Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 23 of the 89 other AI app builders we grade

Magic Loops lets people build and share small AI-native apps without writing code. Apps are made of Loops that run on a credit system, with community-made apps listed by category on the site. Paid plans are priced at $1 per 1,000 credits.

To get you started, here are **9 things to know about Magic Loops**, taken from its own pages and our grades.

> "
>
> **A web app where you describe the Loop and run it.**
>
> From our grade for ease of use

1 **Best for small AI apps built from a prompt**

But free Loops are public, how many credits a run costs is explained in a FAQ and not on the plan table, and no integrations are listed.

2 **Paid plans start at $9 a month**

As its pricing page puts it: $9 per month for 9,000 credits.

3 **There is a free plan**

Public Loops, 250 generation credits daily and 500 run credits monthly, with community support.

4 **It runs on Web**

Web.

5 **Prompt-built apps**

The site says apps are built without coding and describes the platform as no-code and all-code.

6 **Community app gallery**

Apps made by others are listed by category, such as content creators, study helpers and data insights.

7 **Credit-based pricing**

Every paid plan costs $1 per 1,000 credits, and the page lists credit counts per plan.

8 **A 2.2 GPA, above 23 of 89**

That is against the other AI app builders we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Magic Loops you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

SUBJECT	GRADE	COMMENT
Value for money	B	Hobby is $9 a month for 9,000 credits, about 60% of the category's cheapest quarter. Every paid plan is $1 per 1,000 credits.
Free plan and trial	C	A free plan with 250 generation credits a day and 500 run credits a month. Loops built on it are public.
Features	C	Prompt-built apps, a gallery and private Loops on Professional. It is a narrow kind of app, and the page lists no integrations.
Ease of use	C	A web app where you describe the Loop and run it. No store rating is on record.
Platforms and integrations	C	Web only, with no integrations or apps listed.

Grade point average Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Magic Loops is for

- ✓ Fits if you want small automations or little AI tools without writing code
- ✓ Works for tinkerers who can live with public Loops

Who it is not for

- ✗ Skip it if your work is private, as free Loops are public and private ones start at $20
- ✗ Tight if you run Loops often, as the free plan has 500 run credits a month
- ✗ Watch out: what a run costs is explained in the credits FAQ, not on the plan table
- ✗ Too light for company use, as SOC 2, custom models and on-premise hosting are Enterprise only

Good to know

Good for

- ✓ Hobbyists making small AI utilities
- ✓ Trying an app idea at low cost before committing

Worth knowing

- ⓘ Free-plan Loops are public; private Loops need a paid plan.
- ⓘ Credits, not seats, drive cost, and how many credits a Loop run uses is explained in the site's credits FAQ rather than on the plan table.
- ⓘ SOC 2 compliance, custom models and on-premise hosting are Enterprise only.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

23/89

Other AI app builders it is graded above

Magic Loops's GPA of 2.2 is higher than 23 of the 89 other AI app builders we grade, and level with 27.

