Welcome

What it is, who it suits, its grades and the ten things to know first

2.8

GPA, above 69 of the 72 other inventory management tools we grade

Loyverse is a point-of-sale system that runs on iOS and Android phones and tablets, with a web back office for reports, items and stock. Its inventory tools track stock levels and low-stock alerts for free; purchase orders and transfers between stores are a paid add-on. It also covers loyalty, kitchen and customer displays, and several stores in one account.

To get you started, here are **9 things to know about Loyverse**, taken from its own pages and our grades.

> "
>
> **Adding items, taxes and devices is the work, and no store rating is on record.**
>
> From our grade for ease of use

1 **Best for a free till with basic stock tracking**

Loyverse is a point of sale for phones and tablets with a web back office, and the free plan includes basic stock levels and low-stock alerts.

2 **Paid plans start at $5 a month**

As its pricing page puts it: $5 per store / month for unlimited sales history; advanced inventory $25 per store / month.

3 There is a free plan

Point of sale, 31 days of sales reports, essential inventory with low-stock alerts, loyalty program, customer and kitchen displays, multi-store management and integrations.

4 It runs on 3 platforms

Web, iOS and Android.

5 Real-time stock levels

Tracks stock for items and their components, with automatic low-stock alerts, on the free plan.

6 Purchase orders and transfers

Sending orders to suppliers, tracking receipts and moving stock between stores need the Advanced inventory add-on.

7 Barcode labels

Print barcode labels, and connect a barcode scanner, receipt printer and cash drawer.

8 A 2.8 GPA, above 69 of 72

That is against the other inventory management tools we grade, on value, the free plan, features, ease of use and platforms.

9 Keep it

The plain part of Loyverse you could make: inventory and reports. What surrounds it you could not. The 4 things listed below take a company, not a weekend.

The report card

Best for a free till with basic stock tracking

Loyverse is a point of sale for phones and tablets with a web back office, and the free plan includes basic stock levels and low-stock alerts. Sales reports only go back 31 days, and purchase orders and transfers need a $25 a store add-on.

TOOLGPA REPORT CARD — **Loyverse** — Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	A	The point of sale and essential stock tracking are free. Paid add-ons are $5 a store for longer history and $25 a store for advanced inventory, both under 60% of this category's $49 cheaper-quarter start.
Free plan and trial	B	One shop can run on the free plan, with a 31-day report limit. Every paid add-on has a 14-day trial with no card.

SUBJECT	GRADE	COMMENT
Features	C	Stock levels, alerts, barcode labels, offline selling and multiple stores. Purchase orders and transfers sit in the $25 add-on, and it is a till first, so stock work is lighter than dedicated software.
Ease of use	C	Adding items, taxes and devices is the work, and no store rating is on record.
Platforms and integrations	B	Web back office plus iOS and Android apps, with integrations the vendor lists.
Grade point average		Good, out of 4.0 **2.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Loyverse is for

- ✓ Fits if you run a shop or cafe and want a free till with stock counts
- ✓ Works for small multi-store owners watching cost

Who it is not for

- ✗ Tight if you need reports older than 31 days, as longer history is $5 a store a month
- ✗ Watch out: purchase orders and stock transfers need the $25 a store advanced inventory add-on
- ✗ Not for you if you hold stock without selling at a counter, because stock tracking is lighter than in dedicated tools
- ✗ Pricey if you add staff, since employee management is billed per employee

Good to know

Good for

- ✓ Single shops, cafes and market stalls that want free stock tracking inside their till
- ✓ Owners who sell from a phone or tablet they already have
- ✓ Small chains that need several stores in one account

Worth knowing

- ⓘ The free plan shows only the last 31 days of sales reports; longer history costs $5 per store a month.
- ⓘ Purchase orders, stock transfers and deeper inventory insight need the $25 per store Advanced inventory add-on.
- ⓘ Employee management is billed per employee, so cost grows with staff size.
- ⓘ It is a point-of-sale system first; stock tracking for a business that does not sell at a counter is lighter than dedicated inventory software.

Where it stands

Its grades against its category, and whether to keep it or make your own

69/72

Other inventory management tools it is graded above

Loyverse's GPA of 2.8 is higher than 69 of the 72 other inventory management tools we grade, and level with 1.

