Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 23 of the 61 other email verification and deliverability tools we grade

MailTester.ninja checks whether an email address exists by asking the recipient's mail server, without sending a message, and says it stores none of the addresses submitted. It also finds work email addresses from a name and company domain. One-off checks are free, and paid keys raise the daily limit and unlock the API.

To get you started, here are **9 things to know about MailTester.ninja**, taken from its own pages and our grades.

> **You pay for a daily limit rather than credits, so requests over it are refused until the next day.**
>
> From our report card of MailTester.ninja

1 **Best for checking addresses through a daily-limit API**

MailTester.ninja verifies addresses live and has an email finder, a REST API, SDKs and an MCP server.

2 **Paid plans start at $30.29 a month**

As its pricing page puts it: $6.99 per week for up to 100,000 checks a day; $23.99 per month for the same limit.

3 **There is a free plan**

One-off checks on the website are free with no signup. The API allows 10 checks a day with key=free, or 50 a day with a free token valid for 7 days.

4 **It runs on Web**

Web.

5 **Live mailbox check**

Each address is tested against the recipient's mail server (syntax, DNS, MX and an SMTP handshake). No message is sent, and the page says no copy of the address is kept.

6 **Verdict codes**

Results are ok, ko (invalid) or mb (unverifiable), with messages such as Catch-All, Disposable, Greylisted, Timeout and No MX.

7 **Email finder**

Tries common address formats such as first.last and flast for a name and company domain, and returns the first the server accepts. The Finder API needs a paid key.

8 **A 2.2 GPA, above 23 of 61**

That is against the other email verification and deliverability tools we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

Nothing MailTester.ninja does is plain enough to make in a weekend. The 2 things listed below take a company.

The report card

Best for checking addresses through a daily-limit API

MailTester.ninja verifies addresses live and has an email finder, a REST API, SDKs and an MCP server. You pay for a daily limit rather than credits, so requests over it are refused until the next day.

TOOLGPA REPORT CARD	MailTester.ninja	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	C	Pro is $23.99 a month, and the weekly Starter is $6.99, about $30 a month. The category's middle is $23.
Free plan and trial	C	One-off checks on the site are free with no signup. The free API allows 10 checks a day, or 50 with a 7-day token, one request every 30 seconds.

SUBJECT	GRADE	COMMENT
Features	C	Live mailbox check, verdict codes, finder and tools. An accepted address on a catch-all domain cannot be confirmed to exist.
Ease of use	C	No rating on record. Paste an address or call the API; the daily-limit model needs some thought.
Platforms and integrations	B	Web only, but with a REST API, SDKs, an MCP server and a list of integrations.
Grade point average		Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who MailTester.ninja is for

- ✓ Fits if you want a steady stream of live checks from an API
- ✓ Works for people who check a few addresses by hand on the free site

Who it is not for

- ✗ Tight if you work in bursts, as requests over the daily limit are refused until the next day
- ✗ Skip it if you want credits that carry over, since plans are priced by daily limit
- ✗ Watch out: Starter is billed weekly, and the monthly plans are Pro and Ultimate
- ✗ Watch out: free API calls are 10 or 50 a day, one every 30 seconds
- ✗ Watch out: a catch-all domain's accepted address is not proof the mailbox exists

Good to know

Good for

- ✓ Cold-outreach teams verifying large lists at a flat price
- ✓ Developers adding a verification call to automations
- ✓ Users who want to check single addresses without signing up

Worth knowing

- ⓘ Free API calls are limited to one request every 30 seconds, and 10 or 50 checks a day.
- ⓘ Plans are priced by a daily limit, not a credit balance: requests above it are refused until the next day.
- ⓘ Starter is billed weekly; the monthly plans are Pro and Ultimate.
- ⓘ An accepted address on a catch-all domain cannot be confirmed to exist.

Keep it

Nothing MailTester.ninja does is plain enough to make in a weekend. The 2 things listed below take a company.

It costs $363.48 a year.

What you could not

- ✕ Checking that an address exists without writing to it.
- ✕ It plugs into other products, n8n, Zapier and Make among them, and has an API.