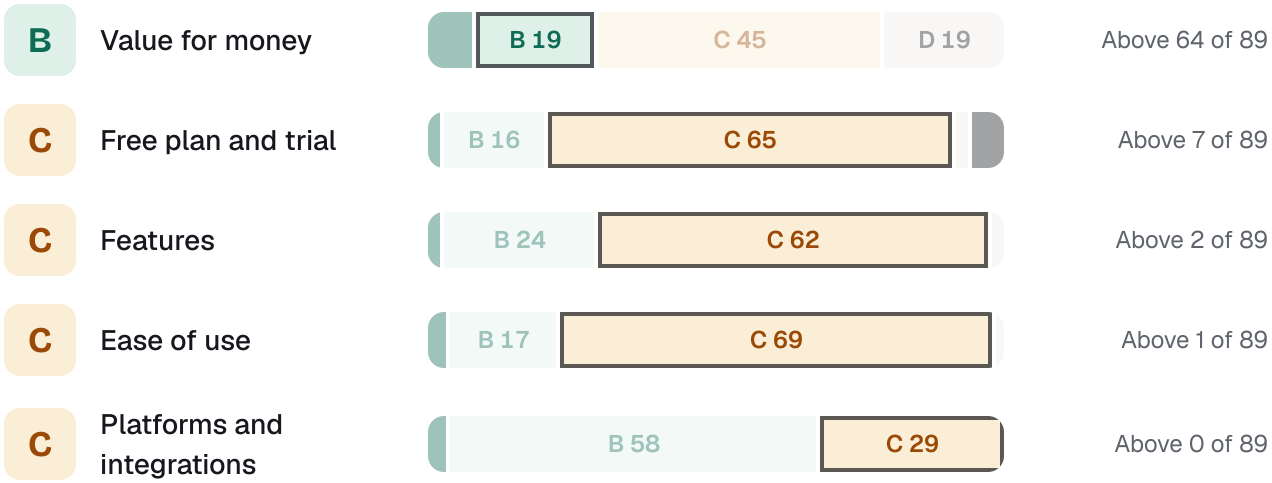

It stands best on value for money (B, above 64 of 89) and worst on platforms and integrations (C, above 0).

Its paid plans start at $9 a month, against a middle price of $20 for the category: 7 of the 82 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 6 tools score higher and cost less.

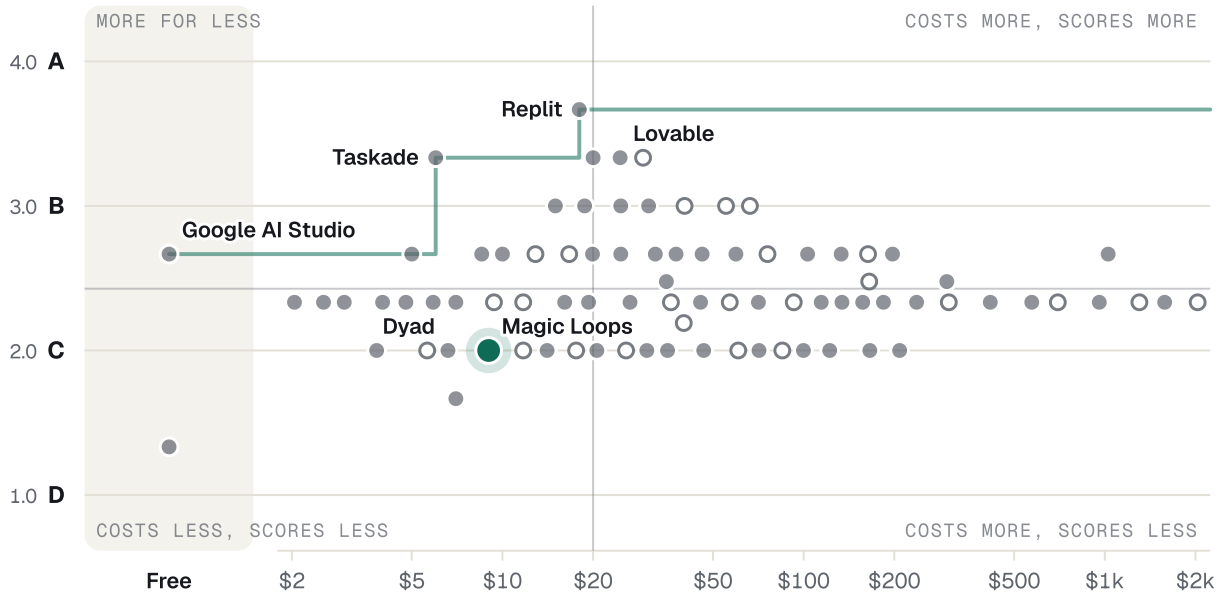

Each grade against the category

Every bar is all 90 AI app builders we grade, cut by the letter each got. Magic Loops's own letter is outlined.

Price against what you get

Each dot is one of 85 AI app builders. Further left costs less; higher up scores better on features, ease of use and platforms. Magic Loops is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Magic Loops you would be making a tool that builds and hosts other apps. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 39 of the 89 other AI app builders grade higher. It costs $108 a year.

What you could not

- ✕ A tool that builds and hosts other apps.
- ✕ A builder that other people can use without writing code.

- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Magic Loops's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