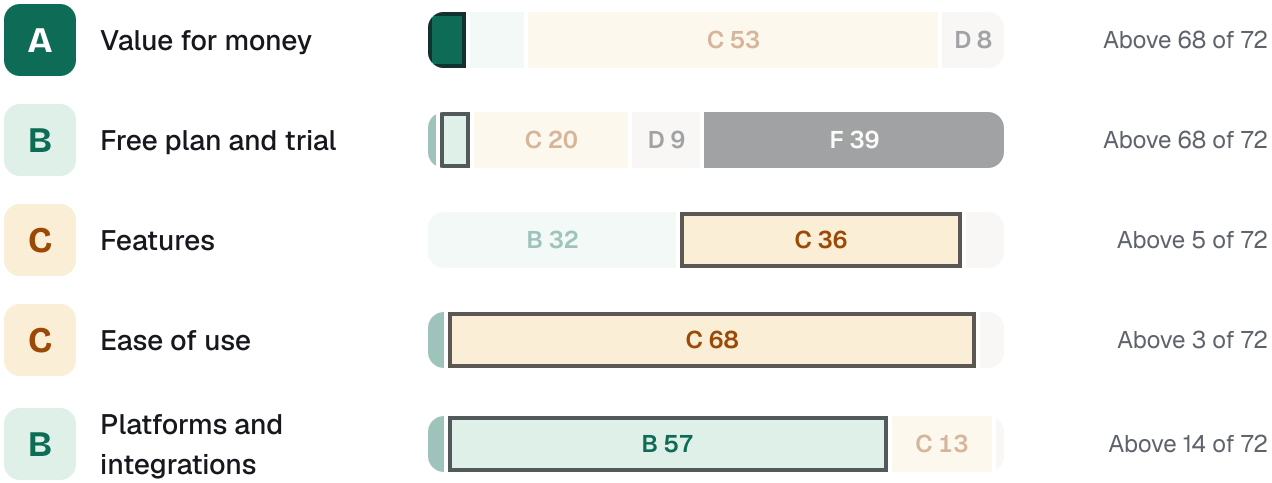

It stands best on value for money (A, above 68 of 72) and worst on ease of use (C, above 3).

Its paid plans start at $5 a month, against a middle price of $91 for the category: 1 of the 42 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

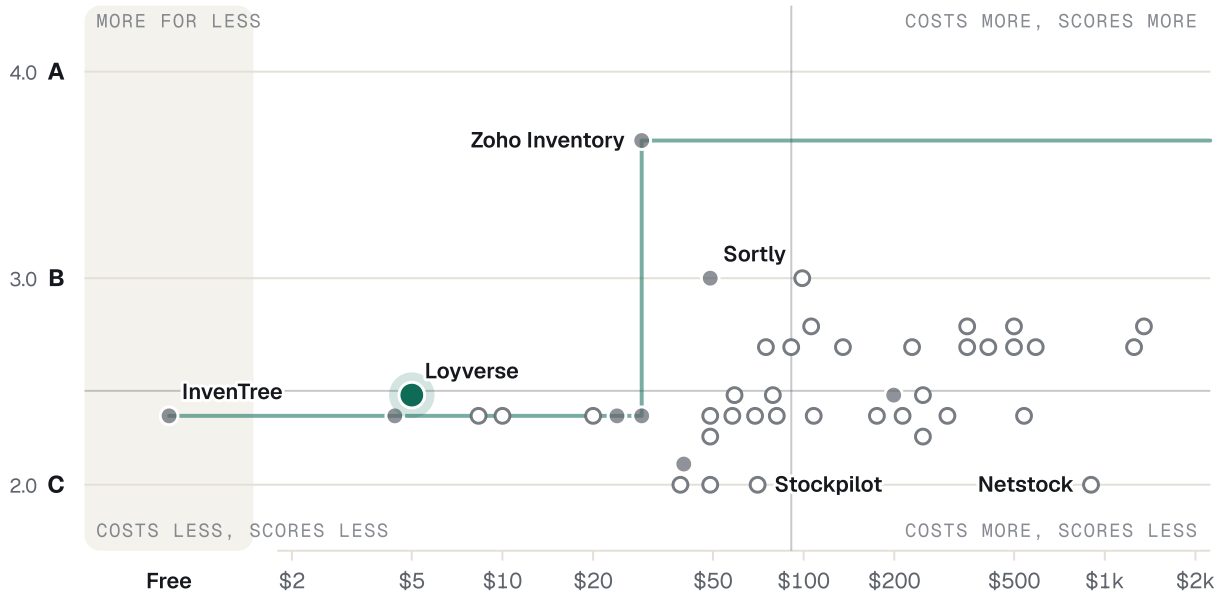

Each grade against the category

Every bar is all 73 inventory management tools we grade, cut by the letter each got. Loyverse's own letter is outlined.

Price against what you get

Each dot is one of 44 inventory management tools. Further left costs less; higher up scores better on features, ease of use and platforms. Loyverse is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Loyverse you could make: inventory and reports. What surrounds it you could not. The 4 things listed below take a company, not a weekend.

It is one of the better ones too: its GPA of 2.8 is higher than 69 of the 72 other inventory management tools we grade. It costs $60 a year.

What you could make

- Inventory and reports: an app builder makes these well.

What you could not

- Scanning barcodes with a phone camera or a scanner.

- ✕ Clocking in from a phone, checked against where and when.
- ✕ A real app for iOS and Android. Something home-made would be a web page.
- ✕ An API that other software can build on.

What this rests on. Loyverse's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
