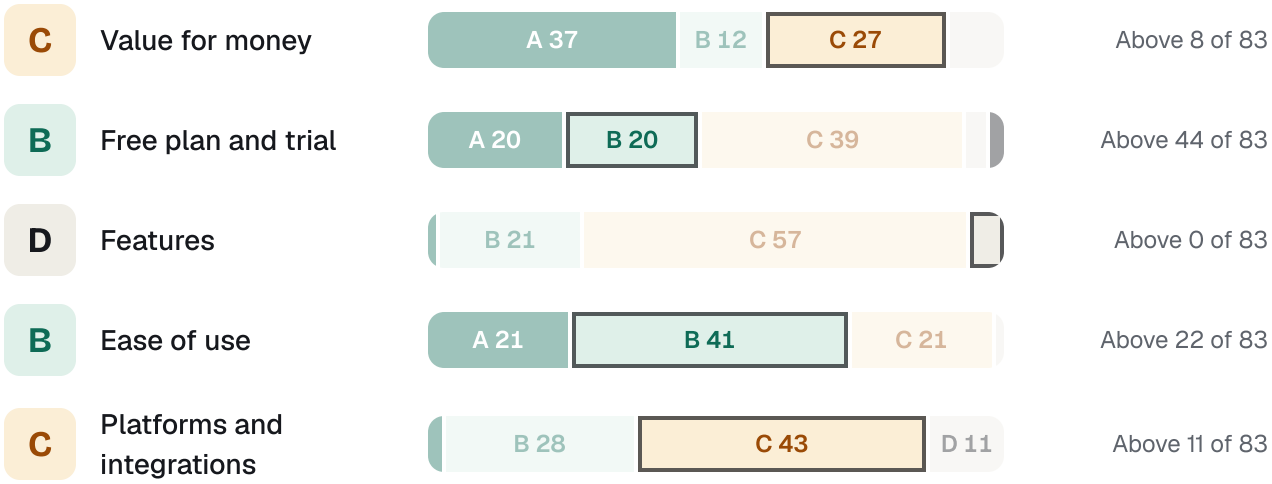

It stands best on free plan and trial (B, above 44 of 83) and worst on features (D, above 0).

Lofi Girl has no paid plan.

On features, ease of use and platforms it scores 2.0 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

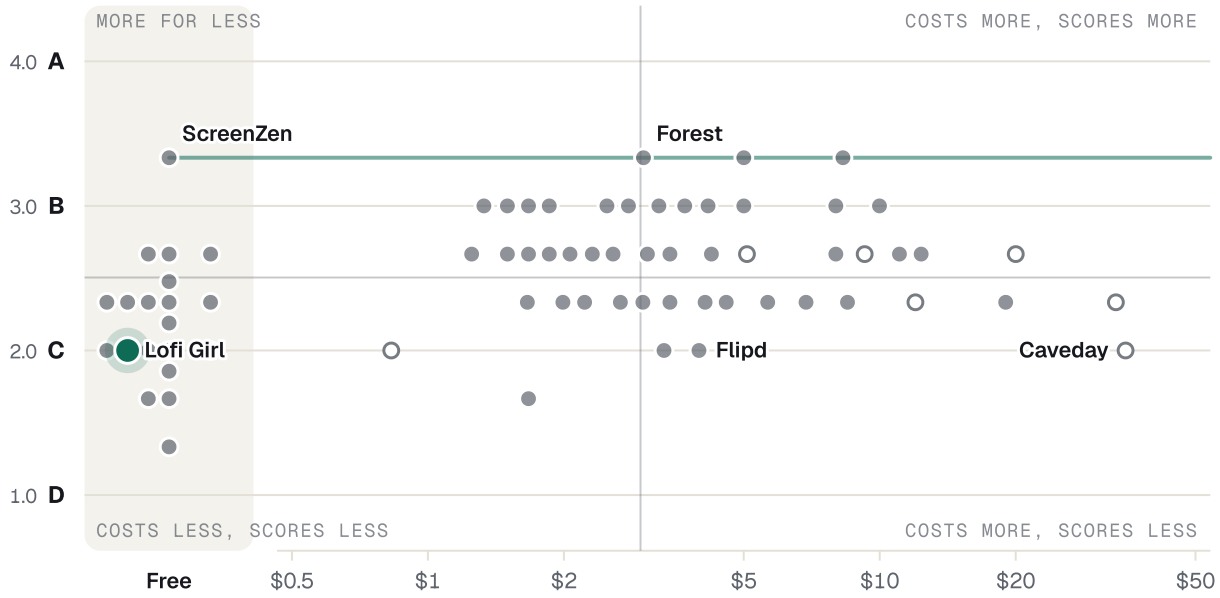

Each grade against the category

Every bar is all 84 focus apps we grade, cut by the letter each got. Lofi Girl's own letter is outlined.

Price against what you get

Each dot is one of 70 focus apps. Further left costs less; higher up scores better on features, ease of use and platforms. Lofi Girl is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Lofi Girl is free, so making your own would save you nothing.

That makes this kind of software worth paying for, not this one in particular: 61 of the 83 other focus apps grade higher.

What you could make

- Pomodoro timer: an app builder makes this well.

What you could not

- A library of sound you would have to license.

What this rests on. Lofi Girl's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
